NETATMO

VELUX®

Skylights

Your window to a smarter, healthier home.

For complete skylight control, look no further than VELUX ACTIVE with NETATMO! VELUX ACTIVE uses your home's Wi-Fi to monitor your indoor air quality, then automatically opens or closes your skylights and shades based on your preferences and outdoor conditions. You can also control them yourself, even if you're away from home, through the app on your phone.

So, what are you waiting for? Upgrade your skylights with VELUX ACTIVE!

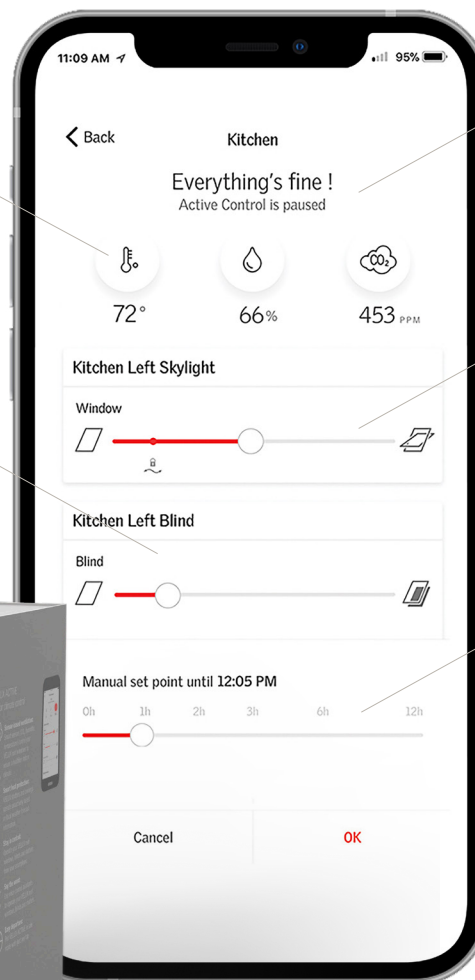

Monitor temperature, humidity, and CO₂

Slider to open or close shades

Check the status of room condition

Slider to open or close skylight

Set timers to control skylights

VELUX®

Skylights

**Internet Gateway**

**Sensor-based ventilation**

Smart sensors monitor temperature, humidity and CO₂ levels and operate your skylights accordingly for a healthier indoor climate.

**Easy departure**

Tap the VELUX ACTIVE departure switch on your way out to close your VELUX skylights and only operate shades.

**Say the word**

Google Home Hub compatibility lets you use voice control to operate your VELUX skylights and shades.

**Nighttime mode**

Opt for shades to automatically close at the end of each day for energy savings and privacy.

**Stay in control**

Operate your VELUX skylights and shades from your smartphone, whether you're at home or away.
