# The VELUX Sun Tunnel® Skylight with Wildfire Glass

Designed, Built, and Tested to Withstand Wildfires

# The Only Sun Tunnel® Skylight of Its Kind

The VELUX Curb-Mounted Sun Tunnel® Skylight with Wildfire Glass is a one-of-a-kind skylight that meets California's strict building codes and national Wildland-Urban Interface areas.

A new accessory is available to turn the regularly 14" tunnel circumference into 10". The Ceiling Lens Complete (# ST13-G) attaches to our TZR Sun Tunnels, easily adapting them to tunnels with a 10" circumference so they can be installed in more spaces. Only \$31, the 10" Ceiling Lens Complete can help transform even more homes with natural light!

- Features a fireproof tempered diamond wire flat glass, allowing it to pass an ASTM E108 Class A Burn Brand Test.
- Designed with a flat glass exterior to pass building codes and strict homeowner's association regulations, unlike traditional acrylic dome tubular skylights.
- Compatible with all roofing materials and roof pitches.
- Includes a total of 64-in. of tunnel material: two 12-in. 45° elbows, one 24-in. extension and 16-in. top collar (adapter)
- Qualifies for "No Leak" Warranty if installed with VELUX flashing
- Added bonus! The TZRL model comes fully packaged with all the necessary components, including flashing, to make for a quick and easy installation.
