SCAFFOLDING

# MADE FOR KINGS

Established in Sydney by Mr Robert Adcock, KingGee has been part of Australian history since 1926. The original KingGee overall was born out of humble beginnings and was the first in a long line of work garments known for their quality and careful craftsmanship.

Over the years, KingGee has evolved with the changing needs of the work environment. Today, our passion and expertise are second to none.

Our premium products are engineered to ensure comfort, durability and functionality enabling you to work at your best in all conditions. We lead the industrial workwear industry and push the boundaries of garment development to new levels. Quantum and Workcool Pro are just two of our latest innovations.

We have come a long way since our first KingGee overall. Some things never change — we are proud of our product. We are proud of our customer. We believe in comfort.

# KINGGEE SUSTAINABILITY VISION

As a recognised and trusted partner for workwear solutions, we are committed to meeting, exceeding and leading our customers' and community sustainability expectations and goals.

We constantly innovate and strive to advance a world class sustainability agenda, which leads the Australasian workwear apparel industry.

We always look for areas to improve in our business and supply-chain, and are proud of our efforts to always do better ourselves and for our customers and communities.

# ETHICAL SOURCING & HUMAN RIGHTS

We strive to source products in a responsible manner while working with suppliers to improve their social and environmental practices.

KingGee opposes the use of Modern Slavery practices in all forms and is committed to an ongoing journey of reducing and eradicating the risk of modern slavery in its supply chains and throughout its business operations, both domestically and abroad. We endeavour to source products in a responsible manner while working with suppliers to improve their Ethical & Modern slavery practices.

Being a subsidiary of the Wesfarmers Group, KingGee has reported publicly on our ongoing journey and performance against abolishing Modern Slavery within our supply chain since 2015. Progress on how we assess, remediate and mitigate Ethical and Modern Slavery risk throughout our supply base is made publicly available through our 2020 Modern Slavery Statement.

We utilise the Sedex platform to streamline ethical sourcing and human rights compliance, monitoring and social compliance audits. To align with global best practice, we use the SMETA 6.1 audit methodology, developed by Sedex. As such, we hold our suppliers accountable in a range of areas including safety practices, legal compliance, labour and human rights, modern slavery, anti-bribery and environmental impact.

We are committed to collaborating with our people, suppliers and the wider industry, improving working conditions for people employed along our supply chain and strengthen relationships with suppliers. We currently partner with the Bangladesh Accord, Ethical Clothing Australia (ECA), Baptist World Aid and Sedex, and we are constantly looking for new partnerships to ensure we are delivering world-class sustainable objectives. By partnering with industry leading organisations, we guarantee that we are always striving for world's best practice in this ever-growing space.

Our company vision is to deliver our clients with workwear solutions for workers who want to feel proud and be safe.

We recognise that our clients have each placed their trust in KingGee to deliver upon this vision. We take this responsibility extremely seriously. The quality and safety of the products and services we provide; is central to everything we do. KingGee is ISO 9001:2015 certified which commenced in 1996 (Certification number: 20797).

KingGee is accredited to Ethical Clothing Australia, an industry union-based initiative within the Australian garment industry to ensure that all apparel and textiles manufactured, or value-added businesses, comply with all relevant Australian laws. Workwear Group has been accredited with Ethical Clothing Australia since 2015.

# APCO

KingGee is proud to be a part of the 2025 National Packaging Targets that will deliver a new and sustainable approach to packaging in Australia.

Packaging has a number of important functions in our modern lifestyle. However, packaging is primarily made from finite resources, in particular Plastic. And currently, the way we manage them at the end-of-life has poor environmental outcomes on land and in our oceans – which must be remedied.

The Australian Packaging Covenant Organisation (APCO) has a vision of a packaging value chain that collaborates to keep packaging materials out of landfill and retains the maximum value of the materials, energy and labour within the local economy. In line with our Sustainability targets set by Workwear Group, we as a team of brands are committed to contributing to the 2025 APCO national goals by implementing:

- 100% reusable, recyclable or compostable packaging
- 50% of average recycled content included in packaging
- The phase out of problematic and unnecessary single-use plastics packaging

The 2025 National Packaging Targets will deliver a new and sustainable approach to packaging in Australia, and we are proud to be a part of the movement.

KingGee is committed to reducing our environmental impact and we strive to continually improve our environmental performance. This book is produced on FSC® certified stock, manufactured elemental chlorine free and in accordance to ISO14001 EMS.

# RESPONSIBLE RESPONSIBLE

We're on a mission – a mission to improve cotton farming globally.

# FABRICS & SOURCING

REPREVE® is a brand of recycled materials made by Unifi, Inc, a global textile solutions provider and one of the world's leading innovators in synthetic and recycled performance fibers. Unifi believes true innovation starts in the fiber, and REPREEVE® is one of Unifi's proudest creations—made today for the good of tomorrow.

For consumers who want to care for the environment, now and into the future, REPREEVE® is the leading brand that inspires to be a catalyst for change through recycling. When they buy products made with REPREEVE®, they know they are part of a movement to protect the land, oceans, wildlife, air and natural resources they love, for the next generation.

REPREVE® is performance fiber made from 100% recycled materials, including recycled plastic bottles. REPREEVE® is creating an amazing loop that recovers waste to make our land, oceans, air and natural resources sustainable for the next generation.

**R E P  E V E®**

We are on a mission. A mission to improve cotton farming globally. KingGee, in partnership with the Workwear Group family of brands, commit to collectively sourcing 100% of our cotton as 'more sustainable cotton' by 2025.

'More sustainable cotton' includes BCI, Australian Cotton or recycled cotton.

\*Better Cotton is not physically traceable to end products. However, BCI Farmers benefit from the demand for Better Cotton in equivalent volumes to those we 'source.'

#### WHAT IS BCI?

The Better Cotton Initiative (BCI) brings together farmers, ginners, manufacturers, retailers, brands, civil society and grassroots organisations in a unique global community committed to developing Better Cotton as a sustainable mainstream commodity.

The Better Cotton Standard is a set of on-farm best practices covering social and environmental issues like pesticides, water, soil health and wellbeing.

In the 2018/19 cotton season, two-million BCI farmers across 23 countries produced 5.6 million metric tonnes of Better Cotton lint, accounting for 22% of global cotton production.

To find out more about BCI visit [www.bettercotton.org](http://www.bettercotton.org)

# SUSTAINABLE FOOTWEAR

A sustainable future, one step at a time.

At KingGee, we know how important it is that we all do our part. We are working to integrate more sustainable development and design in all facets of the business. The Footwear Team are very passionate about this, and continue to be industry leaders in finding new ways to incorporate both recycled materials and improved processes.

Some key initiative to our Recycled and Sustainable pathway include increasing recycled materials in our products – our latest launch, Quantum, has been engineered with recycled elements, resulting in a product made using 33% recycled plastics and textiles. This is achieved using NatureTex Linings and upper material, which is made from recycled plastic bottles. A true first for both the Australian, and International market.

Other key sustainable elements include:

- Shoe laces 100% made using recycled plastics and yarns
- TPU bumpers made from 100% recycled TPU
- Recycled ETPU footbed popcorn footbed
- All KingGee TPU is 100% recycled material. This is fully accredited and endorsed by GRS – the Global Recycled Standard
- FY20 – 55,000 units were imported using this recycled TPU on outsoles and toe bumpers
- Currently, 21% of our total Workwear Group footwear business uses accredited recycled TPU
- Initiatives in packaging reduction and movement to more sustainable options
- All boxes are fully recycled cardboard
- Reduction in the use of swing tags
- Reduction in plastic bags (secondary lace packaging).

# KINGGEE PROUDLY SUPPORTS RURAL AID

Rural Aid is one of Australia's largest rural charities.

Rural Aid is well known for the highly successful 'Buy a Bale' campaign, the charity also provides financial assistance, water and counselling to farmers in times of drought, flood or fire. Other initiatives support its vision that farming and rural communities are safeguarded to ensure their sustainability both during and after these natural disasters. Visit [www.ruralaid.org.au](http://www.ruralaid.org.au) for further information on these programs and other support for our rural communities.

KingGee is a proud supporter of Rural Aid and its mission to support Australian rural communities in times of crisis and difficulty. As a proud Australian-born workwear brand, KingGee is honoured to partner with Rural Aid for the opportunity to give back to the farmers and communities who put food on our tables, and supported KingGee since its humble beginnings.

# THE KINGGEE WORKINGS

## AIRFLOW

Engineered ventilation placed in high heat zones to allow air to flow through to the body, improving breathability and keeping the wearer cool and comfortable.

## CTE3 REINFORCED

CTE3 reinforcement fabric has been added to the garment at critical areas for durability.

## MAXIMUM UV PROTECTION

Working outside can expose you to continual UV light, this UV light can cause serious and irreversible eye damage. All lenses used in the manufacture of KingGee glasses protect the wearer from both UVA & UVB radiation offering maximum UV protection.

## ANTIMICROBIAL

Antimicrobial finish has been applied to the fabric to minimise odours and inhibit the growth of bacteria, keeping you smelling fresher for longer!

## DURABLE WATER REPELLENT

Durable water repellent finish sheds water from the garment's surface.

## MESH VENT

Mesh venting in high heat zones improving breathability and keeping the wearer cool and comfortable.

## ARTICULATED FIT

Engineered to fit and move with you.

## HIGH VISIBILITY

This symbol indicates which garments have been designed to comply with AS/NZS 4602.1:2011. These garments give you confidence that you will be visible at work.

## MOISTURE MANAGEMENT

Fabrics designed to keep you dry and comfortable: moisture wicking, quick drying and breathable.

## COOLMAX

Fabric made with COOLMAX® ALL SEASON technology transports moisture away from the body to keep the wearer cool and dry on hot days, while the fiber structures provide warmth on colder days, helping to optimize performance.

## LIGHTWEIGHT

Lightweight fabrics that do not compromise strength or durability.

## POLARIZED LENS TECHNOLOGY

When sunlight reflects off horizontal surfaces such as roads and water it condenses to create glare, also called disability glare. The polarizing filters used in the KingGee Polarized lenses eliminates 99.9% of this reflected glare providing crystal clear vision, excellent colour contrast, distortion-free and reduce eye fatigue.

## CORDURA®

CORDURA® fabric to help provide extra protection and durability where it's needed most - resisting abrasion, tear and stress to give best-in-class performance for tough environments.

## KNEE PAD POCKETS

Provision to hold knee pads in place.

## RIPSTOP FABRIC

Ripstop fabrics have been woven to be highly tear and rip resistant.

#### RECYCLED

Incorporates GRS endorsed recycled materials including linings and outsole.

#### TECHNOTEX

Water, oil and soil repellent finish, helping you stay dry and clean and keeps fabrics and colours looking new for longer.

#### WIND RESISTANT

Garments constructed using highly wind resistant fabrics. Not windproof due to garment seams not being sealed.

#### REFLECTEC

Material that uses millions of reflective glass beads to reflect light back towards its original source for increased visibility and safety in low light situations.

#### TRIPLE STITCHING

Triple stitching providing increased strength and durability in key stress points.

#### WINDPROOF

Garments constructed with fabric that has a windproof membrane and have been seam sealed to prevent wind penetrating the inside of the garment.

#### REPREVE®

Trusted, branded recycled performance fibre used to make sustainable textiles.

#### UPF RATING

An Ultraviolet Protection Factor (UPF) rating for Ultraviolet Radiation transmitted through a fabric onto the skin. Look for garments with a UPF 50+ rating to be assured of excellent protection. These garments have been designed to comply with AS/NZS 4399:2017.

#### WRINKLE RESISTANT

Durable fabric finish that reduces the garments tendency to crease, making it easy to care for.

#### SAFETY

KingGee safety glasses not only look great but are designed using durable and lightweight frame materials coupled with hardened Polycarbonate lenses for the ultimate protection and comfort. Glasses are available for both indoor and outdoor use and are tested to meet Eye Protection standard AS/NZS 1337.1:2010 medium impact.

#### WATER RESISTANT

Garments constructed using highly water resistant fabrics. Not waterproof due to garment seams not being sealed.

#### STRETCH

Built-in stretch providing comfort and freedom of movement

#### WATERPROOF

Garments constructed with waterproof fabrics and have been seam sealed to prevent water penetrating the inside of the garment.

# PANTS THAT FIT

## WORKCOOL PRO

### BIO MOTION PANT

## POLARIZED LENS TECHNOLOGY

When sunlight reflects off horizontal surfaces such as roads and water it condenses to create glare, also called disability glare. The polarizing filters used in the KingGee Polarized lenses eliminates 99.9% of this reflected glare providing crystal clear vision, excellent colour contrast, distortion-free and reduce eye fatigue.

## MAXIMUM UV PROTECTION

Working outside can expose you to continual UV light, this UV light can cause serious and irreversible eye damage. All lenses used in the manufacture of KingGee glasses protect the wearer from both UVA & UVB radiation offering maximum UV protection.

## SAFETY

KingGee safety glasses not only look great but are designed using durable and lightweight frame materials coupled with hardened Polycarbonate lenses for the ultimate protection and comfort. Glasses are available for both indoor and outdoor use and are tested to meet Eye Protection standard AS/NZS 1337.1:2010 medium impact.

 Relieves pain from working and standing on hard surfaces and rugged worksites

# FOOTWEAR

## ICON GUIDE

### APODA ENDORSED

KingGee Footwear and APODA are working together to deliver improved comfort and foot health for all of our end users. Footwear showing this logo have been tried, tested and recommended by experts.

### SUSTAINABLE FOOTWEAR

We use Global Recycled Standard (GRS) endorsed recycled TPU materials. When you shop from this range, you're helping us work towards a more sustainable future.

### ACHILLES FLEX

Accordion-style flex point in the Achilles area allows the boot to flex. It's unique design allows the foot to flex forward when crouching and backward when changing gears in a car/truck preventing any pain and restriction in movement from the Achilles tendon.

### AIRPORT FRIENDLY

Airport friendly boots feature non-metallic components. Plastic shanks are used in manufacture together with the use of a composite safety cap ensure KingGee footwear meets AS/NZS 2210.3:2009 or AS 2210.3:2019 safety standards.

### ANTI-STATIC

Boots with Anti-Static properties are designed to reduce the build up of excess static electricity by conducting body charge to the ground. This offers a level of protection against ignition hazards such as flammable materials and gasses.

### ARZ+™ PAD TECHNOLOGY

Anatomical Rebound Zone (ARZ+) with an expandable polymer that provides excellent cushioning and rebound. ARZ+ heel protection difference is apparent at heel strike the soft contouring material dissipates force upon impact.

### COMPOSITE TOE CAP

Composite safety toe caps provide the same level of protection as that afforded by steel toe caps tested under AS/NZS 2210.3:2009 (200 Joules) or AS 2210.3:2019 standards, with the added benefit of being non-conductive and are up to 30% lighter than a steel toe cap.

### DUAL DENSITY PU/TPU OUTSOLE

Polyurethane (PU) provides an excellent balance of shock absorption (cushioning) and energy return (rebound). Thermoplastic Polyurethane (TPU) has many useful properties including elasticity and resistance to most oil, grease and abrasion, as well as 130° Celsius heat resistance.

### ELECTRICAL HAZARD EH

Electrical hazard footwear is specifically designed and tested to insulate the wearer from electrical hazards, to reduce the flow of electricity. EH Footwear has been tested to the requirements of ASTM F2413-11. EH shoes should not be used as the primary source of protection in an electrical hazard environment.

### GENUINE LEATHER

KingGee boots are made using the finest quality leathers that mould to the shape of your feet allowing your feet to "breathe".

### HAND MADE

This shoe is made by hand using quality materials and time-honoured traditional shoe making skills.

### LIGHTWEIGHT

KingGee footwear incorporate safety toe caps in a contemporary yet durable design which feels lightweight on the wearer's foot.

### MEMORY FOAM FOOTBED

Sensitive to pressure and moulds perfectly around the contours of your foot. The PU bottom layer provides permanent cushioning and shock absorption.

### MET GUARD

Poron™ XRD™ Extreme Impact Protection material is a breakthrough technology. Extreme impact protection from a moulded pad stretching from the tongue to the steel cap. Contoured, breathable and flexible allowing ease of motion for comfort & fit whilst protecting the metatarsal. Tested in accordance to ASTM F 2413-11.

### OIL & SLIP RESISTANT

Sole resistant to fuel oil and rated to SRA slip resistance which is tested using water on ceramic tile.

### ORGANIC FAT AND OIL RESISTANT

Sole resistant to organic fats and oils.

### PROTECTIVE TPU TOE BUMPER

Protective Thermoplastic Polyurethane (TPU) toe and heel bumpers provide further abrasion resistance.

### RUBBER OUTSOLE

Rubber offers 300° Celsius (572°F) heat resistance. Rubber has excellent resistance to oils, acids and is naturally resistant to hydrolysis.

**STEEL CAP**

Designed to withstand a force of 200J (Joules) and compression resistance of 1.5 ton. Ethylene Vinyl Acetate (EVA) protective cap liner for added comfort and steel cap protective liner to ensure toes are comfortable and not in contact with the protective safety cap.

**SRC SLIP RESISTANCE**

SRC offers the most superior slip resistance for all surfaces. (Tested on both ceramic tile floor with SLS solution and steel floor with glycerol).

**WATER RESISTANT**

Water resistant footwear will repel water so that it soaks in more slowly and are best used when walking through dew or occasionally damp areas.

**WELLMAX® PUNCTURE PROTECTION**

WELLMAX® anti-penetration is a non-metallic, flexible plate. Tested and compliant with EN ISO 20345, EN12568 and CSA Z195-02 Standards. The high tech ceramic coated fibres offer greater comfort, lightness, thermal insulating properties and flexibility compared to steel plates.

**WIDE SAFETY TOE CAP**

Wide profile toe cap provides more comfort. All our footwear complies with Australian and New Zealand standards AS/NZS 2210.3:2009 or AS 2210.3:2019.

**30 DAY COMFORT GUARANTEE**

Our workboots have been engineered to provide maximum comfort. After careful study of the Australian foot anatomy we have designed KingGee boots with a wider last, sole & toe cap. We are so confident you will love these boots that they come with a 30 day comfort guarantee.

**AGION®**

Agion® branded antimicrobial technology makes products cleaner and longer lasting with silver, copper and zinc, which have been proven in use throughout history. Agion® anti-microbial technology provides built in protection by working 24/7 resisting the growth of microbes.

**BOA®**

The Boa® Fit System is comprised of three integral parts: a micro-adjustable dial, super-strong lightweight laces, and low friction lace guides. Each configuration is engineered to optimize fit and provide precision, adaptability and control.

**BENCHMARK®**

All KingGee footwear showing this logo is certified to AS/NZS 2210.3:2009 meeting all Benchmark® requirements under the Australian and New Zealand standards.

**DRI-LEX® LINING**

Dri-Lex® lining treated with Aegis® anti-microbial. A patented superior mesh designed to manage moisture within a boot environment.

- Wicks away moisture
- Allows your feet to breathe
- Keeps your feet dry
- Keeps your feet cool

**KEVLAR®**

DuPont™ Kevlar® aramid fibre is used due to its being lightweight, heat resistant and extraordinarily strong, with 5 times the strength of steel on an equal-weight basis. It is about 2.5 times stronger than nylon and polyester, has almost no stretch, does not melt, and decomposes at 800°F.

**KULKOTE® TEMPERATURE REGULATING**

Technology keeps the foot cool and expels heat.

**CORDURA® COLLAR**

Gives support and strength while still being breathable.

**NATURETEX LININGS**

Made from recycled plastic bottles.

**COSMO™**

- Highly abrasion resistant lining
- Keeps you dry and comfortable
- Quick drying hi-tech

**PORON™ XRD™**

Extreme impact protection pad is durable, lightweight and comfortable. Poron™ XRD™ is designed to withstand multiple hits over time and not break down.

**D3O® CONSTRUCTION**

Provides world class shock absorbing impact lateral & medial ankle protection.

**YKK®**

World leader in the manufacture of fastening systems. YKK® Coil zipper is extremely strong and lightweight, has excellent heat resistance (up to 360°F/ 182°C) and resistance to cold (down to -60°F/ -51°C). Resistance to chemicals further extends the use of YKK® beyond the scope of conventional metal zippers.

# FOOTWEAR

## BUILT TO FIT FOOTWEAR

### 1 WIDE STEEL TOE CAP

For protection & comfort

### 2 DRI-LEX™ LINING WITH AEGIS™ ANTI-MICROBIAL

Keeps your feet cool and dry

### 3 LIGHTWEIGHT SOFT PU

For long-term comfort

### 4 ARZ+™ TECHNOLOGY INC. PORON™ XRD™ PAD

Provides superior shock absorption

### 5 RECYCLED WOVEN FABRIC

For insulation

### 6 PU MIDSOLE

For maximum cushioning

### 7 TPU OUTERSOLE

Provides fuel oil, heat (up to 130°C) and slip resistance

## BUILT TO FIT STORY

### 3D-SCANNING

A last gives the volume inside a boot and therefore is essential for comfort and fit. Ours has been designed by one of Australia's most experienced last-makers.

For over 35 years he has been measuring and recording Australian foot dimensions. The use of 3D scanning, his extensive database and expertise have all been instrumental in providing KingGee with a last that best fits the Australian foot.

### DRI-LEX™ LINING

A superior mesh, designed to manage moisture within a boot environment. It keeps the foot surface dry and comfortable no matter the climate. The hydrophilic action in Dri-Lex™ fabrics works through a combination of absorption, wicking and rapid drying capabilities. This lining is also treated with Aegis™ anti-microbial to reduce odour formation caused by bacteria.

**DRI-LEX®**

## AUSTRALIAN AND NEW ZEALAND SAFETY STANDARD –

AS/NZS 2210.3:2009

AS 2210.3:2019

Every safety boot sold in Australia has to pass the latest Australia and New Zealand Standards for protective and occupational footwear (currently AS 2210.3:2019).

Each style must be tested by an independent and authorised laboratory and then certified by a worldwide recognised organisation where each component of the boot is tested (fabric, sole, thread, lining, etc.).

## BONDING TEST

Measures the force required to separate the upper from the sole unit or to separate different layers within the sole unit, i.e. separate midsole from outsole. Material tearing is part of the assessment when the force required to tear the material itself apart is lower than the bonding strength between two different materials and also lower than the bonding requirement then material failure will occur.

## COMPRESSION TEST

This test measures the resistance of a toe cap being compressed by an upper plate with a pressing force 15kN = 1.5ton. The clearance between the toes and the toe cap must be over 12.5mm or 15mm depending on sizes.

## IMPACT TEST

Each toe cap has to pass the impact resistance test explained in the standard AS 2210.3:2019. After the drop of a 20kg striker with a force of 200J, the clearance between your toes and the toe cap must be between 12.5mm to 15mm depending on sizes.

Our KingGee boots are made with attention to detail using the finest quality leathers that mould to the shape of your feet allows your feet to “breathe”.

Leather is a natural material that is made from animal hide that has been tanned. It is among the oldest of human inventions. In ancient times, the gatherers and hunters used leather as their protective clothing and for warmth.

KingGee cowhide leather is flexible, breathable and supple. Cowhide leather looks good dyed or left natural. It's durable, ages well and lasts up to five times longer than fabric. Its properties of toughness and tear and puncture resistance are the reason it is used in our boots. It naturally repels moisture, retains its shape, and resists sun and heat damage.

## FULL-GRAIN LEATHER

KingGee full-grain leather workboots use cow hides which are not sanded or buffed, and are naturally tanned resulting in the hides having excellent breathability and a true softness in the leather.

Owing to the fact that this type of leather is not sanded, the natural marks on the hide are sometimes visible. Most people prefer this natural finish.

KingGee full-grain leather is very reliable and strong. This is because the grain has not been removed. Thus the fibre strength and the toughness of the hide are still retained in the leather. Full-grain leather does not wear out; instead a patina will be developed over time. Full-grain leather also has better breathability than other types of leather. Owing to the strength of this type of leather, it is used in the production of KingGee workboots.

## NUBUCK LEATHER

KingGee Nubuck leather has a soft, velvety surface and is the premium choice in leather. Nubuck is sanded on the outer surface of the leather, essentially the part that would have been the exterior skin of the animal.

Since the outside layer of a skin is much tougher, Nubuck lasts much longer than suedes and responds very well to this sanding process. It does show imperfections in the exterior layer of the skin much more easily, and is often treated with dyes, sometimes simply clear ones, to disguise any significant flaws.

Nubuck is subject to easy staining and often requires pre-treatment or stain-resistance protection to extend its life.

## SUEDE LEATHER

KingGee suede leathers are sanded to produce the velvet-soft feel that is typical of high-grade suede. This feel is achieved by sanding the inner layer of the cow hide.

Because it comes from a thinner piece of hide, suede is less durable than full-grain leather. The suede texture of the material also makes it more susceptible to damage from water and stains. However, because several pieces of suede can be produced from a single hide, it is less expensive than full-grain leather.

## CRAZY HORSE LEATHER

Crazy Horse Leather is sometimes known as “saddle leather” and is treated with oil and wax in a unique tanning process to the surface of the leather. During this process, the oil and wax surface to create a rich, beautiful patina that's fade-resistant. When the leather is rubbed, the colour will change and will not immediately reverse, giving it an antique look.

# FOOTWEAR

## HOW TO WORK OUT YOUR SHOE SIZE

### MEN'S EEE fit

AUS/UK	5	5.5	6	6.5	7	7.5	8	8.5	9	9.5	10	10.5	11	12	13	14	15	16
USA	6	6.5	7	7.5	8	8.5	9	9.5	10	10.5	11	11.5	12	13	14	15	16	17
European	39	39.5	40	40.5	41	41.5	42	42.5	43	43.5	44	44.5	45	46	47	48	49	50

### WOMEN'S (For women's specific styles) D fit

AUS/USA	5	5.5	6	6.5	7	7.5	8	8.5	9	9.5	10	10.5	11					
UK	3	3.5	4	4.5	5	5.5	6	6.5	7	7.5	8	8.5	9					
European	35	36	37	37.5	38	38.5	39	39.5	40	40.5	41	41.5	43					

**The grey shaded boxes show** the Men's to Women's equivalent sizes for unisex sized footwear.  
For example, a Men's AUS/UK 5 is equivalent to a Women's AUS/USA 7.

Please Note: Unisex sizes are wider fits for women than women's specific footwear.

# SIZE GUIDE

## HOW TO WORK OUT YOUR SIZE

### MEN'S MEASUREMENTS STANDARDS

#### A / NECK

Measure around your neck at the collar level. Remember to make allowance for comfort (usually 2 fingers behind the tape).

#### B / CHEST

It is important to stand naturally, keeping the tape level and straight. A firm (not tight) chest measurement should be taken.

#### C / WAIST

Measure around natural waistline, keeping the tape level and straight. Do not measure over your trousers.

#### D / INSIDE LEG

Take the measurement from the crotch to the top of the heel of the shoe.

### WOMEN'S MEASUREMENTS STANDARDS

#### A / BUST

Measure around the body across the fullest part of the bust, keeping the tape level and straight.

#### B / NATURAL WAIST

Measure around the smallest part or your natural waistline, keeping the tape level and straight. Do not measure over your trousers.

#### C / LOW WAIST

Measure at a level approximately 4cm down from the natural waistline, keeping the tape level and straight. Do not measure over your trousers.

#### D / HIPS

Measure around the widest part of your hips (approximately 20-30 cm below the waist). In this position the tape measure should slide up, down and over the bottom.

### OUR TWO WOMEN'S FITS RELATE TO THE BODY SHAPE OF THE WEARER

#### STRAIGHT FIT

- More fitted through the hip and thigh
- Slightly lower in the rise

#### CURVED FIT

- A more generous fit, designed for bodies with more curves and shape
- More room in the hip and thigh
- Sits higher on the waist

# COMPLIANCE GUIDE

## HIGH VISIBILITY GUIDE

HIGH VISIBILITY DAY

K54870 Workcool 2  
Spliced Shirt Long Sleeve

HIGH VISIBILITY NIGHT

K54880 Workcool 2 Hi Vis Reflective  
Spliced Shirt Long Sleeve

KingGee high visibility workwear meets or exceeds Australian and New Zealand Standards AS/NZS 4602.1.

According to the Australian Standards, materials classified as high visibility for daytime use must be manufactured from a durable fabric of woven or knitted cotton or equivalent man-made fibre that contains a fluorescent pigment or other high visibility dye. These materials are subjected to the following tests and must meet or exceed specified minimum requirements for:

- Daylight colour and luminance factor
- Colour fastness to light
- Colour fastness to washing
- Colour fastness to perspiration

In some cases, for safety reasons, a garment must be made from a natural fibre incapable of retaining a fluorescent colour. In these instances, the material is tested for luminance for non-fluorescent materials. Alternatively, man-made fibres are generally capable of retaining a fluorescent colour and are therefore tested for luminance for fluorescent materials. The fabrics used in the manufacture of KingGee high visibility workwear are tested and must meet or exceed specified minimum requirements for:

- Chromaticity
- Luminance for fluorescent materials or
- Luminance for non-fluorescent materials

Things to know about high visibility standards:

- Class D means the garments meets AS/NZS 4602.1 for daytime use only.
- Class N means the garments meets AS/NZS 4602.1 for night time use only.
- Class D/N means the garments meets AS/NZS 4602.1 for day or night time use.
- Bottoms (pants and shorts) are not part of the high visibility standards and therefore do not comply with AS/NZS 4602.1.

## IMPORTANT: LIMITATIONS OF USE.

Under no circumstances should Class D garments be worn for visibility purposes at night. Any markings, attachments, screen prints or other alterations, accessories or coverings not incorporated into the original product may not only void the garment compliance with the appropriate standard, they may also put the user at risk by reducing the high visibility area of the garment. The high visibility properties offered by KingGee high visibility may be lessened due to normal wear over time. KingGee high visibility garments using natural fibres have been tested and comply to Australian Standards AS/NZS 4602.1 in dry conditions. Wet conditions may alter the compliance of these fabrics to the standard and appropriate care should be taken.

## UPF RATINGS

Garments are classified based on the ultraviolet protection factor (UPF). The UV protection of fabric depends on the content, weave, density and colour. UPF rates how effectively a piece of clothing shields against the sun. It is based on the content, weight, colour of the fabric and indicates how much UV can penetrate the fabric. For instance, a shirt with a UPF of 50 allows just 1/50th of the sun's UV radiation to reach your skin.

The UPF rating is for the fabric and does not address the amount of protection which is afforded by the design of the article. The manipulation involved in garment manufacture such as stretching and sewing may lower the UPF of the material. Articles which have been designed to cover the maximum area of the body are recommended.

The protection offered by garments may be lessened:

1. at points where the fabric is in close contact with the skin such as across the shoulders;
2. if the fabric is stretched;
3. if the fabric is wet; and
4. with time, due to the effects of normal wear. Fabric has been rated in accordance to AS/NZS 4399:1996.

## OUR QUALITY POLICY

We understand work can be demanding and stressing at times. KingGee garments are designed to facilitate your everyday. Our Design and Quality departments spends a lot of effort to make sure KingGee products are comfortable, functional and presentable for as long as possible.

- All fabrics are systematically tested by a third party laboratory for tear force, breaking force and colour fastness.
- All shades are carefully controlled in a light box to ensure the consistency of your uniforms.
- All new products introduced in the market place are wear tested with real workers prior to the launch.
- All marketing claims are systematically tested and part of the product specifications.

KingGee, a brand under The Workwear Group, continuously review standards and trends within the industry and are constantly pushing the boundaries so that customers are getting quality products that are both safe and fashionable. Quality is paramount in KingGee and we will never sacrifice it. KingGee products comply with:

- High Visibility Australian Standards Compliant AS/NZS 1906.4 & AS/NZS 4602.1
- UPF Australian Standard AS/NZS 4399:1996
- Boots – Safety Footwear Standard AS/NZS 2210.3C & AS/NZS 2210.3:2009

The Workwear Group, who owns KingGee, achieves the highest workplace standards. Australian Standards Compliance AS/NZS ISO 9001:2015 Quality Management System

## ISO 9001 – QUALITY MANAGEMENT SYSTEMS

ISO 9001 is a quality management system (QMS) standard that requires an organisation to meet its own requirements and those of its customers and regulators. It is based on the plan-do-check-act methodology, which helps organisations establish, implement, monitor and measure their processes to deliver results that align with the organisation's requirements and continually improve performance by taking appropriate action.

## ETHICAL BUSINESS PRACTICES

KingGee is committed to a fair go for all and we actively manage our business and suppliers to ensure that textile workers are not exploited. We adhere to the Homeworkers Code of Practice in Australia and the Code of Practice for Overseas Manufacturers and Suppliers. These Codes cover labour, wages, work and safety standards for KingGee products that are produced both locally and beyond our home shores.

### ETHICAL COMPLIANCE

KingGee, as a brand under The Workwear Group and a division of Wesfarmers Industrials Group, is a recognized leader in managing design, development and supply chains globally, as such we are committed to working with our supply partners to continuously improve ethical business practices through engaging with the partners to deliver sustainable solutions.

We proactively promote responsible behaviour in our supply chain to protect our brands and the well-being of workers/their communities in the factories we work with.

We hold our suppliers accountable in a range of areas including safety practices, legal compliance, labour and human rights, modern slavery, anti-bribery and environmental impact. Our mission is to know, trust and support our supply partners to make our impact on global supply chains positive.
