SAFETY FOOTWEAR

Our products are inspired by all those workers who have one thing in mind: **doing their job well.**

---

As **workwear specialists since 1949**, at Velilla Group we know it is essential that the uniform of the workers reflect the corporate identity of your company.

For this reason, we offer you a wide variety of designs and colours of safety footwear that combine perfectly with the workwear sets of our Velilla brand.

## What do we offer you?

- Safety footwear that joins quality and comfort, providing protection adapted to the different needs of workers and their sector of activity.
- All the guarantees of a brand registered by Velilla Group, a multinational company with more than 70 years of experience in the textile industry and a market leader.
- Modern and comfortable designs that combine with our Velilla brand uniforms.
- An excellent customer service that allows us to provide personalized and reactive attention.
- A sales force made up of specialized and professional business managers.
- Available stock and delivery flexibility to adapt to your needs.

# Regulation c€

Hereafter, we detail a short description about the additional and basic requirements established by the European regulations on safety footwear:

## EN ISO 20344

This regulation defines the testing methods for occupational and safety footwear. It is used alongside the regulations EN ISO 20345 and EN ISO 20347, wherein the requirements that footwear must comply according to the risk levels are detailed.

## EN ISO 20345 | Specifications for safety footwear

This international standard details the additional and basic requirements for safety footwear, including mechanical risks: safety toe designed to resist a maximum impact of 200J and crushing up to a force of 15 kN, slip resistance, thermal risks and ergonomic characteristics.

## EN ISO 20347 | Specifications for work footwear

This international standard details the additional and basic requirements for occupational footwear that is not exposed to any mechanical risks (impact or compression).

## UNE-EN 61340-5-1 | Electrostatics

This standard establishes the requirements for the protection of electronic devices against electrostatic phenomena in low voltage environments.

SB

Toe with impact resistance up to an energy equivalent to 200 J and compression force of 15 kN.

S1

S2

S3

SRA

SRB

SRC

	Slip resistance
SRA	Ceramic floor with detergent
SRB	Steel floor with glycerine
SRC	SRA + SRB

FO

Hydrocarbon-resistant sole

A

Anti-static footwear with resistance over 100 kΩ without surpassing 1.000 MΩ

E

Energy absorption in the heel area not superior to 20 J

WRU

Resistant to water penetration and absorption

P

Insole with a resistance to perforation up to 1.100 N

# Icons

There are several usage symbols and pictograms available, which make reading and communication about the main characteristics of our safety footwear easier.

## Protection levels

Toe with impact resistance to 200 J of 15 kN

S1 + Resistance to water penetration and absorption

SB + Anti-static properties  
Resistance to oils and hydrocarbons  
Energy-absorbing heel area

S2 + Resistance to perforation

S1 + Insole with a resistance to perforation

## Characteristics

Anti-static

Anti-perforation insole

Metal-free toe

Energy absorbing heel area

Resistance to hydrocarbons

Lightness and flexibility

Metal free

Slip-resistant sole

Resistant to water penetration and absorption

Breathable

## ESD Protection

### UNE-EN 61340-5-1 Electrostatic Protection

Antistatic footwear is used when it is necessary to minimize the risk of accumulation of electrostatic charges by dissipating them in the shortest possible time; guaranteeing the safety of the worker in areas with electronic control machines. It provides additional protection for resistances less than 100 kΩ.

# Materials

Our products, materials and production processes, meet the requirements set by the European regulation **EN ISO 20345**.

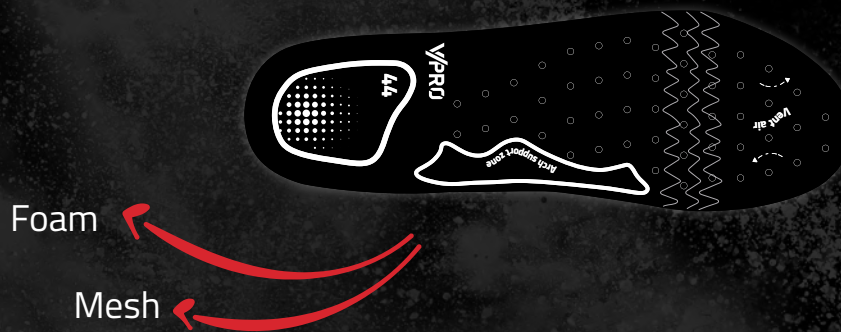

# WHAT'S NEW

## IMPROVED INSOLE

Increasing the foot's comfort

## ESD PROTECTION

Dissipating electrical charges for more safety

## SIZES EXTENSION

From 35 to 48

The workers' uniform must, in addition to fulfilling safety and comfort functions so that professionals can do their work in the best conditions, be an essential part of the companies' corporate identity.

Discover in this catalogue the sets of the Velilla Total, Fluor and Solid Match collections and the VPRO models in their new and attractive colours.
