

JUST ADD PLANTS

LIFE · STYLE · PLANTERS

CATALOGUE 2020-22

# DIRECTOR'S MESSAGE

It's been two years in the planning and now our exciting new look has been revealed. Welcome to the refreshingly new Just Add Plants, the home of the lifestyle planter. Behind our new brand mark is a quality range of classic and contemporary plant containers to suit many themed styles and situations in the home or commercial environment. Our new direction will see us explore many new industries and sectors and open our new product offerings to the world.

Our product research and feedback from our passionate clients, has guided us to refine our current ranges and design and develop new collections of inspiring handcrafted lifestyle planters of all shapes and sizes for interior and exterior use. Manufactured for strong marine grade Fibreglass, this versatile, durable and long lasting product can be used again and again, lessening its environment carbon footprint compared to many other plant container materials on the market.

A quality product is only as good as the team behind it. Our experienced, professional and dedicated team at Just Add Plants continues to transform and build the business every minute of every day. Importantly, we always ensure our clients have a total understanding of the unique features of our lifestyle planters and how our products work. Along with our quality guarantee we ensure our clients are always satisfied with their purchase every time they shop with us.

In conjunction with our vast number of additions to our ranges we have concentrated on more consistent levels of stock holdings and improved logistics

in product delivery. We have greatly increased warehouse space, to continue our strong belief in supplying product when needed and not having to wait. Our expansion interstate has also seen the establishment of new distribution locations along the east coast of Australia, making it even easier for product pickup or delivery.

With our successful brand relaunch, strategic new direction and abundant new ranges of exterior and interior lifestyle planters on offer, we are eager to create new business relationships and continue strengthening and supporting our existing client base. As we travel through this exciting new chapter of Just Add Plants, we invite you to join us. We look forward in assisting you find the right lifestyle planter for your space.

**Greg Minotti**  
Director  
Just Add Plants

# ABOUT US

Here at Just Add Plants, we are passionate about designing plant containers to suit Australian spaces, both indoors and out. We carefully design our lifestyle planters with their purpose in mind. Each planter creation travels the Just Add Plants journey from design, through rigorous product testing to manufacture, and ultimately into the arms of our passionate clients. Our job is to help you find the right lifestyle planter for your space. That's our promise!

From humble beginnings in 2008, Just Add Plants was born with an innovative modular and fibreglass planter range, predominately servicing the indoor plant hire industry throughout Australia.

Warehousing and distributing from a small shed located in Brisbane's North, the business continued to grow, building relationships with clients along the way and establishing itself as a trusted, reliable brand in the plant container supply sector.

As like then, we importantly continue to offer real choice in the marketplace, and assist our customers with all their plant container needs and ensure they have a total understanding of their unique features and how they work. Our lifestyle planters, each beautifully handcrafted, are not only a work of art, but functionally advanced, with the ability to be fully self-watering where required.

**"Our dedicated and devoted team are committed to ensuring you select the right lifestyle planter for your space."**

*Meet our team: Greg Minotti (Director) and Quentin Andrews (Warehouse Manager)*

After refining and expanding the existing planter range the business relocated to a larger warehouse facility in Brendale, North Brisbane which enabled improved stock holding capacity and more ease of distribution. Growth continued, as new client relationships were forged and new inclusions into the plant container range were added, including the versatile and innovative Versi-Wall green wall system, ideally suited to both exterior and interior use.

In 2018 we initiated the beginning of a bold new direction for the business, by broadening our base and integrating 100% more planters to our overall range, in turn offering more variety and choice to new industries and sectors in the market. After researching the marketplace and liaising with our clients, we meticulously designed, quality tested and approved production of a number of new lifestyle planter collections with our reliable manufacturers throughout Asia.

The new business direction also required the relocation to larger warehouse facilities. Based in Geebung, Brisbane, our Just Add Plants head quarters covers over 800 square metres and is centrally positioned to main road infrastructure and transport hubs.

Our full range of lifestyle planters now encapsulates a diverse selection of contemporary edge exterior and interior planters, colourful mini-planters, elegant hanging planters and charming timber plant stands, all with their own distinctive textures and finishes.

With a number of exciting new release planters still to arrive, the abundance of lifestyle planters is truly amazing. Our full suite of products, including our modular Green Wall system and extent of related accessories now has Just Add Plants positioned for continued growth throughout the new decade, and offering our clients a world of choice in the home, retail and commercial markets.

# WHY CHOOSE FIBREGLASS PLANTERS?

Fibreglass is a widely regarded product, used throughout many industries because of its advantages over rival products such as wood, steel, plastic and aluminium. It is almost inevitable that you have come into contact with Fibreglass in some product form in your daily life. It has a number of applications because of its durability, whilst also being less-energy intensive in development.

Fibreglass, also known as glass fibre reinforced plastic, is made of molten glass material passed through a series of fine holes. During the manufacturing process, various types of resins are added to the glass fibre after it has been woven together to provide more strength. Additionally, the resins are also used to facilitate the moulding of fibreglass into various shapes. Fibreglass is used widely to manufacture building materials, swimming pools, tanks, automotive equipment, boats and plant containers.

### STRONG AND DURABLE CONSTRUCTION

Fibreglass plant containers are manufactured using a shaped mould, which is lined with fibreglass sheeting. Resin liquid is applied to bind fibreglass together and create the outer surface of the planter. Multiple layers of fibreglass are used to create the main structure of the planter and provide strength.

There are a number of major advantages when choosing fibreglass plant containers over those made of other materials. These include:

- they are lightweight (in comparison to timber, metal or concrete planters) making them manoeuvrable and easy to re-position
- their durable fibreglass construction makes them strong and able to withstand wear in high traffic areas (especially in comparison to other products, i.e. plastic)
- they are easy to clean (just wipe with a damp cloth)
- they can be used widely in many indoor or outdoor situations
- they are versatile and can be made in any shape, colour, texture or finish
- they do not rust, are resistant to salt air and most chemicals (including most acids) and do not rot like timber

### ENVIRONMENTALLY FRIENDLY

Fibreglass planters also have a reduced carbon footprint on the environment, because of their long-lasting use. Damaged fibreglass planters can easily be repaired and re-sprayed at a lower cost than other planters made from wood, aluminium or plastic, meaning they can be used over and over again. When selecting your next plant container for an indoor or outdoor situation, make the right choice and purchase a lightweight, durable Fibreglass planter for long-lasting satisfaction.

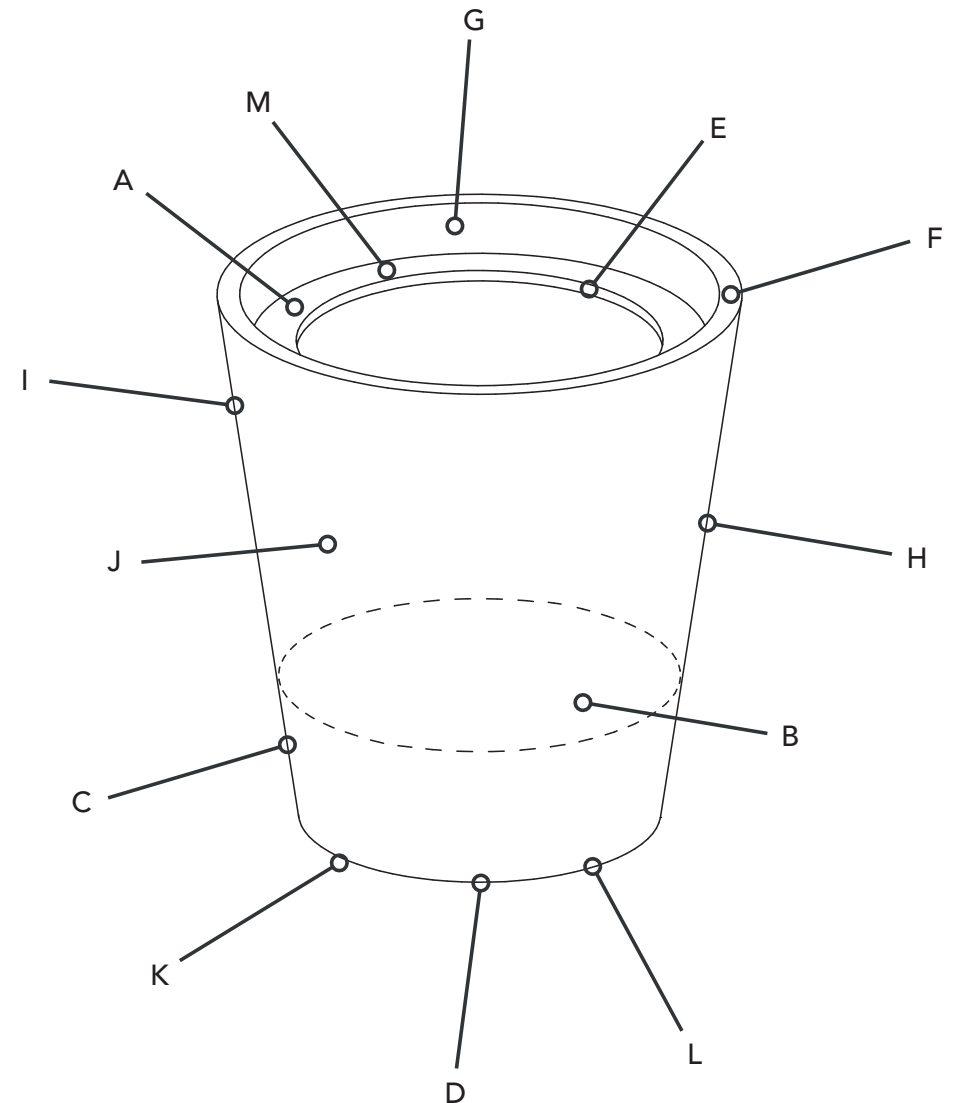

# FEATURES OF OUR LIFESTYLE PLANTERS

Our lifestyle planters are uniquely designed like no other plant container on the market.

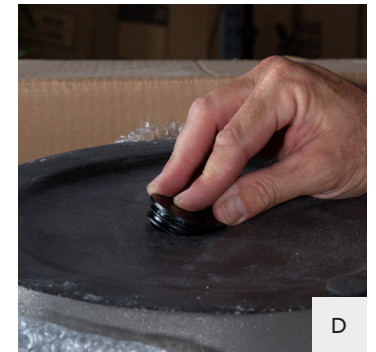

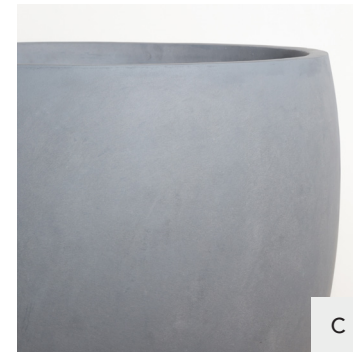

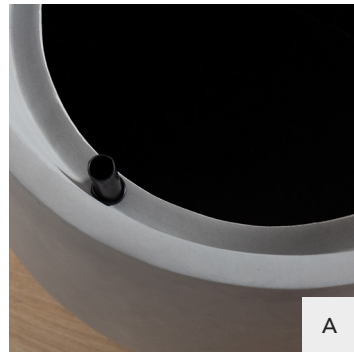

Our products are categorised into two main groups – enclosed/self-watering and open planters. Each type has a range of innovative and distinctive features that are not only functional, but part of the refined beauty of each handcrafted lifestyle planter produced.

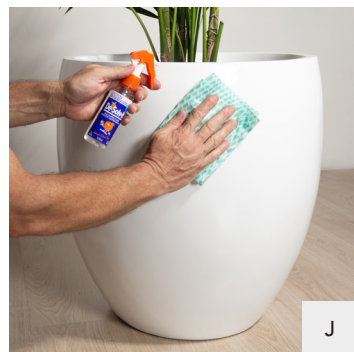

- A Inspection hole and riser tube for ease of checking water levels in planter water reservoir (self-watering planters only)
- B Water reservoir (self-watering planters only)
- C Marine-Grade Fibreglass or Fibrestone material
- D Stability hole and plug (selected self-watering planters only)
- E Internal lip for plant grow pot support (self-watering planters only)
- F Planter Rim
- G Rim to Internal Lip depth for adequate use of dressing (self-watering planters only)
- H Flowcoat waterproof membrane (planter interior)
- I UV protective paint finish (outdoor painted planters only)
- J Easy clean exterior surface
- K Foam feet for non-scratch protection
- L Ease of installation of drainage holes (open planters only)
- M Metal Reducer Ring (accessory) allows smaller grow plant pots to be used where needed

PLEASE NOTE: Most images shown on this page depict our interior 'enclosed/self-watering' lifestyle planters. Exterior 'open' lifestyle planters do not contain a water reservoir or internal lip for self-watering ability. All exterior use lifestyle planters are conveniently available with no drainage holes, allowing the purchaser to install holes where required to the base of the planter if required.

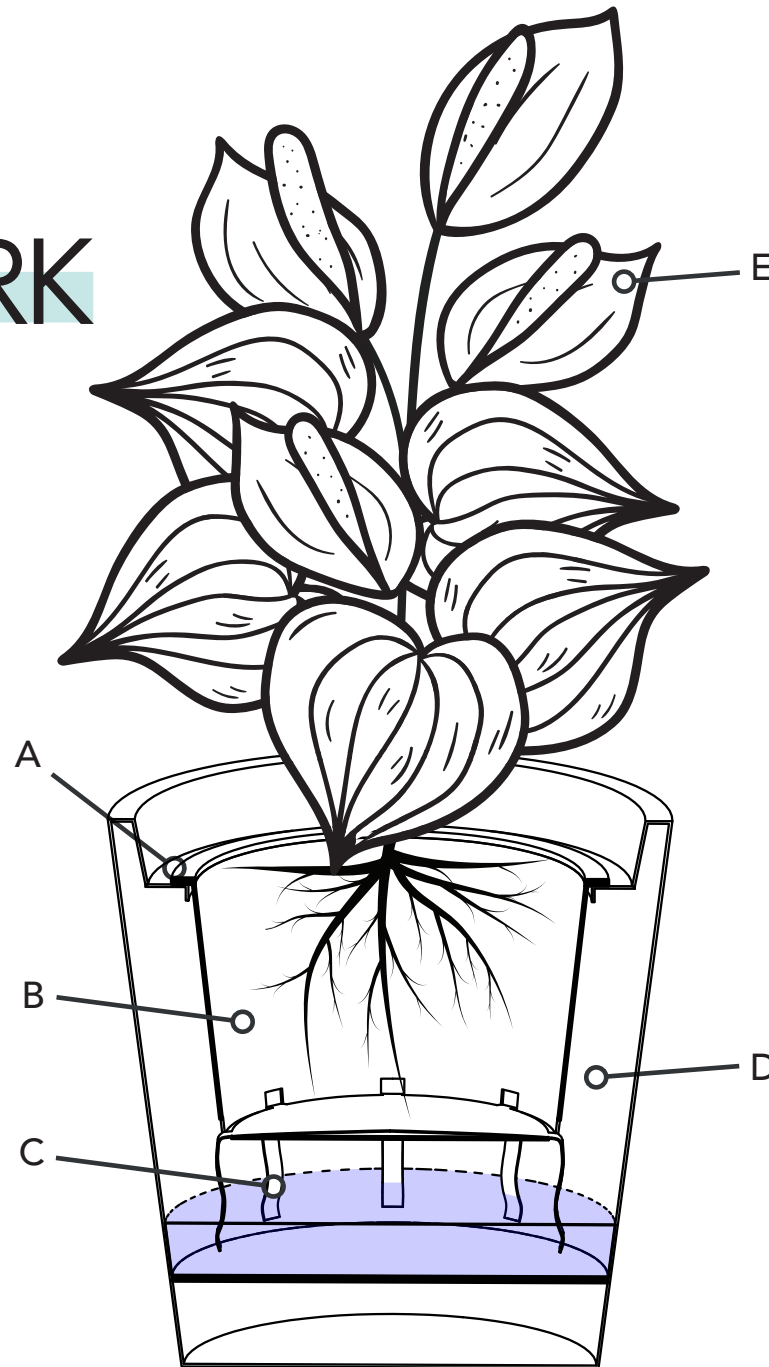

# HOW OUR PLANTERS WORK

Bringing lush green foliage and flowers from the outdoors into the home or office is always pleasing to the eye and harmonious to the soul. But to keep your plants adequately watered can be difficult. Our indoor lifestyle planter ranges are creatively designed with self-watering in mind, uniquely using the capillary watering method.

## PLEASE NOTE

For capillary watering to work effectively the distance between the water level in the water reservoir and base of the plant grow pot should be no greater than 30-40mm.

- A Inbuilt internal lip for plant grow pot to be suspended, allowing it not to be submerged within the water reservoir
- B Plant grow pot with drainage holes\*
- C Wicking cloth material placed inside the base of the plant grow pot, with strips of the material being placed through the drainage holes with enough length to be submerged into the water\*
- D Water Reservoir
- E Plant with established root system with the ability to absorb water from planter water reservoir using the capillary watering method\*

Grey Stone finish

# COLOURS & FINISHES

The inspired lines, the refined shape and the sheer beauty of our lifestyle planters is only matched by the use of colour and texture to complete the masterpiece.

We offer a range of neutral colours throughout our ranges, as well as living pastels and earthy naturals in our Mini Planters. Textured Concrete finish, White and Black Stone, Grey Stone and Retro finishes are also available in selected planters throughout our overall collection.

*Despite every effort to provide accurate imagery of product colours, actual colours and finishes may vary slightly, due to different print mediums, devices and screen settings. Therefore, we cannot guarantee that the colour you see accurately portrays the true product colour.*

Where special projects arise and specific colours are required, we can colour match and get your job sorted.

Partnered with our local professional and reliable painting company we can assist you with all your custom plant container painting needs.

# MINI PLANTERS

From creative product design with the versatile use of durable Fibreglass, our range of miniature lifestyle planters was born.

Taking selected shapes from our popular Brisbane Collection and reproducing them in a smaller form has provided a fresh new addition to our comprehensive range. Setting these Mini Planter cover pots apart from others is their broad range of on-trend pastel, natural and living colours, bringing any room or surrounding to life.

# ECO PEBBLES

THE SMART ALTERNATIVE

Adding the finishing touches to any planter has now changed forever with the introduction of a new alternative to soil surface dressing. Eco-Pebbles are not only beautiful, safe to use, hypoallergenic but importantly lightweight to handle, meaning easy on your back. They are also environmentally friendly, as they are made from reclaimed plastic destined for landfill. Available in four popular colours, white, black, sandstone and grey.

# URBAN COLLECTION

The design brief: to create a planter range that would display a contemporary edge, offer self-watering ability, ideally used in repetition or on mass if required, and was competitive within the marketplace.

Uniquely this planter collection ticks all the boxes on style, form, functionality and cost. Available in eight different planter shapes and sizes, in both matte and high gloss paint finishes, as well as our textured Concrete finish, the Urban Collection is on-trend, and remarkably versatile in most indoor office or home situations.

# A GREENER OPTION FOR YOUR WORKSPACE

[justaddplants.com](http://justaddplants.com)

We have taken one of our most popular planter troughs and redesigned it to produce a new workspace plant container alternative. The innovative Auchenflower 24 'Extra Wide' trough planter has been created to work in conjunction with a standard workspace Tambour Unit storage cabinet (900 x 500mm). Lightweight, durable and easy to install, complete with self-watering capacity, this is the new game changer to a greener workspace environment.

# HANGING TRENDS

OUR EXTENSIVE CORINDA  
HANGING PLANTER RANGE  
OFFERS VARIOUS ELEGANT  
SHAPES AND SIZES, ALL WITH  
SELF WATERING CAPACITY.

Plant containers continue to change as trends and demand define the marketplace. Current trends have us looking up the walls and from the ceiling as green walls and hanging planters increase in popularity.

Our unique hanging planter range is available in gloss and matte paint finishes, as well as our celebrated textured Concrete finish.

# PRECINCT COLLECTION

The beautiful use of timber in any home or office décor provides a total sense of nature and pure harmony.

By introducing this material with soft lush green colours in the way of plant foliage completes the picture and creates the perfect working or lifestyle environment. Our Precinct Planter Stands have been developed with this in mind. Our gorgeous stands made from natural Pine timber marry with a range of contemporary cone shaped planters in a range of fashionable colours and textured finishes, providing a different dimension to any surrounding.

# ON THE MOVE

Ease of manoeuvrability for any large plant container has always been a challenge when moving from A to B. We have recently redesigned a number of our unique Auchenflower trough planters to provide ease of re-positioning and moving through the addition of a wheeled platform attached to the recessed base of the planter. Our unique planter dolleys are available in a range of sizes to fit our popular Auchenflower 60S, 60L and new Auchenflower 50 & 80 planter troughs.

# TOP OF THE TABLE

Complementing our extensive collection floor standing planters, our table or desk top planters are the ideal addition to any setting. Available in most range shapes, these smaller planters can be positioned singularly or in patterned repetition on shelving, cabinets, office desks or tables. Available in our range of high gloss and matte paint colours, as well as our celebrated textured Concrete finish. Our large range of table/desk top planters are an essential addition to any office or home situation.

# SYDNEYSIDER COLLECTION

Set amongst one of the world's most stunning harbours, Sydney celebrates our rich colonial heritage through to the emergence of a modern, vibrant hub for both lifestyle and business, and is the icon of Australia's heart.

Taking both its classical styles and contemporary trends, we have created a distinctive collection of outdoor lifestyle planters, putting some of the Sydney's finest suburb names to our planters. All designed to brave the harsh Australian climate. From the big and bold, where size does matter to varied shapes and sizes for smaller outdoor rooms, this collection of open lifestyle planters expresses a fresh new influence to modern planter design, look and functionality.

THIS YEAR WE BREAK  
THE MOULD AND ADD  
A DRAMATIC DIMENSION IN  
STYLING TO THE ADMIRER  
WILSTON RANGE.

# LIVING ON THE EDGE

Many have embraced the use of our sleek, versatile Wilston cylinder planters in an array of varied indoor situations. By evolving a unique angled pattern finish to the exterior surface, we have developed a bold statement addition, the amazing Wilston 'Edge' lifestyle planter range. Available in textured Concrete finish, Matte Black and Matte White paint colours.

The Green Wall is a low-maintenance modular vertical greening system with a choice of mounting, planting density and growth media options to suit a variety of wall conditions.

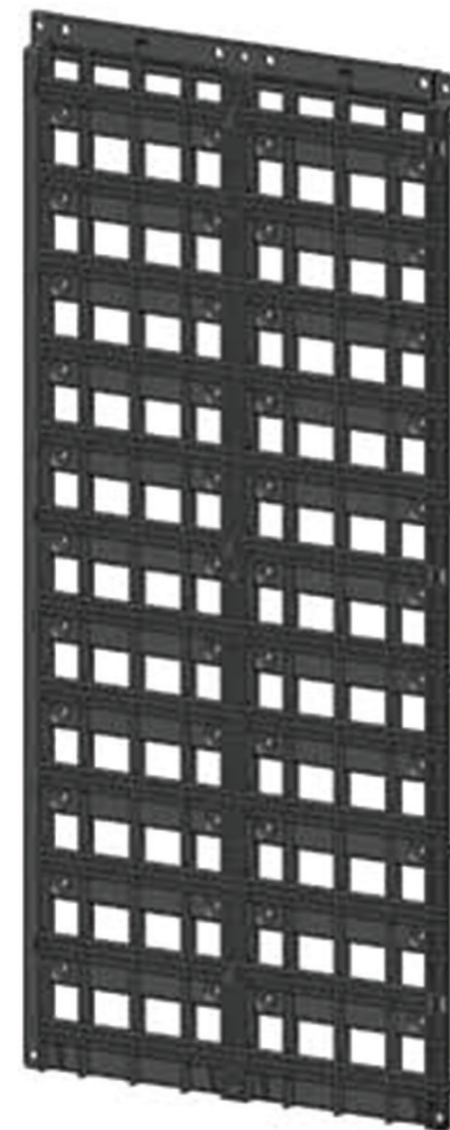

The use of mounting frames minimises wall penetrations and enables installation to be carried out easily and safely by just one person.

Green Wall pots can be individually replaced or removed for wall maintenance or design change. Each pot has a water reservoir with a cover designed for the provision of a capillary wick to re-use stored water and facilitate sustained plant growth.

Both the pots and mounting panels are manufactured from UV-stabilised recycled polypropylene that meets requirements for "Green Building" certification.

# FINISHED IN FIBRESTONE

Along with our quality, marine-grade fibreglass planter products we have included the natural finish of Fibrestone to our range. Fibrestone, where cement stone dust is added to the epoxy resin then applied to the fibreglass sheets, creates a slightly textured, but smooth surface to the planter wall. Available in black, white and concrete colours in selected planter ranges in our Mini-Planter and Sydneysider Collections.

# MODERN BEAUTY GREYSTONE

LIKE NOTHING IN OUR  
EXISTING COLLECTION, THE  
'GREY STONE' TEXTURED  
FINISH OFFERS A NEW  
LEVEL OF HANDCRAFTED  
REFINEMENT AND QUALITY  
TO THE MODERN PLANTER.

At Just Add Plants we always endeavour to embrace innovative and unique concepts and ideas to provide new possibilities, new opportunities and new vision into the marketplace. We are proud to announce the release of our exclusive new textured finish range of planters. Its rich natural colour tone combined with a distinctive bold texture sets this strong, striking finish apart from all others. Available in our Brisbane 'Signature Series' and Melbourne Collections.

# CLEAN UP

We use and recommend De-Solv-It, a multi-purpose cleaning product which uses a natural orange base for its powerful cleaning capabilities. It is suitable for both Fibreglass painted and Fibrestone porous surfaces.

De-Solv-it is bio-degradable, non-ozone depleting product, which is provided within recycled packaging.

Just Add Plants is a stockist of De-Solv-It cleaning products.

LIFE · STYLE · PLANTERS

[justaddplants.com](http://justaddplants.com)

IT'S IMPORTANT TO KEEP  
YOUR PLANTERS LOOKING  
THEIR BEST, THEREFORE  
USING THE RIGHT CLEANING  
PRODUCT IS ESSENTIAL.

# MAINTENANCE & CARE

Once you have purchased your new lifestyle planter, it's important to keep it looking its best all year round. Our quality, long lasting planters are made from strong and durable marine grade fibreglass, that will perform for many years. This Maintenance & Care information will provide you with helpful tips to increase your lifestyle planter's longevity and stunning appearance for years to come.

## INDOOR PLANTERS

As many of our indoor planters have incorporated a self-watering capability, you have the option to use this approach or just use as a type of 'cover' planter. Used as a 'cover' planter you would need to remove the plant from the planter (usually on a weekly or fortnightly basis depending on the particular plants water requirements) and water outside in a sheltered position out of direct sunlight, to allow to drain. Then return it to the planter. If using the self-watering method always check water levels in the water reservoir to ensure it is not filled too high submerging the grow plant pot. This will cause the plant to deteriorate and rot, usually causing death.

Regularly wipe the exterior surfaces of your planter with a clean non-abrasive cloth and warm soapy water.

Where oil or stains may appear (especially matt or textured surfaces), apply a multi-purpose cleaning product like De-Solv-It Citrus Spray. Use as directed.

## OUTDOOR PLANTERS

Always use a good quality lightweight potting media and never garden soil when planting directly into planters. Heavy soil mixtures can possibly cause bowing and cracking, and also create compaction, limiting vital air and water to be available to the plants runoff.

Ensure all outdoor planters have adequate drainage. Drainage holes can be easily drilled into the base or lower sides of the Fibreglass planters to provide water runoff.

Regularly wipe the exterior surfaces of your planter with a clean non-abrasive cloth and warm soapy water.

Where oil or stains may appear (especially matt or textured surfaces), apply a multi-purpose cleaning product like De-Solv-It Citrus Spray. Use as directed.

# BECOME A STOCKIST

If you love our products as much as we do, and can see they would add value to your established bricks and mortar or online store offerings, we invite you to complete our "Stockist Application" form online.

Once approved, you will gain access to our wholesale web platform, where you can order 24/7.

If you are a startup business without a live website, in addition to the Stockist Application form, you'll need to provide us with a little more information, so we can see if we're a good fit for each other.

Visit [www.justaddplants.com/become-a-stockist](http://www.justaddplants.com/become-a-stockist) for more information.

*Please note: Application approval is not guaranteed. If you are looking into a new business venture and do not have a website or a physical store, unfortunately we cannot approve your account. Please pop back when you are in the startup phase.*

## WE ARE PROUDLY ASSOCIATED WITH

# QUALITY GUARANTEE

We are passionate about our company and all the products we create.

Importantly, if one of our products does not meet your high quality standard or requirement, we will gladly assist you in selecting a more suitable item or provide you with a full refund.

Our aim is to offer you the right quality product for the right application every time!

## **Our 2 Year Product Warranty**

Guava (Aust.) Pty. Ltd. trading as Just Add Plants warrants the purchaser that their products are of good material and workmanship and free of manufacturing and factory defects, provided recommended clean and maintenance are performed.

The warranty period of two (2) years applies to all products from the original date of purchase. For more information on how to clean and maintain our products please see our website or the Maintenance & Care page in this catalogue.

All information provided by Just Add Plants in regard to the specific planters exclusive location use, either interior or exterior, is to be followed at all times. Planters strictly specified for interior

use, mainly because of their self-watering capacity are not to be used outside, as the planter has been manufactured with no drainage capacity.

The warranties set forth above do not apply to products modified, altered, or repaired by unauthorised persons, or to products damaged during shipment or installation, or by accident, alteration, abuse, tampering misuse, and misapplication, negligence by others, improper repair or maintenance, fire and/or other casualty. These warranties do not apply to defects in components not manufactured by Just Add Plants.

It is a condition of this warranty that should your covered product show defects at any point, Purchaser/Property owner will notify Just Add Plants in writing within 30 days after discovering the claimed defect and prior to beginning any repair or alteration to Just Add Plants. The notice must include a detailed description of the claimed defect, photograph(s) of the defect and proof of purchase.

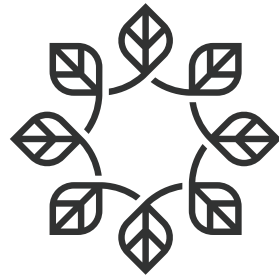

It is a further condition of this Warranty that Just Add Plants will, within a reasonable period of its receipt of such notice, be permitted to inspect the claimed defect. If, after inspection, Just Add Plants determines that the claim is in accordance with the terms and conditions of the warranty, Just Add Plants will replace the defective product.
