FIA APPROVED
8860-2018

GP-7 SRC

The GP7- SRC is fully compliant with the latest FIA8860-2018 standard which is a requirement for the majority of FIA sanctioned International events.

The helmet is manufactured from ultra-lightweight and immensely strong hand laid carbon fibre which is supplied in a clear finish in preparation for painting.

Visor opening and locking system features a lever operation which is both simple and effective even when wearing a glove within the tight confines of single seater cockpit.

The visor aperture features increased dimensions for a wider field of vision and the 3mm compound curve visor is prepared for use with tear-offs

Other features include:

- Visor opening lever system for easier operation
- Emergency release cheek pads
- Enhanced ventilation system
- 2 Large chin air intakes
- 4 Inlet/Outlet exhaust vents and 3 crown vents
- Drinks system enabled
- Supplied with Arai PED spoiler kit
- Factory fitted HANS*/FHR posts

Colour; Clear coat carbon weave.

- Drinks system enabled
- Emergency release cheek pads
- Enhanced ventilation system
- 2 Large chin air intakes
- 4 Inlet/Outlet exhaust vents and 3 crown vents
- Multi density EPS inner lining

Colour: White

FIA APPROVED
8860-2015

GP-6S

This helmet uses the Complex Laminate construction system which provides an exceptional lightweight and rigid shell. The design incorporates a hyper ridge in the lower section to greatly increase the strength of the outer shell. Increased cooling is achieved by large air intake and exit vents. Shaped interior cheek pads have improved comfort and fit with the added benefit of reducing wind noise.

- Fitted with two female M6 terminals to allow FHR post anchors to be fitted by the end user

Colour; White only.

SIZE	CODE	PRICE

£66.99

Walero have designed their range of FIA & SFI approved underwear using technology found in space! The Walero temperature regulating flame retardant products offer unique properties only found in Walero garments.

NEW RANGE

FOR 2024

WALERO 2.0 TEMPERATURE REGULATING FIREPROOF BASE LAYERS

Using a NASA developed technology, Outlast®, Walero FR underwear actively regulates your bodies temperature and skins microclimate.

The Outlast® technology utilises phase change materials (PCM). A phase change material with a high heat of fusion which, melting and solidifying at a certain temperature, is capable of storing and releasing large amounts of energy. Heat is absorbed or released when the material changes from solid to liquid and vice versa. Comparable to ice in a drink; as it changes from solid to liquid, it absorbs heat and cools the drink, keeping that drink at the desired temperature for longer. Outlast® phase change materials work in the same way.

As a result of this temperature management, perspiration can be reduced over 30%, keeping you hydrated and minimising the effects of heat stress and fatigue, allowing the wearer to maintain concentration and improve performance, when the heat is on.

Not happy with the rough, scratchy feeling that is caused by the Nomex® underwear? Neither were Walero. So they went in search of something different. Softer, more comfortable, better! Walero discovered, Protal® a fibre with permanent flame retardant (FR) qualities. Protal® works in a different way to Nomex (Which carbonises when exposed to flame). Protal® fibres emit tiny amounts of inert, non-burning gases to push the oxygen away from the surface to stop the burning process. No oxygen, no fire! It goes without saying (well, almost!) that all Walero base layers are FIA and SFI compliant (in fact, Walero almost doubled test criteria, but no-one likes a show off!).

Walero then span Protal® together with a combination of other fibres to create our unique Walero yarn. It is this yarn which is then knitted together to produce our famous, supersoft fabric. Which in turn is stitched together with flat-lock seams to create Walero base layers.

Cool Grey

With added hospital grade Envirotech® to keep you fresh

Available in small or large

NEW FOR 2024

At the time of writing this (December 2023), Walero are in the midst of gaining FIA homologation for the new 2.0 Version of their temperature regulating underwear range. Socks have already been homologated to the newer FIA 8856-2018, the rest of the range is due to be homologated later in 2024. Please see website or phone us for more updates.

SCHROTH FHR DEVICES (All FIA 8858-2010 Approved)

ONLY
£282.00

SHR EVO FHR DEVICE

The SHR EVO FHR is now just 730 grms including tethers and pads making it one of the lightest FHR devices available in this price range. The winglets on the side help keep the harness shoulder straps in place whilst the sliding tethers offer excellent freedom of movement.

Sizes **Medium** or **Large**.

XLT FHR DEVICE

The XtraLight (XLT) Frontal Head Restraint Device is one of the lightest devices available on the market today. A 30 degree medium XLT device weighs just 464grms including the tethers. Whilst a medium 20 degree weighs an impressive 650grms. Schroth's latest in Carbon Fibre technology mean these amazing weight reductions can be achieved whilst maintaining comfort and fit. Supplied with Vision Advantage sliding tethers, shoulder pads and a carry bag.

Sizes **Medium** or **Large**.

ITEM	PRICE
20° XLT	£1388.42
30° XLT	£1480.48

All Schroth FHR Devices are available in two sizes.

This is determined by your neck/shirt collar size. **Medium FHR** for neck sizes 15" to 18" (38-46cms) and **Large FHR** for 18" (46cms) upwards.

The angle of FHR is determined by the approximate recline of your seating position. Most popular is 20° as most saloon 'bucket' type seats are 20° recline. Single Seater and Sports Cars would generally require the more reclined 30° FHR.

Many other accessories for Schroth FHR Devices are available, please phone or visit our website.

TWIST ANCHOR SLIDING TETHERS

All Schroth FHR's are now supplied with Twist Anchor sliding tethers and are suitable for use with Schroth Twist Anchor Posts.

FIA 8858-2010 Approved

ONLY
£73.72

SIZES
17", 18" or 19"

SCHROTH VISION ADVANTAGE SLIDING TETHERS

These tethers can be retro-fitted to an FHR/HANS® device to enable greater freedom of movement when in use. Schroth Medium and Large FHR devices are supplied as standard with 18" tethers. Competitors using an open face helmet where the FHR posts are slightly further back will require a 17" tether.

FIA 8858-2010 Approved.

ONLY
£73.72

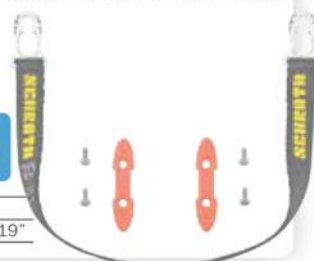

SIZES
17", 18" or 19"

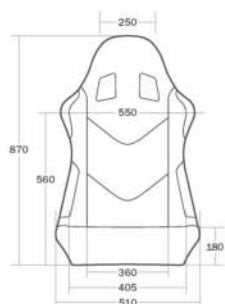

TWIST ANCHOR FHR POSTS

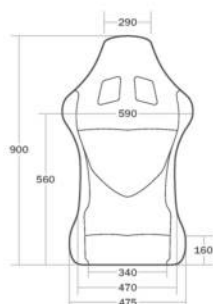

Schroth Twist Anchor FHR Posts are an alternative to the standard FHR posts. All new Schroth FHR's are supplied with tethers to suit these new posts.

Suitable for use with FIA-8858-2010, FIA 8860-2010, FIA 8860-2018, FIA 8859-2015, Snell SA2010, Snell SAH2010, Snell SA2015 and Snell SA2020 approved helmets.

FLEXI BELTS

The Flexi Belt option means one harness can have many variations.

The lap belt latches and brackets supplied with the harness can be assembled to the lap belt with a two-bar sliding bracket, allowing you to change the configuration.

With this, you can choose on pull-up or pull-down versions and, if applicable, different for the left and right belt. You can also vary the lengths to optimise the adjuster position depending on you car, your seat and your seating position.

BUCKLE TYPES

Aluminium Rotary buckle is a newly developed compact buckle which feature a quicker and more positive "click" and a more ergonomic release lever.

Push Button Composite buckle has been designed to meet both FIA standard and ECE/FMVSS standard, making it suitable for both competition and road use.

WHAT IS A FHR SPECIFIC RESTRAINT?

Schroth designed and developed the 2"/3" FHR specific shoulder belt configuration in 2002 when the FHR was first being introduced into motorsport.

The concept of the FHR specific restraint is quite simple, we designed a belt which fits cleanly and completely onto the surface of the FHR without any extra webbing to hang off the side of the FHR. The fitment of the 2" webbing on the FHR allows for secure and optimal routing of the restraint.

With the introduction of FIA 8853-2016 standard for restraint systems, a full 2" shoulder belt version may now be used. The FHR 2" design is available on almost all of the 6-point models. The FHR specific 2" restraints are used by our teams in F1, NASCAR, Porsche Cup cars, WRC.

If you use, or are planning on using a FHR we recommend one of our 2" FHR specific restraints. FHR specific restraints must ONLY be used with FHR.

LIFELINE MOTORSPORT HARNESSES

A range of high quality FIA 8853-2016 homologated harnesses from the champions of safety. Made in the UK at its Coventry factory, high quality and performance are guaranteed.

BECKETTS SALOON HARNESS WITH 2 INCH SHOULDER STRAPS

ONLY
£216.40

Lifeline Becketts 6 point harness has been designed for use in Saloon type vehicles where snap hook fitting is used on the waist and crotch straps. The shoulder straps can be fitted using snap hooks or by being wrapped around a harness bar within the roll cage. The Becketts harness is an entry level Club harness which utilises easy to use steel adjusters on all Six straps.

This model of Becketts harness has 2 inch (51mm) wide shoulder straps and so can only be used in conjunction with an FHR/HANS device.

FIA 8853-2016 Approved for competition use when wearing an FHR/HANS Device.

A 3 inch wide shoulder strap version is also available. This can be used with or without an FHR/HANS device.

FIA 8853-2016 Approved for competition use.

STOWE FORMULA HARNESS WITH 2 INCH SHOULDER STRAPS

ONLY
£276.45

Lifeline Stowe 6 point harness has been designed for use in Formula, Single Seater type vehicles and some GT cars where bolt-in type fitting is used on all 6 mounting points. The crotch straps feed through the waist straps to give increased comfort when seated.

The Stowe harness utilises lightweight aluminium adjusters on the shoulder straps. The adjusters are easy to use and feature fabric straps for easy use even when wearing gloves. Contrasting pull tabs on the straps themselves also make adjustment easy.

FIA 8853-2016 Approved for competition use when wearing an FHR/HANS Device.

COPSE APEX SALOON HARNESS WITH 2" SHOULDER STRAPS

ONLY
£340.00

New for 2024, the Lifeline Copse Apex harness has new crutch strap adjusters included on the already popular Lifeline Copse harness. This harness comes with 2" webbing on all the straps. This harness features aluminium adjuster on the shoulder, lap and crutch straps for quick, easy adjustment and release.

The lap straps have the adjuster built into the tongue which makes for a more compact unit and allows for a greater adjustment range. The Copse harness is supplied with both snap hook and bolt in hardware but can also be wrapped around the roll cage if required.

FIA 8853-2016 Approved for competition use when wearing an FHR/HANS Device.

FIRE EXTINGUISHER SERVICING & REFILLS

Merlin Motorsport's fully trained technicians are authorised by both Lifeline and SPA Design to service their Fire Extinguisher systems.

We have a fully equipped workshop at our Castle Combe Circuit base where services can normally be undertaken whilst you wait.

Generally for a Mechanical extinguisher it will take up to 1 hour and an Electrical system can take up to 3 hours depending on whether the system has been discharged and will require the firing head to be rearmed.

Alternatively you can send us your extinguisher and we will endeavour to service it and returning to you within 24 Hours of us receiving it.

If you are unsure which service option you require please ring or email with the bottle size and whether it is a Mechanical or Electrical system and we will confirm the appropriate service option.

To comply with MSUK regulation Fire Systems must be checked and serviced every two years. On completion of the service a new date label is applied making it valid for competition for a further 2 years.

Fire extinguisher bottles older than 10 years cannot be serviced.

PLEASE NOTE YOUR FIRE EXTINGUISHER WILL NOT PASS SCRUTINEERING IF THE SERVICE DATE HAS EXPIRED.

Please refer to the following tables for charges.

These prices are for the service only and any parts that need replacing will incur an additional charge.

LIFELINE FIRE EXTINGUISHER SERVICING

Here at Merlin, we are authorised to service/refill Lifeline Fire Extinguishers, in some cases whilst you wait. Listed below are prices.

Motorsport UK have adopted the FIA regulation for extinguishing systems, with a phase out of the existing MSA regulations.

The UK manufacturers of fire suppression equipment have agreed that from the 31st December 2017 they will no longer manufacture systems that comply with the existing MSA regulation and will only produce systems that are FIA approved to either FIA Technical List 16 or 52.

NEW

**3450
175**

ZERO 175

Approved to FIA homologation # FS.001.23 - 8876-2022

A revolution in single-seater fire safety with its lightweight, fast acting and compact design. System can efficiently use suppressant material keeping weight to an absolute minimum. New nozzle design resulting in rapid discharge meaning that one nozzle is situated in the cockpit, one in the engine bay and two in the sidepods. 1.3KG complete bottle weight.

CODE	PRICE
105-002-001	£899.00

360 remote charge offers highest level of fire protection

**3450
360**

ZERO 360 REMOTE CHARGE

Approved to FIA Technical List 16

The highest level of fire protection offered by a system approved to FIA technical list 16.

These systems self-pressurise upon activation and distribute only pure undiluted NOVEC™ 1230 suppressant making them highly efficient.

This remote charge version of extinguisher has been refined, with the remote cartridge integrated onto the side of the cylinder, offering improved packaging characteristics and reduced weight.

These fast-acting systems are available in three sizes:

- 1.5 kg for single seaters/prototypes, 2.0kgs for saloon/sports cars and 3.0kg system that can be used in International Rally events
- All systems come with two nozzles for the engine bay and two flat fan nozzles for the cockpit ensuring extremely fast fire knock-down
- Supplied as a complete installation kit with anti-torpedo brackets and all of the components necessary for a professional installation

Electrical actuation only.

CODE	DESCRIPTION	SIZE	PRICE
106-001-003	1.5kg system for Formula & Prototype Cars (2.2kg total weight)	230mm L x 90mm dia.	£1587.10

106-001-009	3kg system for Rally Cars (4kg total weight)	324mm L x 125mm dia.	£1518.10

**3450
2020**

ZERO 2020 FIRE SYSTEMS

Approved to FIA Technical List 16

The very best and latest in foam based extinguisher systems. The Lifeline Zero2020 range. Featuring 5 nozzles in total with 3 in the engine bay and 2 in the cockpit. Supplied as a complete kit with anti-torpedo brackets and all the components necessary to comply with latest technical list 16 regulations. Available in either mechanical or electrical actuation.

50% ABF Foam Concentrate.

- Class A - Fires involving solid materials such as wood, paper or textiles
- Class B - Fires involving flammable liquids such as petrol, diesel or oils
- Class F - Fires involving oils

360**

ZERO 360 (STORED PRESSURE)

Approved to FIA Technical List 16

Smaller and lighter than their Zero 2020 counterparts the Zero 360 stored pressure systems benefit from advanced nozzle design that delivers a significantly more efficient distribution of 3M™ Novec™ 1230 suppressant producing a faster and increased levels of concentration, ensuring extremely fast fire knock-down. Once operated the system distributes the Novec™ 1230 through 3 nozzles in the engine bay and 2 flat fan nozzles in the Cockpit. The 2.25 kg option is perfect for all types of circuit racing but this is also available in 3.0kg variant that allows this system to be used in International Rally events. Supplied as a complete installation kit with anti-torpedo brackets and all the components necessary for a professional installation. Available in either electrical or mechanical actuation.

ZERO 360 FIRE MARSHAL MECHANICAL STEEL BOTTLE

The entry level Zero 360 Fire Marshal utilises Novec 1230 gas inside a steel bottle, for when weight saving is not required.

Complete kits are supplied including:

- Bottle with bracket and straps, x2 pull cables, x5 nozzles (3 engine - 2 cockpit), x6 metres of 8mm tubing plus various other items of plumbing hardware

MONIT RALLY COMPUTERS

This range of Professional Rally Computers has been developed by Monit at it's New Zealand base as the next generation of navigation aids for all types of rallying.

G-SERIES PROFESSIONAL GPS+ RALLY COMPUTER

The G-Series unit is lightweight with a large sunlight viewable display, easy to use graphic interface but with the addition of a high-sensitivity GPS receiver. This allows the unit to measure distance and speed without the need for a traditional wheel speed sensor, greatly simplifying installation and improving reliability.

G-100 GPS+ -

- Features include;
- Two distance counters
 - Current & maximum speed
 - Stopwatch and 0-60mph timer

ONLY
£389.00

CODE
G-100

G-200 GPS+

- Identical to the G-100 with additional features:
- Time of day and stage data recorder
 - Fuel measurement system
 - Average speed
 - 1/4 mile performance timer

ONLY
£469.00

CODE
G-200

GPS+ SPEED FUSION TECHNOLOGY - EXPLAINED

The G-Series can measure distance and speed using either the GPS satellite signal or a traditional wheel speed sensor, or both. If both are used the proprietary GPS+ software automatically switches over to the wheel sensor if the GPS signal is lost. This means that accurate operation can be maintained even in tunnels or dense forest cover where the signal might be degraded.

MONIT Q-SERIES

The Monit Q-Series has the perfect balance of features and affordability for the club competitor on a budget.

Q-10

The Q-10 offers great value for money with the limited functions of this entry level version. It has a sunlight readable display, an LED backlight for night use and on screen easy to use calibration instructions.

Features;

- Interval distance (up or down)
- Total distance with single reset in miles or kilometres
- Split/Freeze
- Adjustable distances

ONLY
£199.00

CODE
Q-10

Q-20

The Q-20 has the same features as the Q-10, but with the addition of current and average speed measurements making it ideal for regularity type events.

MONIT 2 BUTTON HAND REMOTE

The Monit 2 button hand remote has been designed for use with both the G-100+ and G-200+ rally computers. This remote control allows the easy and quick control of the Auxiliary A and B inputs enabling the user to select and change in the menu which functions to control with the remote. A 3-button version is also available. The third button can be user set to clear the interval distance counter, or to freeze the display.

MONIT BRAKE BIAS ADJUSTER DIAL

The Monit Brake Dial is a remote brake bias adjuster which has a built in LCD display which shows the position setting of the vehicle's brake bias. It allows drivers to easily view and adjust the position that the brake bias is set to. Reset the display to Zero at your preferred position and confidently adjust for changing conditions to achieve maximum braking performance. The brake bias adjuster dial is available in Black or Orange with either square backing plate mounting or bulkhead mounting.

MECHANICS ERGONOMIC WORK SEAT WITH WHEELS

Professional mobile stall designed for use in the workshop, pit garage or paddock. Selection of storage compartments on the base of the legs to enable you to keep your parts and tools close at hand. Measures 582 x 353 x 431mm.

CODE	PRICE
BG5174	£39.99

LOW RISE VEHICLE RAMPS

These ramps are ideally suited for lowered cars or race cars with low body parts. The ramps will raise the car 70mm off the ground, making it easier and safer to get trolley jacks under the vehicle.

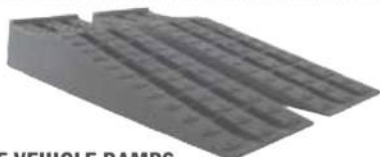

CODE	PRICE
BGR225	£59.99

LOW RISE SPLIT RAMPS

These split versions offer the additional benefit of allowing easier access to jacking points once the vehicle is on the ramps.

CODE	PRICE
BGR228	£59.99

MID RISE VEHICLE RAMPS

These ramps will raise the car 110mm off the ground. The Polypropylene Ramps are lightweight at just 4.4kgs per pair yet can easily handle 5000kgs load on them. Each ramp measures 190mm wide by 810mm long.

CODE	PRICE
BGR226	£88.99

STRING LINE KIT

The B-G Racing String Lines kit is an easy to use yet accurate way of measuring 4 wheel alignment. The kit comes complete with adjustable frames which allow fitment to a wide variety of vehicles, thanks to some hooking feet which are interchangeable to all of the tubes found in the kit. Protective carry case available also.

ITEM	CODE	PRICE
String Line Kit	BGR200	£64.99
Carry Case	BGR200BAG	£46.99

FOLDING UTILITY WORK STATION

This versatile Work Station is designed for use in the pits, paddock and back in the workshop.

It features:

- Its quick and easy folding design allows for easy transportation and storage
- A tray on top holds a small selection of tools.
- A recessed section for bottles and aerosol cans
- A blue paper roll holder
- A waste bin bag holder
- A Euro storage bin (300mm x 400mm) can be accommodated
- The rear legs are fitted with 75mm diameter wheels for easy of movement

The dimensions for this handy work station are; 920mm (High), 690mm (Deep) and 520mm (Wide). (The folded dimensions are; 1125mm (High), 520mm (Wide) and 80mm (Deep). It weighs just 9.5kg

Please note: The Blue Roll and other items shown on the work station are for illustration purposes only.

STACK BOOST CONTROLLERS

With a digital RPM display which is backed up with radial LED's, this gauge gives an instant readout in either PSI, Bar or kPa units.

Controller modifies the mechanical waste gate duty cycle to achieve higher boost pressures than some in place controls would otherwise allow and is suitable for use with both single and twin turbo (bi-turbo) applications.

Also featuring:

- Push button programming with 4 programmable control strategies
 - high boost, low boost, RPM based mapping and gear based mapping
- The controller has MAP RPM and vehicle speed inputs along with intelligent gear capture, peak tell-tale memory and Pro-Control output
- 0-5V datalogger output and optional barometric compensation mode
- Interactive Wideband Lambda gauge design to allow a lean alarm to trigger boost cut

ONLY
£340.33
EACH

Designed to match the Wideband Gauge

ST200 CLUBMAN TACHOMETERS

For the serious performance enthusiast, the 80mm (fits standard 80mm cut outs) sized Clubman features the unique, extremely rugged STACK stepper-motor movement, with digital Quartz accuracy for unparalleled precision.

- Configurable for all negative earth and magneto ignition systems
- Unique Stack Stepper-Motor Needle Movement
- Peak RPM 'Tell-Tale' memory
- User adjustable shift light option (lamp not included)
- Exceptional reliability and fully sealed against water and dust to IP67 standard
- Available in 0-8,000RPM, 0-4-10,500RPM, 0-6-15,000RPM with White or Black Dial Faces

ONLY
£428.11

CHRONOTRONIC™ 80MM TACHOMETER (ST901096)

An accurate replica of the original chronometric tachometer. Stepper-Motor Needle Movement re-creates 'chronometric' motion up to 4000-RPM then smooth movement up to 10,000RPM with peak RPM 'Tell-Tale' memory.

- Chromed brass bezel & maintenance free white LED flood lighting
- User adjustable shift lamp option (not included) and fully sealed against water and dust to IP67

ONLY
£340.33
EACH

STACK WIDEBAND LAMBDA GAUGES

Dual digital and radial LED displays provide accurate real-time readout of either air/fuel ratio or Lambda (user selectable). A 0-5 Volt analogue output can be connected to a data logger prior to an ECU to provide real-time closed loop feedback for improved mapping. Complete with wiring harness and includes Bosch sensor.

ST700 DASH DISPLAY

Integrated tachometer, sequential shift light and voltmeter in a single 80mm diameter instrument. Standard options include speedometer, lap timer and two pressure or temperature. In addition the ST700 can be fitted with a range of performance options, including an acceleration timer, infrared lap timing system, split time memory and straight and corner speed readout.

- Adjustable day & night backlighting levels to suit ambient light conditions
- Fully sealed against water and dust to IP67 standard
- Peak value 'Tell-Tale' memory is provided on all monitored parameters
- Configurable for all vehicle types and negative earth ignition systems
- Comes supplied with separate professional wiring loom

STACK SPEEDOMETERS

Stack Professional Speedos have been designed to fit with Stack Pro Control and Professional gauges. Simple wiring connections and easy to use push button programming make installation and calibration straightforward. Compatible with most OE vehicle speed sensors as well as aftermarket speed pulse generators.

- Includes backlit odometer and two reset-able tripmeter displays

ST800 INTEGRATED DASH DISPLAY SYSTEMS

The ST800 Dash Display System replaces all dashboard instruments - tachometer, oil pressure gauge, fuel pressure gauge, water temperature gauge, oil temperature gauge and voltmeter - with a single lightweight carbon composite display module.

Analogue Tachometer

The preferred choice of most racers.

Wide Choice of Dial Faces

See Dial Face section available on our website.

Intelligent Alarms

Provided on all monitored parameters. Alarm levels are user adjustable to suit individual vehicle requirements. An internal alarm light is standard and an optional external light can simply be plugged into the dash harness.

High Accuracy Solid-State Pressure & Temperature Sensors

The solid-state pressure and temperature sensors are smaller, lighter, more accurate and more reliable. Supplied as standard with all ST800 Dash Display Systems.

Bright White LED Backlighting

ensures clear viewing day and night.

Super-Bright Warning Lights

The dash features a user configurable and built-in, super-bright LED shift light. Additionally, an external dash top or panel mount shift light can be simply plugged into the dash harness.

Lightweight Carbon Composite Housing

Fully sealed against water and dust to IP67 for maximum reliability year after year.

Optional Sequential Shift Light Module

All Stack Dash Displays can drive the new Sequential Shift Light Module. Using the display menus, each of the 5 shift lights can be independently programmed to a specific RPM value, to provide complete flexibility. The Sequential Shift Light connects to the dash harness with just 3 wires, and is ideal for dash-top mounting. (ST539)

Driver Selectable LCD Display Layers

show different engine and performance information. Maximum peak value 'Tell-Tale' memory is provided on Speed, Temperature parameters and RPM. Minimum peak value tell tales are provided on pressure and voltage parameters.

Transflective LCD Backlit Display

Contrast improves when under bright illumination - clearly visible in bright sunlight.

User Configurable Inputs, Displays & Alarms

The ST8916S System has 11 user-configurable sensor inputs and optional CAN ECU interface for maximum flexibility. The LCD display layers and alarms are also fully configurable (PC required for configuration).

For more information ring for details or visit: www.merlinmotorsport.co.uk

RACETECH 80MM SPEEDOMETER

Updated model with easy to read face and backlit. Using the latest stepper motor technology it can be switched for input pulses per mile or km.

RACETECH 80MM TACHOMETER

Fast acting tachometer which is switchable for 4, 6, or 8 cylinders. Can accommodate a variety of ignition systems. Also available with built in 3 stage shift light.

ITEM	REF	PRICE
Electronic Speedo 80mm (0-140mph)	A	£172.94

RACETECH PRESSURE LINE ISOLATOR

Used in the fuel pressure gauge line to prevent high pressure fuel entering the cockpit. Injection systems only.

ONLY
£29.12

CODE
RTA700

RACETECH SERIES 2 DUAL DISPLAY GAUGE

Developed utilising state of the art surface mount microprocessor technology. Selectable backlight LED now with 7 colour options.

Digital LCD 52mm diameter gauges with high-definition displays which are supplied with either Black dial face and bezel or White dial face and black bezel.

Features include;

- Programmable high and low alarm settings
- Adjustable backlight brightness
- Selectable units for temperature and pressure
- Stainless steel pressure and vacuum sensors
- Programmable button functions, recall and menu

Backlight colour options:

NEW

FROM
£49.72

VDO REED SWITCH FUEL LEVEL SENDER

Replacement for the popular 'Dip tube' VDO fuel sender. Operating voltage of between - and 48 volts. Resistance value, 91 Ohms when empty and 1 Ohm when full. Available in lengths between 150 and 800mm long. Increments of 50mm.

SOLID STATE BATTERY ISOLATORS

Cartek electronic Battery Isolators are a very small and highly reliable alternative to the traditional mechanical master-switch.

They have been designed to overcome all the problems and restrictions associated with mechanical and electro/mechanical master-switches to maximise reliability, enhance safety, save weight and simplify installation.

- Fully electronic with no moving parts
- Totally sealed against water and dirt
- Completely resistant to shock and vibration
- Fully integrated with built in alternator run-down circuitry - **No extra components required**
- Driver operation by a single internal ON-OFF button/switch
- External operation by single or multiple 'strike' button(s)
- Buttons/switches connected to isolator using lightweight wiring
- Mounts close to battery for reduced cabling
- Very small and weight is only 70g - 100g
- Designed and manufactured in UK using the latest and best quality components available

Meets FIA Safety Regulations

Principle of Operation:

All race and rally master switches must perform two functions,

- (1) Disconnect the battery from all electrical circuits and (2) Stop the engine.

ITEM	PRICE
GT Isolator Complete Kit	£240.50
XR Isolator Complete Kit	£279.00
(Kits can be supplied with Blue or Red external kill button, please specify your preferred colour when ordering)	
GT Isolator Unit only	£198.50
XR Isolator Unit only	£230.75
Spare External Kill Buttons available in Blue, Red or Yellow	£25.50
Safety Sticker Deal Pack	£8.95

CARTEK XR BATTERY ISOLATOR

At 30% smaller size and 40% lighter weight than the previous 'standard' and GT Isolators, this XR version has been specifically designed to interface with programmable motorsport ECUs and PDMs.

Battery disconnection is achieved by braking the connection between the NEGATIVE battery terminal and CHASSIS EARTH. The engine stop function is performed by the XR outputting a signal to the ECU/PDM.

SIZE	L = 60MM W=45MM
Weight	70G
Battery Negative Terminal	M8 Bronze Stud
Operational Voltage	8V-18V
Current Consumption	1mA Off, 25mA On
Battery Negative Switching Current	500-600A Typical, 2000A Surge
Engine Kill Signal Current	12V 0.2A When On, Switched To Chassis/Earth When Off
Operating Temperature	-10°C - +85°C

CARTEK GT BATTERY ISOLATOR

Suitable for cars with standard ECU's or ignition systems.

Battery disconnection is achieved by braking the connection between the NEGATIVE battery terminal and CHASSIS EARTH. The engine stop function is performed by cutting 12v power to the engine electrics, e.g. ECU or Ignition Switch.

SIZE	L = 92MM W=50MM
Weight	120G
Battery Negative Terminal	M8 Bronze Stud
Positive Power Terminals	M6 S/S Stud
Operational Voltage	7V-18V
Current Consumption	6mA (Max On & Off)
Battery Negative Switching Current	500-600A Typical, 2000A Surge
Positive Power Switching Current	40 A Maximum
Operating Temperature	-10°C - +85°C

FIA APPROVED RAINLIGHTS

Cartek FIA approved rainlight homologated to 2008 FIA tech list 19. This BS1 tested rain light meets all FIA requirements including minimum size, light intensity, viewing angle, heat resistance and prolonged use reliability. Measures 90mm x 58mm x 13mm and weighs 140g. Available as horizontal or vertical mounting.

ITEM	CODE	ONLY £79.00 EACH
Vertical Version	CK-LR-15-V	
Horizontal Version	CK-LR-15-H	

FIA 8874-2019 RAIN LIGHT

Homologated to the latest FIA 8874-2019 regulations these latest Rain Lights can be used in Static or Flashing 4Hz mode. The new generation of Cartek Rain Light is 3 times brighter than previous and come with a 200mm mil-spec cable (Type55 22awg wiring). The Rain Lights are IP65 compliant and can also be wired up as a multipurpose Rain/Brake Light.

ITEM	CODE	ONLY £114.95 EACH
Rectangular	CK-LRS-15RM	
Circular	CK-LRS-16CM	

CARTEK MULTI FUNCTION SHIFT LIGHT

New and improved Shift Light which incorporates 8 full colour, high intensity LED's and now includes an additional alarm signal input which will flash a different display pattern to let the driver know there is a fault with the vehicle.

User can configure the lower and upper RPM settings with or without the engine running, select from several LED display patterns for the Shift Light sequence and the brightness of the LED's. The Cartek Shift Light is designed to work with most ignition systems and tach signals. The unit is fully sealed for open-cockpit cars and motorcycles.

Size: W75mm x H18mm

OBD VERSION ALSO AVAILABLE

CODE	PRICE
CK-LS-CL	£112.50
CK-LS-OBD	£149.95

CARTEK GEAR INDICATOR

A dashboard mounted device to indicate to a driver the current selected transmission gear. Also features a sequential shift light display which can indicate to a driver the optimum time to shift up a gear. Available with or without OBD2 connection.

ITEM	CODE	PRICE
Club Version	CK-LG-CL	£165.50
OBD2 Version	CK-LG-OBD	£189.50

POWER DISTRIBUTION PANEL

The Cartek Power Distribution Panel is a fully integrated, fully electronic solution to power distribution in race and rally cars. Designed to replace 16 Fuses, Relays and Switches as well as a variety of selectable control functions, these units therefore greatly simplify the wiring, reducing build time, saving weight and maximising reliability.

Unlike most PDM's on the market, this Power Distribution Panel does not need a laptop to program the configuration. Pre-set options for functionality and current settings can be chosen by going through a simple process via the switch panel (see tutorial video). This saves the user time and any potential labour costs in setting it up.

The Cartek Power Distribution Panel is one of the most cost-effective solutions on the market due to the switch panel being designed as part of the package, whereas most other PDM's require expensive CAN-Bus Switch Panels to be purchased and programmed separately. A Classic version is also available.

CODE	PRICE
CK-PDP-16	£950.00

REAR FOG LIGHT CONTROL UNIT

Simply wired between the fog light switch and the vehicle's headlamp wiring. The small unit is compatible with all LED and bulb type fog lights, 12 volt 21W maximum. IVA tests now states that the rear fog light must turn off AND STAY OFF when the headlamps are switched off.

CODE	PRICE
CD-ES-FC2	£38.25

CARTEK 4 CHANNEL POWER DISTRIBUTION MODULE

Designed to replace the use of fuses, relays and circuit breakers with one small, solid state electrical unit. The 4x ten amp outputs can be used to control power to various items such as ECU's, dashboards, lighting, starter motor and radiator fans etc. The channels will automatically shut down if a short circuit or over-current gets detected whilst LED indications on both the PDM and any Cartek Switch Panel makes fault finding simple

CODE	PRICE
CK-PM-04	£135.50

Lumenition

Lumenition's Optronic and Performance ignition systems converts contact breaker ignition to electronic ignition. Ideal for all performance cars, particularly race and rally applications.

OPTRONIC IGNITION SYSTEM

Features:

- Contactless operation
- Fixed dwell giving higher performance from existing coil
- High power output transistor gives fast and accurate switching of the coil
- Recommended for all engine sizes up to 8 cylinder engines running at a maximum of 9,000 rpm
- Also available: Optronic Classic 'Green' Ignition System (PMC-50)

Ignition System		Optronic Replacement Spare Parts		
CODE	PRICE	CODE	ITEM	PRICE

PERFORMANCE IGNITION SYSTEM (CEK150)

Features:

- Contactless operation
- Kit includes high energy coil, electronically matched to power module
- Electronically variable dwell angle, optimising energy use to prevent low speed coil over heat and boost spark across rev range
- Automatic switch off, preventing electrical damage if ignition is left on without engine running
- Fully compatible with Lumenition rev limiters for complete engine protection
- Recommended for all engines up to 12 cylinders running at a maximum of 8,000 rpm

HIGH PERFORMANCE COILS

ONLY
£65.00

CONSTANT ENERGY COIL

Replacement Lumenition constant energy 12 volt coil for the performance electronic ignition system.

CODE
CEC

ONLY
£40.00

MS2 COIL

For use with standard points and condenser ignition systems. To be used with a ballast resistor (sold separately)

CODE
MS2

ONLY
£40.00

MS4 COIL

Lumenition MS4 coil to be used in conjunction with the Lumenition Optronic and Magnetronic ignition systems. Comes supplied complete with a ballast resistor.

CODE
MS4

ONLY
£45.00

MS6 UNBALLASTED COIL

Megaspark MS6 coil to be used in conjunction with the Lumenition Optronic or Magnetronic ignition systems. High energy, unballasted ignition coil is also suitable for use with points based ignitions or aftermarket electronic ignition systems where a ballast resistor is not used.

CODE
MS6

BOSCH BLUE HIGH ENERGY COIL

For use in 12 Volt systems which do not have voltage increase for starting. Ensures excellent starting and provides more power than standard energy coils. Bosch Part Number for this coil 0 221 119 027. Supplied complete with a ballast resistor.

Please see our website for details.

Built to withstand the extremes of high performance Motorsport.

EnerSys® are the original manufacturers of the UK's most widely used Motorsport batteries which have historically been sold under a number of popular brand names.

Extreme 8, 15, 30 and 40 batteries are manufactured in the UK at Newport, South Wales and Extreme 20 & 25 in the USA.

ODYSSEY® Construction Features;

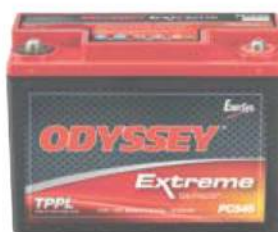

- Rugged construction gives resistance to vibration
- AGM (Absorbed Glass Matt) design eliminates acid spill
- Pure virgin lead plates for more power - twice the overall power & three times the life of conventional lead acid batteries
- Safety relief valve per cell
- Sealed design - Gases recycled internally during charging/operation
- Robust intercell connections prevent vibration damage
- Corrosion resistant tin plated brass terminals

Other Features;

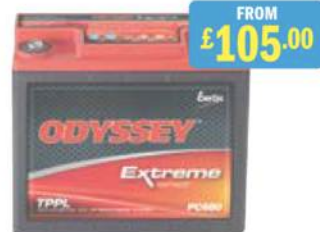

- Longer service life; with 3-10 years service life the battery saves times money and aggravation. (Never leave the battery discharged, recharge immediately after use)
- 70% Longer cycle life and produces a high stable voltage for longer periods
- Longer shelf life; can be stored open circuit (nothing connected to the terminals) up to 2 years or 12.00 volts which ever occurs first
- Faster recharge efficiency of any sealed lead battery on the market, capable of 100% recharge in 4-6 hours. (Do not boost charge and the charger must supply 14.70volts)
- Non-spillable design allows mounting flexibility - it can be mounted on any side or any position except inverted
- Extreme temperature tolerance (-40°C to 45°C)
- Totally maintenance free - no need to add water ever!

MOCAL OIL COOLERS

Oil coolers are necessary on tuned and high performance engines. The oil thins as the temperature rises and its lubricating properties may be reduced. To keep the oil temperature at about 80°C it may be necessary to fit an oil cooler. The coolers are made in two widths 115mm and 230mm (core width). The coolers can be supplied with either BSP or JIC unions.

LAMINOVA OIL COOLERS & HEAT EXCHANGERS

Laminova oil coolers are more efficient than the competition due to the unique patented core design. The finned exterior on the cooler core creates a larger surface area compared to that of traditional "radiator" style coolers. Laminova heat exchangers provide outstanding engine and transmission oil temperature control in the most severe conditions. These advanced oil/water heat exchangers can be mounted virtually anywhere or where a lack of space would make it difficult to install a conventional oil-air cooler.

The single core coolers are available in three lengths, 160mm, 245mm and 395mm.

Water side connections are available in 16, 18, 24, 28, 32, 35, 38 and 45mm OD. Oil side connections in -6, -8, -10 and -12JIC. Please state connection sizes when ordering.

£6.30

FBN FUEL/OIL HOSE & FIRTREE UNIONS

FBN hose is the ideal hose for self assembly applications; it does not require swaging or clips to secure the unions to the hose. It has a maximum pressure of 250psi and a maximum temperature with oil of 150°C.

It must be used with the correct "fir tree" unions. Vacuum resistant for dry sump systems.

This hose can be used with Goodridge 536 series JIC alloy unions where weight saving is required.

SUSA OIL COOLER MOUNTING BRACKETS

Oil cooler mounting bracket for the ProLine STD range of Setrab oil coolers (also fits Mocal oil coolers). Manufactured from lightweight, rib-reinforced aluminium, the bulkhead type mounting brackets utilise 70A durameter dampening pads to completely stop the cooler getting subjected to vibration.

The Setrab cooler brackets are available in 3 different sizes;

- To suit 115mm matrix width cooler
- 235mm matrix width cooler
- 310mm matrix width
- Brackets come supplied complete with rubber dampening, threaded plates and bolts

FROM
£47.55

ONLY
£175.39

SUSA INLINE OIL THERMOSTAT

Setrab USA (SUSA) inline oil thermostat has been designed to be fitted in the oil lines which run to and from an oil cooler. The thermostat allows engine oil to by-pass the oil cooler until the oil reaches a temperature which requires cooling (thermostat opens at 82°C). The female M22 x 1.5 ports allow the use of Setrab oil cooler adaptors (note: -16JIC adaptors will not fit the thermostat housing). The mounting bracket supplied with the thermostat can be fixed in many different orientations. (Please note, the black JIC adaptors shown in the image are for illustration purposes only and are sold separately).

SUSA OIL COOLER 90° BANJO ADAPTOR FITTING

Setrab ProLine banjo fittings can be installed straight in to the top of any Setrab ProLine oil coolers (or indeed any port with M22 x 1.5 thread) and offer a very tight 90 degree turn whilst maintaining excellent oil flow thanks to the generous ports in the banjo bolt part itself. Manufactured from aircraft quality aluminium and hard-anodised. Even when fitted, this banjo fitting allows for complete 360° rotation to help simplify any plumbing installation.

The Setrab Oil Cooler Banjo Adaptor is available with AN6, AN8, AN10 or AN12.

FROM
£58.30
EACH

SUSA REMOTE OIL FILTER HEAD

Remote oil filter heads allow relocation of an oil filter to an engine bay. These SUSA oil filter heads come complete with a mounting bracket which can be bolted on either side of the filter head to ease plumbing.

The remote oil filter head has four M22 x 1.5 female ports meaning many differing plumbing orientations can be achieved when using the Setrab oil unions (sold separately) M22 plugs are supplied with the filter head. The filter head will accept oil filters with a minimum O-ring I.D. of 2.4" (6.1cms) and a maximum O.D. of 3.5" (9cms).

These remote oil filter heads are available with three different oil filter threads, 3/8" UNF, 1/2" UNF or M20 x 1.5.

DESCRIPTION	PRICE
82°C	£61.25

EACH

SUSA OIL FILTER TAKE OFF PLATE

This oil filter take off plate is designed to replace the standard oil filter allowing the fitment of a remote filter housing. The take off plate screws to the thread where the oil filter would normally be attached, allowing an inlet and outlet port to be neatly attached. Supplied tapped with M22 1.5 female ports meaning any Setrab oil cooler adaptor can be used to attached the hoses.

The take off plate is available with 4 different attachment threads, 3/8" UNF, 1/2" UNF, M20 x 1.5 and M22 x 1.5.

SUSA PROLINE 90 DEGREE ADAPTOR

These neat adaptors have been designed and manufactured by Setrab USA to be used with most Setrab oil coolers which have M22 female ports (and some Mocal parts with M22 ports). Ideally suited for when space around the cooler ports is at a premium.

These SUSA ProLine adaptors feature M22 male threads which can swivel to enable fitment. The adaptors are available with different JIC (AN) threads, -6, -8, -10 and -12.

FROM
£30.25

SUSA THERMAL SWITCH PROBES

Thermal switches can be installed in any 1/8" NPT pipe port to activate a 12V accessory at the prescribed temperature.

FROM
£92.79

SUSA THERMOSTATIC OIL TAKE OFF PLATE

'Hyperflow' thermostatic oil sandwich take-off plate which features a unique self-contained thermostatic oil valve and has generous flow cavities within the cast aluminium plate. The plate is a 'naturally open' oil bypass and the built in thermostatic oil valve allows the engine to warm up to operating temperature before sending oil through an oil cooler. M22 female ports mean any Setrab oil cooler adaptor can be used for pipe connections (excluding -16JIC adaptors). This take off plate is available with either 3/4" UNF extension bolt, M20 x 1.5 or M22 x 1.5 extension bolt.

FROM
£136.02

SUSA OIL COOLER FAN KIT

Ideally suited for when Setrab ProLine oil coolers are mounted where space is minimal and where air flow is not available. The strong, close fitting fan shroud provide excellent cooling levels, and the slim Spal fan (which is supplied with the kit) offers high air flow capabilities.

DESCRIPTION	PRICE
For 13 Row, 115mm Matrix Width Setrab Cooler	£136.02
For 19 Row, 115mm Matrix Width Setrab Cooler	£169.25
For 25 Row, 235mm Matrix Width Setrab Cooler	£206.40

SUSA IN-LINE OIL/ FUEL PRE FILTER

Designed to be installed directly in the oil or fuel pipe before a vital component, e.g. external differential, transmission cooling pump, fuel pump. The filters feature high flow with minimal pressure drop and have a 150 Micron element. Whilst a strong 'rare-earth' magnet helps to protect high-value pump components. The filter element found inside is cleanable/replaceable thanks to the easy to disassemble filter body.

OIL COOLER TAKE OFF PLATE FOR BMW ENGINES E36/E46 AND E90

This take off plate replaces the factory oil access plate and hard lines on the models of BMW to enable the upgrade of the oil cooling system. Has m22 female ports. Comes supplied with O-ring seals and securing bolts.

HIGH FLOW BAYONET DRY BREAK COUPLING WITH AN/JIC THREADS

Dry break couplings offer the ultimate convenience for a quick and clean changeover of fluid system components. These new high flowing dry break unions have Viton internal seals which enable smooth 360° swivel between the AN connection and the bayonet dry break mechanism, ensuring the threaded AN connections remain tight at all times.

SETRAB PRO LINE SLIMLINE SLM OIL COOLER

The range of Setrab Pro Line Slimline (SLM) oil coolers are ideal for cooling gearboxes, rear axles and motorcycle engines where space is tight. Thinner than the standard Pro Line range of oil coolers, the Slimline version have also been re-designed and strengthened in order to withstand the tough conditions found within all forms of motorsport. The SLM coolers feature M22 female threads at either end. These coolers also feature m6 female holes along the top and bottom to help enable secure fitting. Maximum working pressure of 10 Bar.

- 141mm version measures 211mm total width and 40mm deep.
- 250mm version measures 320mm total width and 40mm deep.
- 420mm version measures 490mm total width and 40mm deep.
- 592mm version measures 655mm total width and 40mm deep.

SETRAB PRO LINE COM OIL COOLER

The Setrab Pro Line COM range of oil coolers are designed to withstand the harsh environment often found in motorsport. These heavy-duty oil coolers from Setrab feature very wide cores along with heavy duty build end tanks. The Pro Line COM has been designed for use in systems which run higher pressures and where vibration is present.

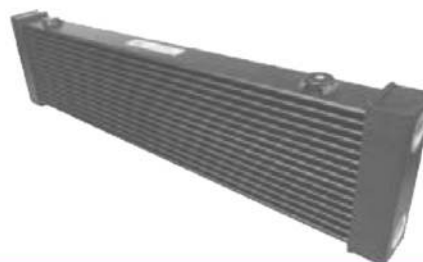

This cooler is available with either a 464mm or 528mm core width. The height and depth are dependent on the size of the cooler.

The 464mm core has a total width of 532mm, 107mm core height making the total height 121mm, and finally the core depth 46mm, 50mm total depth.

The 528mm core's total width is 592mm, core height is 136mm making the total 148mm tall. Again, the depth is 46mm making the total 50mm.

All coolers feature the M22 female ports. The ports are located at one end of the coolers body. It also features m8 female studs top and bottom for secure fitting.

CARBURETTOR FITTINGS FOR 200/210 SERIES

The revolutionary design helps to simplify carburettor installations, and the banjo bolt design means that the same fittings can be used to suit either Weber (12mm x 1.5) or Dellorto (12mm x 1.25). All fittings available in Black.

600 SERIES BRAKE & CLUTCH HOSE Temperature range: -73°C to 232°C

600 series hose strongly resists expansion under high pressure and temperature, provides consistent brake and clutch pedal pressure giving firmer and more efficient operation without that spongy feeling. Excellent for motorcycle and race car braking systems. 600 series also features a PTFE lining making it ideal for fuel lines running through a cockpit. Suitable for E5, E10 and E85 fuels.

600 SERIES SWAGING

HAND HELD CUTTER FOR 600-03/04 SERIES PTFE HOSE

A handy ultra sharp tool which will not leave residue once cut.

Here at our premises at Castle Combe Circuit we have a designated Goodridge Technical Workshop where we can assemble hoses to your specification either using the Reusable Fittings or using our crimping machine with the Goodridge Swage Fittings.

Please email: sales@merlinmotorsport.co.uk or phone: 01249 782101 for more details.

HIGH PERFORMANCE BRAKELINES

Goodridge stainless steel braided brake lines have become the standard in racing and this technology is available for all models of car. Goodridge kits feature the finest quality stainless steel braided hose, which improves braking performance, eliminates the spongy feel of rubber hoses and provides superior resistance to corrosion.

All kits supplied with 4 lines unless stated otherwise.

- Greater Braking Efficiency
- Resistance To Abrasion and Corrosion
- Eliminates Sponginess Under Heavy Braking
- Added Reliability, Safety And Brilliant Looks
- If a kit is not listed we offer a swaging service and maybe able to replicate if sample lines are provided

FOR IMPROVED PERFORMANCE AND RESPONSE!

For a comprehensive listing visit:
www.merlinmotorsport.co.uk

Prices shown are for Stainless steel kits. Zinc plated options are also available.

MINTEX RACING BRAKE PADS

Competition Brake Pads available in the following compounds;

M1144 - Medium torque, positive pressure, excellent cold friction. Typical uses; Track days, Karts, Hill climb, Formula Fords.

M1155 - Medium torque, positive pressure modulation and high fade resistance. Typical uses; loose surface rally, Single Seater Racing and Track Day use for higher performance cars.

M1166 - High torque, positive pressure modulation and high fade resistance. Typical uses; Saloon Racing, Sports Cars and Single Seater Racing.

Single outlet (SVA compliant)	£60.48
Twin outlet with swivel angled unions (SVA compliant)	£84.08

CLUTCH SLAVE CYLINDER

Girlinging clutch slave cylinder as used on Hewland gear boxes. Available with left or right hand inlet.

ITEM	PRICE
RH 7/8"	£71.76
LH 7/8"	£71.76
RH 3/4"	£89.16

FROM **£71.76**

OBP Motorsport manufacture in the UK quality Rally, Drifting, Race pedal boxes, Hydraulic Handbrakes and a comprehensive range of Aluminium fabricated parts.

ONLY **£29.78**

OBP BALANCE BAR ASSEMBLY

Professional standard (7/16" UNF) balance/bias bar that is designed to maximize adjustability. Precision spherical bearing is durable and provides smooth operation. The unit is supplied with a reamed balance bar tube.

REMOTE CABLE BIAS BAR ADJUSTER

Designed to be connected to the pedal box so brake adjustment can be made whilst on track.

ONLY **£31.09**

OBP BRAKE FLUID RESERVOIR

CODE	DESCRIPTION	PRICE
CB004	Small reservoir	£12.78
CB004B	Large reservoir	£13.18

ONLY **£63.50**

WILWOOD

Brake proportioning valve with knob adjuster for infinite fine adjustment. Supplied with 1/4" NPT ports. Adaptor G-816-03P available to convert to 3/8" UNF male.

BRAKE BALANCE BAR

Brake balance bar enables accurate balancing of front and rear braking when you use dual master cylinders. Balance bar cable (3/8" x 24 UNF Female) allows easy remote adjustment of the balance bar from the dash mounted knob. Available in three lengths - 3.3ft, 3.6ft and 3.9ft.

ITEM	PRICE
Brake balance bar	£54.25
Balance bar cable	£46.10

ONLY **£78.12**

BRAKE DISC TEMPERATURE PAINT KIT

Most commonly used for monitoring brake disc temperatures. Contains three colour changing paints which provide a temp range of 450°C to 650°C.

CALIPER R CLIPS

Easier to use than split pins and can be reused indefinitely. Fits most Ford and Mini Calipers (not with vented discs).

ONLY **£2.85**

HAVE YOU SEEN...?

Monit brake bias adjuster

SEE P.20

Tilton have been designing and manufacturing brake parts for over 40 years. Often thought of as the market leader in braking components for the motorsport world, Tilton deliver high quality brake parts you can depend on.

TILTON MASTER CYLINDERS

74 SERIES MASTER CYLINDER KITS

These cylinders have become widely used by both car builders and race teams alike. They have a 28mm stroke and the kit includes; master cylinder, 193ml reservoir with clamps and filter, feed hose and reservoir mounting hardware.

FROM
£109.77

75 SERIES MASTER CYLINDERS KITS

Ideally suited for applications where space limitations require a compact master cylinder. The 75 Series cylinders are 60mm shorter than the 74 Series but still have a 28mm stroke. Kit includes; master cylinder, 193ml reservoir with clamps and filter, feed hose and reservoir mounting hardware.

FROM
£120.55

Replacement
cylinders
available

76 SERIES MASTER CYLINDERS

This Master Cylinder has a 29mm stroke with 2 outlet ports (either top or rear) which gives greater flexibility when plumbing brake lines. The second port can be used for a brake pressure sensor, bleed point or a feed for a brake light switch. Available with 5 different internal bore sizes; 1/8", 11/16", 3/4", 13/16" & 1 1/8"

FROM
£110.43

TILTON BRAKE FLUID RESERVOIRS

Three chamber brake fluid reservoir manufactured from a fibreglass reinforced nylon material. Can be used for front, rear brakes and clutch all in one compact unit. Measuring 184mm wide by 150mm high. Available with 10mm push on or -4JIC (7/16" UNF) outlets.

With a unique internally baffled cap and neck arrangement, a spill-free installation is achieved whilst allowing the system to breathe as intended.

ITEM	PRICE
-4 JIC	£176.42
10mm	£134.28
-4 JIC Low Profile	£176.42

For a full range of Reservoirs:
www.merlinmotorsport.co.uk

TILTON BRAKE PROPORTIONING VALVES

TILTON MASTER CYLINDER REPAIR KITS

Available for the 74, 75, 76 and 78 series master cylinders in bores 1/8", 11/16", 3/4", 13/16" & 1 1/8".

FROM
£32.34

FROM
£279.33

78 SERIES MASTER CYLINDER

The rear spherical bearing mount and one-piece piston/pushrod eliminate side thrust into the master cylinder, giving consistent and repeatable braking. These 78 Series master cylinders from Tilton have been designed for use with 800 and 900 series Tilton pedal boxes.

FROM
£142.12

THROTTLE LINKAGES

Available for all Tilton pedal assemblies. Makes the installation of your pedal assembly simple and professional whilst allowing fine tuning of the throttle progression.

BRAKE BALANCE BARS

Designed for use in conjunction with fixed mounted dual master cylinder systems. As used in all Tilton pedal assemblies, available separately for your own pedal set up meaning that you can adjust the brake bias front to rear. Available with either 3/8" UNF or 7/16" UNF threaded bar.

ONLY
£72.53

BRAKE BIAS ADJUSTER CABLES

High quality cables designed to be situated in the cockpit within arms reach for easy adjustment of the brake bias front to rear. Cable is 6ft long, supplied with both 3/8" UNF and 7/16" UNF ends to suit your balance bar.

CODE	COLOUR

TILTON 600 SERIES PEDAL ASSEMBLIES

These Pedal Boxes feature two aluminium pedals for brake and clutch. 72-603 and 72-616 pedal assemblies also include throttle pedals.

Tilton brake pedal box assemblies offer the best available value of their type.

Manufactured from forged aluminium, these pedal assemblies are lightweight, strong and robust.

Featuring:

- Ramps to prevent the balance bar from tipping
- High strength 7/16" UNF balance bars
- Adjustable clutch stop to prevent over-stroking
- Removable foot pads for excellent pedal ratio adjustment and oil impregnated bronze bushes on the pedal pivot points

CODE	ITEM	PRICE
72-603	Floor Mounted 3 Pedal Aluminium Pedal Assembly	£568.48
72-604	Floor Mounted 2 Pedal Aluminium Pedal Assembly	£377.35
72-607	Bulkhead Mounted 2 Pedal Aluminium Pedal Assembly	£387.15
72-608	Overhung Mounted 2 Pedal Aluminium Pedal Assembly	£377.35
72-616	Floor Mounted Cylinders Underfoot 3 Pedal Aluminium Pedal Assembly	£720.39

Please note; master cylinders are not included.

REPLACEMENT PUSH ROD FOR TILTON MASTER CYLINDERS

This push rod is available in three different lengths. The short version, as fitted to 73, 75 and 76 Series Master Cylinders. The medium version which is standard on Tilton 74 Series Master Cylinders. Then the extra long version, which is 150mm (6 inches) long. All supplied with 7/16" UNF thread.

ONLY
£8.82

90° BRAKE BIAS BAR COUPLING

The 90 degree coupler assembly is designed to connect remote brake bias adjusters to balance bars at a 90 degree angle. This allows the adjuster's cable to be routed so that it does not interfere with the clutch or throttle pedal. Features high-quality steel bevel gears housed within a compact aluminium case. Available in 3/8" UNF or 7/16" UNF thread.

ONLY
£107.81
EACH

CONCEPT RACING FABRICATIONS

UNIVERSAL 2 LITRE OIL CATCH TANKS

Baffled oil catch tanks with a breathable cap, drain plug and sight gauge. These oil catch tanks are designed to collect oil and vapour emitted by the engine that would normally be fed back into the engines intake system. A 2 litre oil catch tank is required for all circuit racing cars with engine sizes up to 2000cc.

- The Oil Catch Tank measures; 180mm tall x 120mm wide x 105mm deep. Available with 13mm push-on or -10 JIC inlets

ITEM	PRICE
13mm Push-On	£97.82
-10 JIC Threads	£111.22

FROM
£97.82

UNIVERSAL 1.5 LITRE FUEL SWIRL POTS

Used in high performance track cars and race cars. A fuel swirl pots is designed to act as a reservoir, helping to eliminate fuel starvation under heavy braking and cornering. In doing so, they minimise the risk of damaging the injection fuel pump.

- Available with either a base mounting or rear bulkhead mounting and features -6 JIC inlets and return and -8 JIC outlet
- The fuel swirl pots measures; 200mm tall x 100mm dia.

ITEM	PRICE
Base Mount	£114.78
Rear Mount	£120.16

FROM
£114.78

UNIVERSAL 1.5 LITRE HEADER TANKS

Header tanks are an essential part of a vehicles cooling system as they act as a reservoir for the coolant fluid as well as helping to eliminate unwanted air in the system.

- The rear mounting makes it easy for fitting into compact engine bays or to bulkheads
- Supplied with 16mm outlet, 6mm return and an 8mm overflow.
- Uses a standard size radiator cap and measure 200mm x 100mm

COOLANT SWIRL TANKS

Designed to "swirl" the water in a downwards motion as it enters the tank, helping to eliminate the air trapped in the system. This therefore keeps the pressure of the coolant system lower and also results in the water temperature remaining lower. Rear mounting for bulkhead or panel fixing. 32mm or 38mm OD Pipes. Takes standard size radiator cap so doubles up as a header tank.

Measures 200mm x 100mm.

PROFILTER

Over the years, ITG have created the lightest, most capable filters for all fields of motorsport, from Formula 1 to the World Rally Championship. The same design skills, advanced technology and attention to detail are also used to produce the Profilter range of high grade replacement filters for both road and competition use. With such a pedigree, you can be sure of a quality product with superior performance, and a highly competitive price.

Here is just a small selection of the huge range of Profilters currently in stock. A full range of applications and prices are available on request.

MAXOGEN PLEATED COTTON AIR FILTERS

ITG Maxogen Pleated Cotton Air Gauze Filters are the latest introduction to filter down from the company's participation in top-level motorsport. The key benefits include:

- Maximum filter surface area for maximum flow rate
- Fine cotton gauze element protected by epoxy-coated wire mesh
- Choice of unique spun aluminium trumpet or flexible rubber neck for mounting
- Compact proportions and up to seven neck diameters for easy fitment
- Optional foam over-sock for ultimate dust capturing ability

JC62 CONICAL

DIMENSIONS (INSIDE DIAMETER)	PRICE
60 and 70mm	£52.00

CARBON AIR BOX

CODE	DESCRIPTION	PRICE
AB65C	Universal Carbon Air Box	£325.00
AB65H	Universal Carbon Air Box	£325.00
AB80	Universal Carbon Air Box	£365.00
RAB65	Universal Carbon Air Box	£325.00

The wall thickness of the spinning is 1.5mm. So for example, if you select a JC60C air filter with 60mm internal diameter (I.D.) it will have 63mm outside diameter (O.D.).

MAXOGEN INDUCTION SYSTEMS

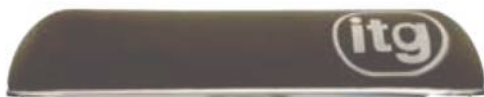

Revolutionary kits that enable cold, dense air to reach the fuel metering unit more efficiently. These remarkable units can deliver as much as 9% more effective peak power at the wheels, and in some cases at 500rpm less revs in doing so.

Maxogen filters are specially designed for turbo, fuel injected or special carburettor uses.

Please contact us for full application list.

500MM LONG STRAIGHT HOSE

In response to customer requests we can now supply 500mm lengths of SHL, TCH, FSHL & PSHL Straight Hose.

For a comprehensive listing visit:
www.merlinmotorsport.co.uk

PROFUEL™(PSHL) & OIL (FSHL) RANGE

Samco Sport has added to their product range with two specialist lining solutions for fuel and oil applications.

The **FSHL** range which is Fluorinated is suitable for Oil and Diesel transfer and limited petrol vapour applications. **It should not be used for continuous petrol/fuel use and is not suitable for fuel lines.**

Whilst the **ProFuel™** range is the world's first performance silicone hose for permanent fuel use.

Suitable for fuel lines, delivery, fillers and breathers. With the exception of vacuum tube all SamcoSport Race Parts are available in both these linings.

SELF SEALING HOSE TAKE OFF'S

Revotec have engineered a range of fittings to allow a threaded or barbed take-off to be fitted in silicone or rubber hoses which will accommodate senders, pressure switches or act as a tee. A hole punch is included in the kit which ensures a perfect 'O' ring seal when tightened.

SAMCO SPORT CLASSIC BRITISH HOSE KITS

FROM
£72.59

Samco Sport have now introduced a range of replacement hose kits to suit Classic British Sportscars such as the iconic E Type Jaguar and the infamous Frogeye Sprite.

Using the knowledge gained from years of designing and manufacturing silicone hoses, these new kits, as with all Samco hoses, come with the '100% Leak-Proof

Lifetime Guarantee' and are a must for any Classic Sportscar.

Available in any of Samco's 19 different colours including standard Black or the popular Classic Matt Black. Prices shown in table below are for standard colours.

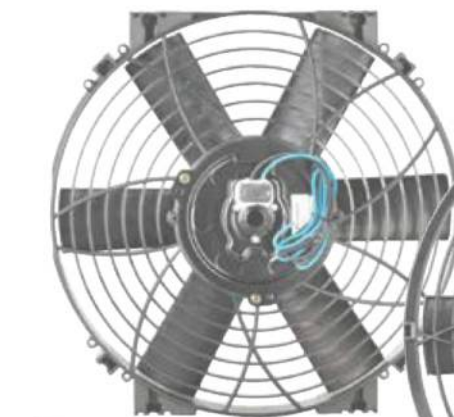

Please see Page 53 for Premium Colour options and surcharges.

DAVIES CRAIG ELECTRIC COOLING FANS

The concept of the electric radiator fan as a replacement for the mechanical fan is well established. Because it is not running all the time it saves power and also more controllable, for instance, it can be run after engine switch off, especially in conjunction with an electric pump to avoid damaging heat build up.

Davies Craig electric radiator fans have a quiet and highly efficient blade design which together with the high quality Panasonic motor provides an excellent package.

To suit different installations the blade and motor polarity are reversible to change from pulling air through the radiator to pushing.

The range of fans we stock are for 12 volt applications although some 24 Volt versions are available upon request.

DAVIES CRAIG LOW COOLANT LEVEL ALARM KIT

This kit monitors the level of coolant in the engines coolant system and gives an audible alarm if any drops in level occurs.

Competition engines can be quickly damaged due to a leak in the coolant system due to a holed radiator or split hose and sometimes a temperature gauge cannot be enough to alert the driver.

The alarm module features a choice three of audible alarm patterns and also allows either a louder external alarm (such as horn) or even a light to be activated. The nylon inline sensor adaptor fits neatly in to a top radiator hose.

CODE
DC1035

COOLING ANCILLARIES

MOTORAD RADIATOR CAPS

By fitting a cap with a higher-pressure rating, this allows the engine to run hotter temperatures without boiling. A wider range of caps available. See web for full listing.

The Davies Craig range of electric water pumps (EWP) have been in use for many years and are the pump of choice when replacing existing mechanical, belt driven water pumps. Designed to be universal, the pumps can be fitted to nearly any vehicle using the range of hose adaptors which come with each pump. There are now four main versions of the water pumps to choose from, with varying flow rates. Some models are available with Nylon or Alloy pump bodies.

EWP'S PARTS & ACCESSORIES

ONLY
£110.77

LCD EWP® & FAN DIGITAL CONTROLLER (8001)

This new and improved pump and fan controller now features a large 70 x 60mm LCD screen which shows current engine temperature and desired engine temperature. Whilst also displaying when the fan & pump are running, whilst an audible alarm sounds if desired temperatures are exceeded.

By varying the speed of the EWP the controller will keep your engine at the optimum operating temperature.

£32.23

EWP MOUNTING BRACKET (8700)

The Davies Craig EWP Mounting Bracket has been designed for use with the EWP115, EWP130 and EWP150 models of water pump (Nylon and Alloy versions). It offers greater flexibility and assists with the hard mounting of the EWP to the engine bay by providing a rubber dampener to minimise vibration damage.

CODE
DC8700

ONLY
£39.30

EWP & FAN SWITCH (0444)

A universal thermatic switch designed to be used with Electric Water Pumps and electric fans alike. It senses air temperature as it passes through the radiator. Can switch up to 2 fans and has an adjustable temperature range of between 40°C and 110°C. The sensor for the switch can be placed in the radiator fins or in the top radiator hose.

CODE
DC0444

PREMIUM EWP & FAN SWITCH (0500)

This new Digital Gauge with thermatic fan and electric water pump switch features a high visibility 52mm round gauge with LED digital display for mounting in the cockpit of a car.

This gauge kit can activate single or twin fans or a fan and electric water pump at your own set or targeted temperature when extra cooling is required. This unit can also be used to detect transmission fluid temperature.

The sensor included in the kit senses air temperature as it passes through the radiator when the sensor is placed in the fins of a radiator.

Alternatively, the sensor can be placed directly into the coolant system when used with adaptor kit part number DC0409.

This thermatic fan switch kit is for 12 volt applications.

CODE
DC0444

ONLY
£39.30

EWP80® WATER PUMP (8005)

The original EWP from Davies Craig is made from anti-corrosive, lightweight, glass-filled nylon & incorporates a carbon mechanical face seal for added reliability. The EWP80 improves engine cooling control & capacity while giving you more power & improved fuel economy. The EWP is universal & fits almost all makes of vehicles on the road today. Included in the kit is everything you need to fit it to your vehicle.

DC8040

EWP115® WATER PUMP (8025)

The EWP115 has an improved flow rate of 115 litres per minute and is available with either Nylon or Alloy body. Weighing just 980g (1151g for Alloy body), the EWP115 is ideally suited for large six cylinder & V8 engines and is often used in heavy duty 4WD applications.

CODE	PRICE
DC8025	£143.50
DC8040	£158.60

EWP140® WATER PUMP (8090)

The new EWP140 pump features a powder coated alloy body for improved strength. Similar in dimensions to the EWP80 and with the same fitting options, this 140 litre per minute pump is ideal for when an existing EWP80 needs improving.

* Suitable for all engines up to 400BHP

ONLY
£169.60

CODE
DC8090

EWP115 & EWP150 are also available as 24 Volt versions.

EWP150® WATER PUMP (8060)

The range topping EWP150 features an Alloy body for improved strength. Boasting a flow rate of 150 litre per minute, this model pump is suitable for any application, even in the most demanding conditions often found in off road competition and large engine capacity race cars. When used in conjunction with the LCD pump controller, the EWP150 can give an engine power increase of 10% in some cases.

BLK (Black)

Single layer Neoprene. Bronze coated internal spring helps to maintain shape and prevent kinking. Operating temperature -50 to +200°C. Sold per metre. Max continuous length 4m.

RSL (Red)

Single layer Silicone. Bronze coated internal spring helps to maintain shape and prevent kinking. Operating temperature -70 to +300°C. Sold per metre. Max continuous length 4m.

RD (Red Dual)

Dual layer silicone heavy duty. Bronze coated internal spring helps to maintain shape and prevent kinking. Second silicone layer is laid in the inside. Operating temperature -5 to +200°C. Sold per metre. Max continuous length 4m.

SL (Superlite)

Single layer of specially formulated Neoprene/Polyester. Polyamide internal support coil helps to maintain shape and prevent kinking. Half the weight of standard Neoprene. 0.182KG per metre of 63MM I.D ducting. Operating temperature -50 to +150°C. Sold per metre. Max continuous length 4m.

AD (Aluminium Ducting)

Manufactured from convoluted aluminium. The ducting enables air to be directed to where it is required. The ducting holds its shape once positioned. Comes supplied in pre-cut, 1 metre lengths.

ALUMINIUM AIR OUTLET

Spun aluminium outlet with 15mm wide flange for easy fitting to a back plate.

IDS-2B	120mm x 240mm side air inlet to fit 63 or 76mm I.D hose (Black)	I	£26.75
IDS-2C	120mm x 240mm side air inlet to fit 63 or 76mm I.D hose (Clear)	I	£35.16

HI-FLOW ALUMINIUM AIR INLETS

Designed with specific geometry to maximise air intake velocity. The inlets incorporate a hidden rear mounting flange for neat and secure fitment.

CODE	APPLICATION	PRICE
HFI51	51mm I.D ducting	£22.06
HFI63	63mm I.D ducting	£22.67
HFI76	76mm I.D ducting	£24.27
HFI89	89mm I.D ducting	£27.99
HFI102	102mm I.D ducting	£30.58

DUCTING MOUNTING BRACKET

An engineered solution for securely mounting air ducting without causing damage to the hose. Pressed and shaped in anodised aluminium.

CODE	DESCRIPTION	PRICE
DM51	To fit 51mm I.D ducting	£11.89
DM63	To fit 63mm I.D ducting	£11.89
DM76	To fit 76mm I.D ducting	£11.89
DM89	To fit 89mm I.D ducting	£11.89
DM102	To fit 102mm I.D ducting	£11.89

DUCTING JOINING SLEEVE

Heat shrink sleeves are adhesive lined producing a strong, neat, light and water/vibration proof joint. Shrink rate ratio of 3:1. 90mm sleeve will shrink to 30mm. Supplied in pairs.

CODE	SIZE	PRICE
JS70	70mm I.D x 50mm wide	£7.62
JS90	90mm I.D x 50mm wide	£8.71
JS115	115mm I.D x 50mm wide	£10.64

NACA DUCTS

CODE	DESCRIPTION	PRICE
NACA-9-BK	9" duct black finish	£14.15
NACA-9-CL	9" duct clear finish	£19.85
NACA-12-BK	12" duct black finish	£17.35
NACA-12-CL	12" duct clear finish	£23.05

ONLY
£9.50
EACH

AIR SCOOPS

CODE	DESCRIPTION
Scoop-A	63mm mouth, 108mm length. Clear or Black
Scoop-B	63mm mouth, 140mm length. Clear or Black
Scoop-C	50mm mouth, 197mm length. Clear or Black
Scoop-D	89mm mouth, 140mm length. Clear or Black

ABS PLASTIC BRAKE DUCT

Plastic tapered duct allows the use of 51, 57 and 63mm I.D hose. Duct dimensions 165mm x 80mm with a 25mm wide mounting flange.

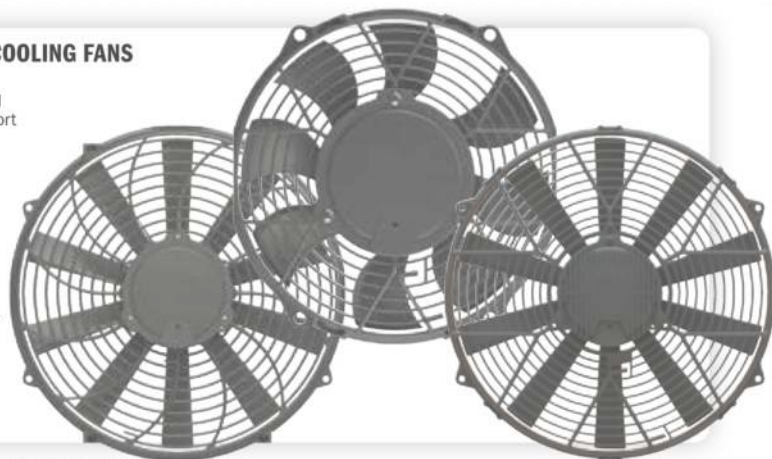

CODE	PRICE
ABS-DUCT	£15.45

COMEX ELECTRIC COOLING FANS

Comex cooling fans are manufactured in Italy and used by leading motorsport teams and OEM's throughout the UK and the world

- OEM Quality
- Sealed ball bearings on all motors
- Waterproof to IP68
- High performance and rated for continuous use
- Fully balanced
- Suction and Blowing options available

SLIMLINE

These fans have the lowest power consumption with the thinnest profile and are suited to replacing engine driven and OEM fitted electric fans.

FAN TYPE	DEPTH (MM)	AIRFLOW (CFM)	CURRENT DRAW (AMPS)	PART NO.	PRICE

SPAX ADJUSTABLE FRONT AND REAR DAMPERS

Spax PSX kits are designed and manufactured to the strictest German TÜV quality standards, using the latest technologies and methods. Each PSX damper is fully Dyno Tested to ensure you get 100% performance, 100% quality, 100% guaranteed. All PSX dampers are Epoxy Powder coated and oven cured for second to none looks and extra-long life.

Spax Adjustable Front Dampers are gas filled. There are numerous damping settings available. The rear units can be adjusted at the top of the unit by turning a special plastic knob altering the ride quality from soft to hard. Numerous distinct click settings allow you set each side the same.

ONLY
£14.18

NYLON 'C' WASHERS SPACER/PACKERS

Plastic 3mm thick spacer washers. Clip round shock absorber stem and pack the bump stop to the correct position. Ideally with springs removed and the car on the floor, the bump stops should support the weight of the car before the chassis grounds.

Packs of 10 to suit stem sizes of 3/4", 1/2", 5/8".

ONLY
£77.12

ADA CAMBER/CASTOR GAUGE

This gauge is quick, easy and very accurate to use. Single person operation allows both camber and castor to be measured on any car.

B-G RACING ALUMINUM CAMBER FRAME WITH DIGITAL DUAL AXIS ANGLE GAUGE

B-G Racing Aluminum camber frame is lightweight and has a durable black powder coated finish. It is supplied with a Dual Axis Angle Gauge which gives quick and simple camber measurement for both left and right-handed users.

Can be used on wheels with a maximum diameter of 20 inches.

A 3-pin adaptor (BGR309) has been designed to convert the BG Racing Camber Frame (BGR307) into a 3-point hands free measuring device.

This adaptor allows the user to take accurate castor measurements.

Also available is a padded protective carry bag which incorporates a foam insert that will securely locate the Camber Frame, Dual Axis Gauge and associated components, ensuring safe storage and transportation.

PROTECH UNIVERSAL SHOCKS

Protech Shocks design and manufacture their shock absorbers here in the U.K. The range of Universal Coil overs are available in Single or Double adjustable versions. Used extensively throughout the full spectrum of motorsport from hill climbs, sprints, circuit racing to specialist kit car applications. Open lengths are measured from centre to centre, top to bottom eyelet.

Features include;

- Suitable for either 1.9" or 2.25" ID springs
- Single adjustable damping rate and double with independent bump and rebound.
- Spherical bearing or poly bush mounts
- Multiple mounting eye dimensions (1/2" I.D stocked)
- Stem top mounting option
- Manufactured from 6262 spec aluminium

FROM
£108.89

ITEM	PRICE
400S coil over bonded bush (1/2" I.D) for 1.9" spring, Aluminium body 1.75". Single Adjust	£108.89

ROD ENDS

AURORA UNF MALE ROD ENDS

Renowned for the design and manufacture of some of the highest quality rod end bearings at a competitive price. We stock the Aurora AM, AB, XAM and XAB range of high strength precision alloy rod ends. Featuring an alloy steel body which is heat treated and protective coated for corrosion resistance and an alloy steel ball which has been heat treated and hard chrome plated.

The race is low carbon steel which is manufactured with a protective coating and a super hard wearing PTFE liner.

Zircoflex

ZIRCOFLEX® CERAMIC HEAT SHIELD

Zircoflex™ is a revolutionary flexible ceramic heat shield material, offering superb thermal barrier performance at minimal weight and minimal thickness.

It is produced as thin aluminium backed foil with the following features:

- **Flexible** - Zircoflex™ is easily bent and manipulated to suit different geometries. It can even be folded tightly through 180° without damaging the thermal barrier.
- **Lightweight** - Zircoflex™ weighs only 460g/m²
- **Extremely thin** - needing only minimal space for installation
- **Aluminium backed** - making the material robust and ease to handle
- **Easily cut and installed** - by hand or machine
- **Superb thermal barrier** - a single sheet reduces surface temperature by up to 64% (500° heat source)
- **Three thicknesses options** - this can increase surface temperature reduction by up to 85%
- **Self Adhesive** - Available throughout the range
- **Easily fixed in place** - using mechanical fasteners or high temperature adhesives
- **Easily stored** - Zircoflex™ foil is supplied in the form of a roll

ATTACHMENT KIT

High-Temperature double sided adhesive tape (3m) attachment kit and includes surface pre-cleaner.

ONLY
£12.00

THERMO-TEC ADHESIVE BACKED HEAT SHIELD MATERIAL

Designed to protect parts and components from radiant heat. Made up of woven silica with a flexible, aluminised finish. Material is capable of withstanding radiant temperatures of up to 1093°C. The adhesive side can cope with direct and continuous temperatures up to 150°C.

CODE	SIZE	PRICE
13500	300 x 300mm	£16.35
13575	300 x 610mm	£30.10

Zircoflex FORM

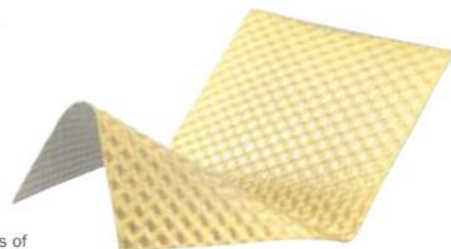

FROM
£138.90

ZIRCOFLEX® FORM

This is a more structural material than Zircoflex®, with an embossed stainless steel core sandwiched between two layers of ceramic thermal barrier material.

It is now possible to create structural heatshields as it can be easily bent or formed, without the ceramic coating cracking.

- Tested to 900°C (hot side temperature)
- Product Thickness - 1.6mm (+/- 0.2mm)
- Product Weight - 2.9kg/m²

CODE	SIZE	PRICE

REDBACK FIA APPROVED CATALYTIC CONVERTER

This stainless steel FIA Approved Catalytic Converter is specifically designed and built for race/rally car applications. It features an O2 boss and ultra-high flow 100cps metallic matrix with tapered end cones to fit 63mm (2 1/2") tubes. These cones can be cut to fit 76mm (3") pipe if required.

Application: Engines up to 4 Litres, 350bhp single exhaust or 600bhp twin exhaust system.

Dimensions: 290mm long (including cones) x 104mm OD. End cone 63mm ID.

ONLY
£133.29

NORMA STAINLESS STEEL EXHAUST MOUNTING CLAMPS

Norma stainless steel exhaust mounting clamps. Used in place of the standard U bolt clamp. These wide stainless steel bands with mild steel screw clamps make a strong and attractive alternative to the normal U bolt.

SILENCER WADDING

ONLY
£74.50

BASALT HIGH TEMP (15KG) (BROWN)

Used as a silencer packing material in applications where 'E' Glass is not suitable due to higher temperatures. Wire wool may be needed to reduce the amount lost through the perforated tube.

ONLY
£17.25

E' GLASS (SQ. METRE) (WHITE)

Used in Merlin Silencers. Supplied in a metre by metre sheet.

One sheet will do a 15" Merlin Silencer and two sheets will be required for the bigger silencers.

ONLY
£35.45

STAINLESS STEEL WIRE WOOL (1KG)

Used to wrap the perforated tube in a repackable silencer.

Essential when using Basalt as the main packing material.

MERLIN MILD STEEL MUFFLERS

These are additional mufflers that fit on the end of an exhaust system to help a vehicle meet the noise limits for a track day. The amount of noise reduction cannot be estimated; all cars are different but we have seen reductions of up to 9dB but in some cases there is no effect. The end cap is secured with 4 spot welds and can be removed for repacking. 4 inch dia 8 inch long.

ONLY
£64.50

Available in 10 sizes: 1 1/8", 2", 2 1/4", 2 1/2", 2 3/8", 2 1/2", 2 3/8", 2 3/4", 2 7/8", 3" OD.

MERLIN REPACKABLE RACING SILENCERS

Silencers designed for competition use where there is a need to meet noise limits. As silencers degrade with use the end caps can be removed to allow repacking. Outer 6" dia stainless steel case available in four lengths and mild steel end caps in three sizes: 2 1/8", 2 3/8" or 2 1/2" OD. Not suitable for road use.

SIZE	PRICE
15 inch long	£205.00
18 inch long	£225.00
21 inch long	£245.00
24 inch long	£265.00

TRANSMISSION FLUID

RED LINE DCTF DUAL CLUTCH FLUID

Designed to provide extreme protection in most wet and dry style dual clutch transmissions.

DCTF has been blended with ester base stocks for improved shear stability, extended drain intervals and more consistent viscosity in varying temperatures.

- Popular for VW/Audi, BMW, Porsche, PDK and Ferrari applications

CODE	VOLUME
31004	946ml

ONLY
£24.50

POWER STEERING FLUID

RED LINE POWER STEERING FLUID

Ideal for motorsport application where optimum performance is required.

This lightweight fluid avoids power losses and has a 50% greater high-temp viscosity. This greater thermal resistance helps to prevent boil-over, can help to prevent high-temp steering fade and excessive effort at lower temperature.

CODE	VOLUME
30409	946ml

State of the art formulations from Millers Oils providing high performance lubricants developed and proven in Motorsport, track day and fast road use.

MILLERS CLASSIC OILS

CLASSIC 20W50 MINERAL

A performance mineral oil for classic petrol and diesel engines of primarily pre 1980 vehicles. The modern technology ensures an oil which will meet period performance requirements along with up-to-date specifications.

CLASSIC SPORT 20W60 SEMI SYNTHETIC

High quality engine oil formulated for discerning owners of primarily pre-1980 high performance classic engines. The synthetic content provides superior cold flow characteristics, higher resistance to oxidation, higher film strength and a higher temperature capability when compared to mineral oils.

ITEM	VOLUME	PRICE
Classic Sport Mineral Oil	5 Ltr	£33.85
Classic Sport 20W60 Semi Synthetic	5 Ltr	£34.91

CLASSIC HIGH PERFORMANCE 20W50 WITH NANODRIVE

A fully synthetic high performance oil featuring Millers Nano Technology ultra low friction formulation. Intended for use in classic high performance vehicles where high performance is needed on a regular basis.

CLASSIC MINI 20W50 MINERAL

For engines from 1960 onwards where engine and gearbox share the same oil. Ideal for classic Minis and bikes where the clutch runs in engine oil. The additive package ball, roller and needle bearings found in the gearbox and provides extreme pressure (EP) protection levels higher than conventional oil equal to API GL4 for gearboxes.

ITEM	VOLUME	PRICE
High Performance 20W50	5 Ltr	£39.99
Classic Mini 20W50 Mini	5 Ltr	£32.31

MILLERS MOTORSPORT OILS

NOW WITH **NANODRIVE** TECHNOLOGY!

5W40 CFS FULLY SYNTHETIC

Triple ester formulation ideally suited for fast road, race, rally, sprints and hill climbs. Ideal for engines with hydraulic tappets such as Ford Zetec.

10W40 CFS FULLY SYNTHETIC

Used in smaller capacity race and rally engines and turbocharged engines for fast road and trackdays.

10W50 CFS FULLY SYNTHETIC

For race and rally engines and especially suited to modified, high performance vehicles with or without turbochargers, for fast road and trackday use.

10W60 CFS FULLY SYNTHETIC

For larger race and rally engines with or without turbochargers, especially where subject to severe and high stress conditions.

ITEM	VOLUME	PRICE
CFS 5W40	5 Litres	£44.38
CFS 10W40	5 Litres	£45.86
CFS 10W50	5 Litres	£46.28
CFS 10W60	5 Litres	£44.64

15W60 CFS FULLY SYNTHETIC

A slightly heavier base viscosity to provide maximum protection in high ambient temperatures and highly stressed applications. Ideal for turbo charged engines and the extremes of endurance racing and rallying.

20W60 CSS SEMI SYNTHETIC

High viscosity oil specially designed to protect competition engines running at very high temperatures and/or endurance events. Ideal for older competition engines such as Aston Martin, Jaguar, Triumph and Austin Healey. Also used in Historic Formula Ford and American V8's.

20W50 COR

A competition synthetic fortified mineral oil which provides an excellent performance to value ratio. Formulated primarily for short circuit racing.

ITEM	VOLUME	PRICE
CFS 15W60	5 Litres	£44.38
CTV 20W50	5 Litres	£42.65
CSS 20W60	5 Litres	£41.35

NANODRIVE

NANODRIVE NT+ ENGINE OILS

The new flagship NANODRIVE NT+ portfolio, completely redefines the performance criteria usually associated with a motorsport oil. Our deep rooted knowledge of developing bespoke blends to deliver ever improving levels of friction reduction within an engine has manifested itself in a range of products that seamlessly provide immediately discernible increased levels of power and torque as well as notable increases in efficiency in an engines performance. All Millers Nanodrive engine oils are fully synthetic and are available in six different grades.

Available in:

- CFS 0W20NT
- CFS 0W30NT
- CFS 5W40NT
- CFS 10W50NT
- CFS 10W60NT

EXTRA COOL COOLANT ADDITIVE

Prevents coolant overheating and also increase flow around the cooling system. Also contains anti-corrosion additives and can be mixed with any antifreeze. Reduces temperatures by up to 15°C. One 250ml bottle will treat 10 litres of water.

ONLY **£11.94**

ALPINE RED ANTIFREEZE

Ethylene glycol based antifreeze and coolant mix with OAT. Offers increased corrosion protection. Use to -37°C when used as a 50% mix with water, or down to -20°C when in a 33% mix. 1 litre.

ONLY **£5.53**

DELTAPEX 2EP GREASE

High performance extreme pressure grease for general applications. Low friction, high protection, ideal for wheel bearings and other general uses.

ONLY **£8.80**

HI-MOL 20 COMPETITION CV GREASE

Specialised competition grease based on lithium soap and 20% molybdenum disulphide. Suited for CV joints and eliminates sliding spline binding under high acceleration loads. 500 gram tub.

ONLY **£18.32**

CVL VALVE LUBRICANT

Formulated to comply with FIA fuel regulations. Lubricates valve seats and typically adds 3 octane to base fuels. 250ml bottle treats 20 litres of fuel.

ITEM	VOLUME	PRICE
CVL	250ml	£8.82
CVL Turbo	500ml	£12.39

CVL TURBO OCTANE IMPROVER

Can add up to 4 octane to base fuels. 500ml bottle treats 20 litres of fuel.

Adds up to 4 octane to base fuels

300+ BRAKE FLUID

Extremely high dry boiling point, at least 310°C, with exceptional resistance to vapour locking and good compressibility for improved brake feel.

ONLY **£13.29**

320+ RACING BRAKE FLUID

Millers 320 Plus Brake Fluid has an Equilibrium Reflux Boiling Point boiling point of above 320°C in comparison to the 230°C required for standard DOT 4 fluids. Has 195°C Wet Equilibrium Boiling Point.

ONLY **£18.99**

RACETECH MIRRORS

RACETECH

RACETECH SINGLE SEATER

Single bolt through stalk with a lockable swivel mounting. Available in black or white, RH or LH with flat or convex lens.

Stem length: 45mm

ITG BLACK FRAMED MEGAFLOW AIR FILTERS

ITG's famous Megaflow foam air filters are easily recognisable by the Red twin bands around the top and bottom. They are now available in Black.

These bands are the visible part of two fibre-reinforced nylon injection mouldings which form the structure on to which ITG's unique TriFoam air filter material is bonded.

The two outer layers of foam provide optimum filtration and load-up capacity whilst the inner layer is made from special self-extinguishing foam. These two layers combined give the very best air flow, engine protection and safety.

Black framed filters are the preferred choice of many historic competitors and engine builders.

See Page 51 and www.merlinmotorsport.co.uk for full range.

FIRE EXTINGUISHER SERVICING REMINDER

Back in 2022, Lifeline introduced their new fire extinguisher series ZERO2020. The first release of systems are set for servicing in 2024, along with any other Lifeline extinguishers manufactured in 2022. We kindly ask you to take a moment to check the expiration dates on your Lifeline extinguishers & send them over to us if they are due a service. Our average turn around is 2-3 working days. Full service pricing can be found on page 16. Alternatively, you can check our website or call us for more information.
