# ABOUT SureWerx

BE SMART. BE SAFE. BE SURE.

Co-headquartered in Vancouver, British Columbia, and Elgin Illinois, SureWerx™ is a leading supplier of professional tool, equipment and safety products for workers. SureWerx markets its products in Canada under the JET®, Strongarm®, ITC®, STARTECH®, Pioneer®, Ranpro®, PeakWorks®, Jackson®, Wilson®, Curv-O-Mark®, Due North® and Sellstrom® brands, and in the United States under the American Forge & Foundry®, Pioneer®, PeakWorks®, Jackson®, Wilson®, Curv-O-Mark®, Due North®, Geroline/K1 and Sellstrom® brands. And now in Europe under our Jackson®, Sellstrom®, Due North®, Geroline/K1, Balder® and Curv-O-Mark® brands, SureWerx™ offers unparalleled access to its brands through its partner distributor network servicing the industrial, construction, safety, and automotive aftermarket in North America and Europe.

[www.surewerx.com](http://www.surewerx.com)

*"We want all of our distributor partners and the end users of our products to experience tangible value for the products and services we offer and we will continue to enhance that proposition vastly over the coming years"*

— A message from our CEO, Chris Baby

Building a health, safety and productivity business

## OUR COMMITMENT TO THIS REGION

To bring a range of feature rich PPE products and services to our distributor partners in the industrial, automotive, safety, medical and food markets.

As we only sell our own brands we control the appropriate certification of the products and the quality of the manufacture.

Our new catalogue includes new 'exclusive' products in the following categories:

- **PAPR systems**
- **Welding helmets**
- **Auto Darkening Filters**
- **Welding blankets and curtains**
- **Tools**
- **Arc flash protection**
- **Head, face and eye protection**
- **Safety wear**
- **Knee and elbow protection**
- **Slip protection**

## OUR FUTURE COMMITMENT TO THE REGION

- Continue to bring new 'exclusive' certified products to the markets.
- Invest in the systems, processes and people to deliver the best customers experience.
- Invest in your businesses with training and Marketing support.

"Our acquisition of Jackson Safety provided us with a platform in Europe on which we intend to build a comprehensive health, safety and productivity focused business. We have a successful track record in achieving this goal in other regions and will draw on that legacy to deliver the best customer experience in Europe. Our investment is already considerable and this catalogue reflects our commitment to delivering the right products to the worker to ensure they are totally confident of their health and safety and can concentrate on their productivity and delivering their best work."

# YOUR BEST WORK YET... NEEDS YOUR TOTAL FOCUS

The safety and productivity of every professional worker is our goal. Our mission is to design products that deliver on this goal. We are always finding better ways help increase worker productivity and safety.

Every day 100's of professional workers are injured at work - industrial accidents are avoidable.

Our goal is to ensure that you return home, after a safe and productive day at work, in the same healthy condition as you went to work.

Legislation and regulation continue to increase safety at work and all of our products will meet or exceed the necessary levels.

We also work to ensure that all of our distributors receive product knowledge training to ensure they provide the right product for the right application. We are committed to understanding the needs of the professional end users.

When workers are confident that their PPE is designed with their health and safety in mind they can concentrate on the job at hand, achieving maximum productivity.

# PPE REGULATION ● ● ●

## THERE ARE 3 CATEGORIES OF PPE

### PPE CATEGORY I

#### MINOR RISKS

Minimal risks with quickly disappearing side effects. No permanent health risks.

Marking:

European/UK conformity

### PPE CATEGORY II

#### CONSIDERABLE RISKS

Potentially irreversible health risks, but not lethal.

Not part of Cat. I. or Cat. III.

Marking:

European/UK conformity

### PPE CATEGORY III

#### HIGH & LETHAL RISKS

Risks that may cause very serious consequences such as death or irreversible damage to health.

Marking:

European/UK conformity

'xxxx' - Identification number of the body involved in assessment of production control (module C2) or quality assurance (module D) system

# RESPIRATORY PROTECTION PPE

## YOUR HEALTH MATTERS

Health hazards associated with welding processes typically include exposures to ultraviolet (UV) radiation and intense visible light that have the potential to cause eye damage. Physical eye hazards include welding spatter and grinding particles. Professional welders know about these hazards and provide protection with welding helmets and auto-darkening welding filters.

But other hazards – like **welding fumes, which contain particles** – are sometimes not as well known and may not be addressed. Prolonged exposure to welding fumes can lead to cancer of the lung, larynx and urinary tract, as well as nervous system and kidney damage.

## REDUCE EXPOSURE TO HAZARDS

### Understand the risks

Identify the hazard - metal fumes, gases, vapours, mist, dust.  
The selection of respiratory protection should be the result of the **risk assessment** conducted by a professional health and safety officer.

### Maintain clean surfaces

Welding surfaces should be cleaned of any coating that could potentially result in toxic exposure levels.

### Avoid breathing fume and gases

Position yourself to avoid breathing fume and gas, for example, stay upwind of welding fumes when working in open or outdoor areas. Be aware that welding outdoors or in open work environments does not guarantee safe ventilation.

### Use general or local ventilation

PAPR is not suitable for work in poorly ventilated areas where oxygen level is suspected to be below 17%.

Ventilation can reduce fume and gas levels in the work area and remove fume and gases from the welder's breathing zone.

### Wear respiratory protection

Chose the right respiratory protection and reduce exposures to safe levels.

## PROTECTION CLASSIFICATION

| TH1                            | TH2                           | TH3                             |
|--------------------------------|-------------------------------|---------------------------------|
| inward leakage max. <b>10%</b> | inward leakage max. <b>2%</b> | inward leakage max. <b>0.2%</b> |
| NPF = 10                       | NPF = 50                      | NPF = 500                       |

NPF - Nominal Protection Factor

Based on EN 12941

Awareness is the first step in controlling hazards. Investing in the right personal protective equipment creates a healthier, safer and more productive workplace.

#### Metal fumes

Fine, airborne particles from metal generated by condensation of vaporized material at high temperatures.

#### Gases

A normally formless fluid, often odourless and invisible, can spread freely and quickly through the air.

#### Vapours

Gases formed when solids or liquids evaporate at room temperatures.

#### Mist

Tiny liquid droplets generated by condensation or by breaking up a liquid into the dispersed state, in processes such as spraying.

#### Dust

Particulate matter formed when solid matter is broken down into fine, airborne particles. In welding about 95% is particle filtration.

- Comes with **HD 4 Cell Li-ion Battery 7.4V/5200mAh**. Charging time: 5 hours
- Operation time up to **10 hours** with a new filter P R SL and airflow 170 l/min
- In combination with Translight 355 welding helmet - featuring **ultra slim true color ADF** with **external mode control**
- Unit is CE Certified
- Translight 355 Series is super-lightweight with a sleek, modern design and look
- Auto Darkening Filter meets **1/1/1/1 Optical Clarity Standard**, the highest in the industry
- ADF contains external grind button for quick changes between modes
- Welding, Grinding, Cutting modes included
- Includes patented **370 Speed Dial** ratcheting headgear system
- Switching speeds of 0.25 ms
- Solar & Lithium Batteries (CR2032)
- 4 sensor technology for optimal performance
- Outer lens at 1.5 mm thickness

Customer Service +386 1 477 67 84  
[www.jacksonsafety.eu](http://www.jacksonsafety.eu)

The welding community is fully aware that welding fumes are carcinogenic. Our PAPR system achieves the best in class respiratory protection with TH3 rating. Our welding helmet offers best possible optical ratings of 1/1/1/1 and comfort. An almost unbeatable system. When welders are confident that their PPE is designed with their health and safety in mind they can concentrate on the job at hand, achieving maximum productivity.

- Simple control with only one button
- Operation time up to 10 hours with a new filter P R SL and airflow 160 l/min
- Adjustable airflow 160 lpm and 210 lpm
- Rechargeable Li-ion battery
- "Smart" battery charger indicates when charging is complete and will not overcharge
- Quick charge 3-4 hours
- Constant flow regardless of battery level
- Audiovisual and vibrating alarm indicating low airflow and low battery charge
- Breathing hose with flame retardant cover - protection from sparks and spatter
- Ergonomic shape and low weight - only 980 g
- Slim profile of the unit - only 65 mm
- Unit is CE Certified

J5205 + J5225

**More details about the Quad 500 face shield on page 98.**

CE UK  
1024 8503  
EN 12941 TH3 P R SL

- All Quad 500 products have been designed to offer maximum above-the-neck face protection, including an extra-large molded polycarbonate window featuring our premium anti-fog coating
- For added protection, the molded window is completely framed on the sides and chin and features an extra-large crown
- The Quad 500 offers exceptional panoramic views with virtually no distortion
- Ideal for grinding, cutting, oxy/acetylene cutting, plasma cutting, brazing and more
- The Quad 500 face shield is also available with an exclusive, **extra-large flip-up/flip-down IR window** for added eye protection when used in applications producing infrared hazards
- It's easy and safe—by keeping the Quad 500 clear window in the down position at all times, the operator can flip the IR shaded window up or down, providing uninterrupted face protection during cutting and grinding operations
- Flip windows available in:
  - **Shade 5 IR** for oxy/acetylene cutting, brazing, and plasma cutting
  - **Shade 8 IR** for oxy/acetylene welding and plasma cutting
- Both the clear and flip windows feature detents that lock in both the up and down positions
- Designed to be used with most goggles, respirators, and all safety glasses

- Large controls - Easy to use with oversized gloves
- In combination with soft hood - **medical use, painting and spraying**
- Unit is CE Certified

- Extremely light weight
- Maximum comfort
- Positive pressure system reduces user fatigue
- Superior protection
- Fitted with an impact rated polycarbonate visor
- Clear vision
- Protection from Aerosol Generated Particulate and splash protection
- The hood does not require a face fit; therefore, complexity of fitting is reduced, which is highly desirable in Pandemic situations
- It is suitable for all face shapes including people with facial hair, making the system extremely versatile
- The hood is manufactured from tough washable materials which:
  - allows a full clean down after use
  - or it may be disposed of in clinical waste

## INGRESS PROTECTION RATING

IP 54

- Protected against solid objects greater than 50 mm such as a hand.
- Protected against solid objects greater than 12.5 mm such as a finger.
- Protected against solid objects greater than 2.5 mm such as screwdriver.
- Protected against solid objects greater than 1 mm such as a wire.
- Dust protected. Prevents ingress of dust sufficient to cause harm.
- Dust tight. No ingress of dust.

- Protected against vertically falling drops of water.
- Protected against direct sprays of water up to 15° from the vertical.
- Protected against direct sprays of water up to 60° from the vertical.
- Protected against water splashed from all directions.
- Protected against low pressure jets of water from all directions.
- Protected against strong jets of water.
- Protected against the effects of temporary immersion between 15 cm and 1 m for 30 minutes.
- Protected against long periods of immersion under pressure.

### MULTI CHARGING UNIT

**Accommodates up to  
5 batteries**

- LED charge indicator for each charged battery:
  - **Red** - battery empty and charging,
  - **Green** - battery full or not connected
- Easy snap in / snap out battery placement into charging station
- No clutter with chargers' cables
- Easy single charger replacement in case of failure
- Main cable length: 2m
- Main power switch
- Frame material: plexi-glass, color: black
- Dimensions WxDxH: 370mm x 175mm x 173mm, Weight: 2400 g
- Operating temperature: 0 to 45°C
- Storage temperature: -20 to + 60°C
- Humidity: 10% to 90% relative
- Warranty: 2 years
- EU and UK version available
- Batteries not included

# WELDING PROTECTION PPE ...

## WELDING HELMETS AND WELDING FILTERS

Designed to perform in a wide range of welding conditions, Jackson Safety® Helmets are available in a variety of styles and features.

Choose from a selection of filters — from **passive** to **digital ADF** platforms and numerous graphic designs to reflect personal style.

## PASSIVE VS. AUTO-DARKENING FILTER HELMETS

**Passive helmets offer great protection.**

**Auto-Darkening Filters offer protection and productivity.**

Both passive and Auto-Darkening Filter (ADF) welding helmets provide excellent eye protection. Research shows that ADF helmets also offer impressive productivity gains, as well as greater user comfort.

### ADDED BENEFITS OF AN ADF

#### Increased accuracy

Because the welder can always see what he's doing, and start in exactly the right spot.

#### Increased comfort

By eliminating the repetitive "lifting and nodding" that can cause neck strain.

#### Increased protection

From injuries caused by welding, chipping or grinding in the proximate area.

#### Increased peace of mind

Because even if the ADF should not become active during an arc, it still protects eyes from serious damage.

#### Increased productivity

By eliminating the time it takes to lift and nod the helmet before and after each weld.

### True Color ADF

JACKSON SAFETY<sup>®</sup> auto-darkening filters with 1/1/1/1 optical classification provide:

### A clear view from various angles

Which can reduce eye fatigue (the need to move, adjust and refocus).

### Superior optical quality

Allows you to do your most creative and productive work.

Welders at all experience levels know the value and essential protection requirements of the right helmet and filter for the right job. That's why we provide a range of welding helmets and filters with features that are just right for you.

**SUPER KOOL™  
HIGH TEMPERATURE  
PAINT COATING**

### LIGHTWEIGHT

Maximum comfort  
and safety

### EXTREMELY DURABLE

Molded from  
Super Tuff nylon

### VERSATILITY

Lift front with  
mineral glass Shade 10

Made in USA

Combinable with  
AIRMAX+

Optimum Safety

**B** Rated Impact Resistance

Jackson Safety 280 Series Welding Helmet has the traditional "Bucket Style" design that is lightweight and extremely durable. The 280 Series contains a rigid bib that deflects welding spatter making it ideal for various welding applications.

- Jackson Safety 280 Series welding helmet has been an industry leader for decades
- Made in the USA, the 280 Series is a traditional bucket style welding helmet
- Molded from **Super Tuff nylon** – lighter than fiberglass and extremely durable
- Patented **Sel-Snap lens retention system** provides easy loading of filter, cover and protective plates
- Lift front comes standard with spring loaded positive lock feature
- Our proprietary **SUPER KOOL SILVER COATING** keeps the helmet **30% cooler** than standard helmets and sheds spatter without burning
- Provides maximum operator comfort and safety
- **"Quick-release"** ratchet headgear suspension with sweatband included
- Specially designed shape for use with cartridge respirators

Jackson Safety<sup>®</sup> ADF Welding Mask

## REBEL<sup>™</sup>

ADF Welding/Goggle Mask - Digital

### LIGHTWEIGHT

Maximum comfort and safety

### ONE-PIECE DESIGN

Protects against  
UV and IR leakage

### VERSATILITY

Fit under hard hats &  
over eyewear

CONVENIENT  
PUSH-BUTTON  
DIGITAL CONTROLS

The all new, exclusive Jackson Safety<sup>®</sup> Rebel<sup>™</sup> welding mask is a great addition to our welding program, incorporating modern ADF technology. The Rebel<sup>™</sup> is a lightweight product designed to reduce neck strain. In addition, the Rebel is designed to fit under most hard hats without the need for adaptor brackets, making it extremely versatile.

- New Rebel ADF masks are an ideal product for intermittent welding applications such as: automotive, fleet and agricultural equipment repairs; DIY projects; general shop applications
- Constructed with the goggle / face shield as a one piece integrated unit; eliminating spark & spatter risks to front of face
- The Rebel's soft, comfortable goggle body conforms very well to face contours, reducing UV/IR ray leakage concerns
- Specially designed to fit over most prescription eyewear – no cheater magnifying lens needed!
- Features a replaceable clear outer lens for added ADF protection (46930–5 pack)
- No adapters needed to use with hard hats
- Low TIG amp rated >10 amps
- Solar panel recharges CR 2450 replaceable battery – each battery lasts up to 1,300 hours before replacement is necessary

Jackson Safety setting NEW standards for  
*flip welding helmet design & comfort*

- Easy-to-use lift mechanism reveals a 297 sq. cm clear extra-large polycarbonate face shield for grinding operations
- Flip system ensures maximum safety – provides uninterrupted face protection when switching from welding to grinding operations
- High quality **True Color ADF** provides a full **60 square cm** viewing area
- Features an extra-large face shield which provides superior peripheral vision
- Welding, grinding, cutting modes functions are standard features
- 4 sensor technology for optimal performance
- Auto-darkening filter meets **1/1/1/1 optical clarity** standard, the highest in the industry
- Includes patented **370 Speed Dial** ratcheting head-gear system
- Switching speeds of 0.1 ms
- Welding helmet with Mineral glass Shade 10 available as custom order

**TRANSLIGHT™  
SERIES**

Jackson Safety setting NEW standards for  
*large viewing area* welding helmets

The Translight™ Series is defined philosophies by our innovative global design. We mix industry leading features with new advancements in technology to transcend the welding industry.

- Translight™ shell has a sleek modern design
- Helmet is lightweight & ergonomically balanced to reduce stress & fatigue
- Auto Darkening Filter meets **1/1/1/1 Optical Clarity** standard, the highest in the industry
- Includes an external grind button, so end users can switch modes with ease
- Features the new external shade adjuster to help aid in visual focus
- The new shade adjuster can finely tune shades up to +/- 1 full shade with .2 shade adjusting increments
- Welding, Grinding and Cutting can be done with this versatile ADF
- Includes patented **370 Speed Dial** ratcheting headgear system
- Advanced digital controls are a great QOL enhancement for welders
- Switching speeds of 0.2 ms

## FREEDOM

- Lightweight and ergonomically balanced to reduce stress and fatigue
- 4 arc sensors provide maximum eye protection and coverage
- Excellent switching speeds 0,15 ms minimizes eye-strain
- Extended front increases protection from sparks and slag
- Comes complete with an internal grind mode
- Advanced digital controls provide intuitive interface
- Packaged in an attractive full-color box
- CE and UKCA certified, meets or exceeds ANSI Z87.1 and CAN/CSA Z94.3 standards

## 370 SPEED DIAL

**EXCLUSIVE!**

### Headgear system

Our patented Jackson Safety® 370 Speed Dial™ offers the fastest, easiest, and most efficient ratcheting headgear system in the industry today! The 370 Speed Dial™ incorporates two unique designs—an oversized “speed dial” ratcheting adjuster knob, and a patented “quick-fit” rear headband that swivels up and down. Together, these two features combine to achieve a perfect fit every time, increasing safety, productivity and satisfaction. Try any of our industry-leading Jackson Safety® products that incorporate our famous 370 Speed Dial™ and experience the difference yourself!

- Engineered detents lock equipment in the up and down position and eliminate “creep”
- Fine tooth ratcheting mechanism guarantees a more precise fit without overtightening
- Lock-nut feature keeps components intact even when the bracket is loosened
- Three-position slider adjusts distance of the lens from your eyes for precise vision
- Extra wide replaceable fabric sweatband for maximum comfort and convenience

**370™**  
**SPEED DIAL**

#### EASY GRIP-EASY TURN

Rotation allows instant loosening and tightening of the headgear

The World's Greatest Ratcheting Headgear System

#### Oversized soft rubber adjuster dial

Easy to find and grab even when wearing gloves

#### Easy to adjust pin-lock upper adjustment band

Allows proper positioning of face shield

#### Patented “quick-fit” rear swivel headband

Quickly adjusts the suspension to the user's head for superior comfort, convenience, and productivity

# WELDING FILTERS

## SAFETY FIRST

### CE certified

All ADFs are CE certified and most of them **exceed required protection** levels by large margin (switching speed, UV/IR protection).

### Protection against UV and IR light

ADFs are designed so that regardless of dark or clear state welder's eyes are **always protected** against harmful UV and IR light occurring during welding process.

### Excellent switching speed

Switching speed and detection of welding arc **prevent light flash** from reaching welder's eyes.

### Safe in any weld process

Variable shade level, sensitivity and delay allow for **adjusting protection** parameters to any weld process.

## WIDE SELECTION OF PRODUCT PERFORMANCE LEVELS AVAILABLE

A / Eine / Une Marque / Una Marca / Un Marchio

Brand / Marke

## EASE OF WORK

**ADFs can be adjusted to any type of welding** by selecting shade level, sensitivity to welding arc and opening time delay.

Selectable operation mode (Weld/Grind/Cut) allows for permanent eye protection during the whole metal processing operation.

Increased productivity as both hands can be used.

### Simple welding tasks

Mineral glass or single shade ADFs.

### Entry level welding tasks

Limited shade range, average speed and window size – cost effective.

### Professional tasks

All required features at moderate cost with added functionality.

### Extremely demanding tasks

Highest optical performance, switching speed, sensitivity range and various modes of operation.

## ADDITIONAL FEATURES

### Highest speed ADFs

Surface mode technology on some models.

### ADF power source selection

- **Replaceable batteries** - alkaline or lithium.
- **Fixed batteries** - No battery changes for the lifetime of the product.
- **Solar cells** for battery life extension.

### Low weight and ultraslim ADFs

Reduced weight and ultraslim ADFs available.

### Warranty

1, 2 or 3 year warranty depending on ADF model.

## PASSIVE WELDING FILTERS - MINERAL GLASS

- Passive welding filters are made of toughened mineral glass
- 110 x 90 mm
- Wide range of DIN shades 9, 10, 11, 12

| Product No | Description                                      | Case Qty/MOQ |
|------------|--|--------------|
| J8101      | WF10 Welding Passive Filter 110 x 90 mm Shade 9  | 200          |
| J8102      | WF10 Welding Passive Filter 110 x 90 mm Shade 10 | 200          |
| J8103      | WF10 Welding Passive Filter 110 x 90 mm Shade 11 | 200          |
| J8104      | WF10 Welding Passive Filter 110 x 90 mm Shade 12 | 200          |

Toughened mineral glass

## PC MAGNIFYING LENSES

- Designed for use with welding helmet filters
- Offers reliable protection for eyes from impact whilst offering + optics
- Available in wide range of diopters: 1.0, 1.5, 2.0, 2.5
- Special magnifying lens holder may be required

Offers reliable protection for eyes from impact whilst offering + optics

| Product No | Description                             | Case Qty/MOQ |
|------------|---|--------------|
| J2741      | Magnifying Lens 1.0 Clear (107 x 51 mm) | 6            |
| J2743      | Magnifying Lens 1.5 Clear (107 x 51 mm) | 6            |
| J2745      | Magnifying Lens 2.0 Clear (107 x 51 mm) | 6            |
| J2747      | Magnifying Lens 2.5 Clear (107 x 51 mm) | 6            |

# WELDING BLANKETS

**JACKSON**<sup>®</sup>  
SAFETY

## How do I choose the right welding blanket for the job?

With so many different materials, sizes and functions, it's very difficult to decide what type of welding blanket you might need for the job. When you are unsure of the right style for you, it's good to start with some basic questions:

### What temperatures are you working with?

- **Working Temperature** – The maximum temperature a blanket can withstand for the entire duration of the application. Sometimes this is referred to as "service temperature" or "constant temperature."
- **Intermittent Temperature** – The temperature the fabric can withstand for short durations without damage.

### What should I know about different fiberglass coatings?

There are many different coatings available each with its own specific properties. Listed below are some of the most common styles:

| PU   | Fiberglass uncoated  | Vermiculite  |
|--|--|--|
| <ul style="list-style-type: none"> <li>• Enhanced abrasion and tear resistance</li> <li>• Soft to the touch</li> </ul> | <ul style="list-style-type: none"> <li>• Easy to cut and can conform to complex curves</li> <li>• Lightweight and soft material</li> </ul> | <ul style="list-style-type: none"> <li>• Advanced abrasion resistance</li> <li>• Can be used without gloves</li> </ul> |

### Which welding blankets are best for vertical and horizontal use?

Lighter duty welding blankets can be used vertically to offer protection against welding sparks and slag. If you are using a blanket horizontally or flat, it is recommended to use a heavier-duty blanket with a higher maximum temperature as the spatter has the potential to rest directly on the material.

|                | LIGHT DUTY   |   | MEDIUM DUTY                          | HEAVY DUTY  |
|----------------|--|---|--------------------------------------|---|
| Product Series | Uncoated Fiberglass Blanket  | Fiberglass PU Coated Blanket  | Vermiculite Blanket                  | Silica Cloth Blanket  |
| Working Temp   | 550°C  | 550°C   | 650°C                                | 1000°C  |
| Colors         | White  | Grey  | Black                                | Tan   |
| Weight         | 612g (18oz)  | 470g (14oz)   | 816g (24oz)                          | 680g (20oz)   |
| Applications   | Heat treating, low thermal conductivity, anti corrosion, and is a base material for coating, impregnating and laminating | Slag resistance, spark resistance and incidental resistant to flames from cutting torches | Abrasion resistance, thermal barrier | Used for thermal and high heat requirements; can be used at 1000°C, maximum at 1300°C |

NOTE: Temperatures and applications are intended as a guideline only and not a guarantee of performance. SureWerx recommends the use of welding blankets in multiple layers to attain proper molten metal and radiant heat protection. It is the user's responsibility to monitor the activity and use of blankets/high-heat materials at all times. The user must inspect the blankets before use. Abnormal wear and tear should be removed from service.

## UNCOATED FIBERGLASS BLANKET

- Low irritating yarns prevents itch
- Grommets allow easy hanging in vertical applications
- **550°C working temperature / 700°C maximum temperature**

| Product No | Product Type | Width | Length | Thickness | Case Qty/MOQ |
|------------|--------------|-------|--------|-----------|--------------|
| J2711      | Blanket      | 1 m   | 1 m    | 0.75 mm   | 20           |
| J2712      | Blanket      | 1 m   | 2 m    | 0.75 mm   | 10           |
| J2713      | Blanket      | 2 m   | 2 m    | 0.75 mm   | 5            |
| J2714      | Blanket      | 3 m   | 2 m    | 0.75 mm   | 5            |
| J2715      | Roll         | 1 m   | 25 m   | 0.75 mm   | 1            |

### LIGHT DUTY PROTECTION

Ideal for welding, insulation, and jacketing applications

## FIBERGLASS PU COATED BLANKET

- Excellent abrasion and tear resistance
- Grommets allow easy hanging in vertical applications
- **550°C working temperature / 700°C maximum temperature**

| Product No | Product Type | Width | Length | Thickness | Case Qty/MOQ |
|------------|--------------|-------|--------|-----------|--------------|
| J2716      | Blanket      | 1 m   | 1 m    | 0.47 mm   | 20           |
| J2717      | Blanket      | 1 m   | 2 m    | 0.47 mm   | 10           |
| J2718      | Blanket      | 2 m   | 2 m    | 0.47 mm   | 5            |
| J2719      | Blanket      | 2 m   | 3 m    | 0.47 mm   | 5            |
| J2720      | Roll         | 1 m   | 25 m   | 0.47 mm   | 1            |

### LIGHT DUTY PROTECTION

Provides protection from most welding sparks, spatter and slag

## VERMICULITE BLANKET

- Advanced abrasion resistant properties
- Grommets allow easy hanging in vertical applications
- **650°C working temperature / 800°C maximum temperature**
- Heat is dispersed evenly across the surface significantly boosting temperature rating

| Product No | Product Type | Width | Length | Thickness | Case Qty/MOQ |
|------------|--------------|-------|--------|-----------|--------------|
| J2721      | Blanket      | 1 m   | 1 m    | 1 mm      | 20           |
| J2722      | Blanket      | 2 m   | 1 m    | 1 mm      | 10           |
| J2723      | Blanket      | 2 m   | 2 m    | 1 mm      | 5            |
| J2724      | Blanket      | 3 m   | 2 m    | 1 mm      | 5            |
| J2725      | Roll         | 1 m   | 25 m   | 1 mm      | 1            |

### MEDIUM DUTY PROTECTION

Ideal for welding, furnace applications, pipe wrapping and machinery protection

## SILICA CLOTH BLANKET

- Pliable material can easily wrap around complex curves
- Grommets allow easy hanging in vertical applications
- **1000°C working temperature / 1300°C maximum temperature**
- Protection from heavy duty slag and molten spatter

| Product No | Product Type | Width   | Length | Thickness | Case Qty/MOQ |
|------------|--------------|---------|--------|-----------|--------------|
| J2726      | Blanket      | 0.94 m  | 1 m    | 0.60 mm   | 20           |
| J2727      | Blanket      | 1 m     | 1.76 m | 0.60 mm   | 10           |
| J2728      | Blanket      | 2 m     | 1.76 m | 0.60 mm   | 5            |
| J2729      | Blanket      | 3 m     | 1.76 m | 0.60 mm   | 5            |
| J2730      | Roll         | 0.914 m | 25 m   | 0.60 mm   | 1            |

### HEAVY DUTY PROTECTION

Ideal for use as a heat shield, furnace blanket, extreme welding applications and other thermal barrier needs

HEALTH SAFETY PRODUCTIVITY

Finding a better way

# WELDING CURTAINS

**JACKSON**<sup>®</sup>  
SAFETY

## ADVANTAGES OF TRANSPARENT WELDING CURTAINS

### UV Protection

Protects bystanders from UV and blue light radiation.

### Minimizes noise

Creates a sound barrier to minimize noise discomfort and the risk of hearing impairment for nearby workers.

### Clear division

Creates a designated space specifically for welding operations while still maintaining visibility.

### Injury prevention

Prevents sparks and spatter from injuring bystanders while self-extinguishing properties keep the curtain from burning.

### Easy installation

Curtains come grommeted, and when used with frames, are easily hung and can be rearranged.

### Reduced fumes and vapors

Creates a containment barrier that allows for more efficient fume extraction.

### Built with grommets for easy hanging

### Durable material resists tearing

### Flame, mildew, and water resistant

### All curtains meet or exceed California Fire Marshall standards or NFPA 701 requirements for flame resistance

### Available in orange and green 14-mil transparent material

## Why Choose Orange?

- Puts light back into the welding area to help increase worker productivity
- Can be used around MIG, TIG, arc, and plasma operations
- Excellent for use in assembly areas

| Product No | Width      | Length     | Weight (per sq m) | Thickness | Color  | Amp Usage   | Case Qty/MOQ |
|------------|------------|------------|-------------------|-----------|--------|-------------|--------------|
| 36307      | 6' (1.8 m) | 8' (2.4 m) | 13 oz.            | .014"     | Orange | Medium-High | 12           |
| 36292      | 6' (1.8 m) | 6' (1.8 m) | 13 oz.            | .014"     | Orange | Medium-High | 12           |
| 37606      | 6' (1.8 m) | 4' (1.2 m) | 13 oz.            | .014"     | Orange | Medium-High | 12           |

## Why Choose Green?

- Decreases total light from the welding arc
- Ideal when visibility and light reduction are necessary

| Product No | Width      | Length     | Weight (per sq m) | Thickness | Color | Amp Usage   | Case Qty/MOQ |
|------------|------------|------------|-------------------|-----------|-------|-------------|--------------|
| 36315      | 6' (1.8 m) | 8' (2.4 m) | 13 oz.            | .014"     | Green | Medium-High | 12           |
| 36299      | 6' (1.8 m) | 6' (1.8 m) | 13 oz.            | .014"     | Green | Medium-High | 12           |
| 37700      | 6' (1.8 m) | 4' (1.2 m) | 13 oz.            | .014"     | Green | Medium-High | 12           |

## WELDING CURTAIN FRAME

- Bolted corner clamps for extra stability
- Pre-drilled holes for casters
- 19-gauge steel construction ideal
- Powder coated enamel finish for excellent rust and abrasion resistance for daily rigorous use
- Platform "T" legs reduce slipping and twisting of the unit

### Stur-D-Screen frames and recommended curtains

## PIPE MARKERS

### CENTERING HEAD – MAGNETIC FOR THOSE DIFFICULT ANGLES

- Fitted with an **adjustable dial bubble protractor**, this timeefficient mechanism can be used to locate and mark centre points on a pipe or specific angles.
- The PipePro Centring Head has been engineered with a **“Y” shaped body design** and a **2-1/2° increment degree-dial that rotates 360°’s**.
- The centre pin has been produced using **CNC manufactured Hardened and tempered Carbon Steel**.
- Magnets in the legs allow a **hands-free approach**, encouraging a safer and more accurate layout mark.

| Product No | Description                      | Case Qty/MOQ |
|------------|----------------------------------|--------------|
| J1979      | PipePro Centering head AL medium | 1            |
| J1980      | PipePro Centering head AL large  | 1            |

Magnetic

## LEVELS AND FLANGE ALIGNING TOOLS

### MULTI ANGLE SPIRIT LEVEL – MAGNET CLAMPING

- The PipePro Spirit Level is a lightweight, durable and multi purpose level which includes an **adjustable protractor dial** and **magnetic base** to easily determine and set up angles.
- There are **two stationery vials** placed at 90° angles of each other which can be read from any surface of the level.
- This level has a **12” ruler** along its base for easy and precise measurements.
- Magnets on the bottom of the level allow a **hands-free approach**, encouraging a safer and more accurate work environment.

| Product No | Description            | Case Qty/MOQ |
|------------|------------------------|--------------|
| J1981      | PipePro Aluminum level | 1            |

Magnetic

### FLANGE ALIGNMENT TOOL WITH VIAL LEVEL

- The PipePro Flange Alignment Tool is a **multifaceted pipefitting tool** used for alignment and finding/setting angles. Flange pins included.
- The Pipe Flange Aligner saves valuable fit-up time (up to 50% more efficient) while eliminating the frustration of balancing a level on the pins.
- Produced using **CNC manufactured Hardened and tempered Carbon Steel**.
- **Bubble vials** in both the pins and straight bar allow for perfect alignment.

| Product No | Description                 | Case Qty/MOQ |

Finding a better way

## PIPE MARKERS

### CONTOUR MARKERS

The Contour Marker consists of an X frame, calibrated protractor, and a triple-jointed marking arm adjustable to the line to be scribed. A soapstone crayon is required for each radius marker (not supplied). Contour marker is a compact tool design, time saving tool used to lay out pipe and structural steel joints. Ideal for quick precise layout of laterals at any angle, tees, wyes, crosses, elbows - any type or size of joint (for use on same size pipe intersections). Eliminates mathematical formulas. Can be used to lay out pipe from 1-1/2" (3.8 cm) to 18" (45.7 cm) diameter or structural steel members up to 18" (45.7 cm) in a right side up or upside down position.

| EU Prod. No | US Prod. No | Description         | Pipe Diameter                           | Case Qty/ MOQ |
|-------------|-------------|---------------------|---|---------------|
| J1874       | 14771       | #1 Marker standard  | 1.5" (3.8 cm) to 18" (45.7 cm) diameter | 1             |
| J1875       | 14772       | #2 Adaptor standard | Use with #1 Contour Marker              | 1             |
| J1877       | 14773       | #4 Marker jumbo     | 8" (20.3 cm) to 48" (121.9 cm) diameter | 1             |
| J1878       | 14774       | #5 Adaptor jumbo    | Use with #4 Contour Marker              | 1             |

### RADIUS MARKERS

Radius Markers have sturdy friction joints to maintain rigidity and accuracy, and are made from lightweight, rustproof aluminium for extended life. A soapstone crayon is required for each radius marker. Models available in 4 sizes for scribing circles up to 80°.

| EU Prod. No | US Prod. No | Description            | Pipe Diameter                  | Case Qty/ MOQ |
|-------------|-------------|------------------------|--------------------------------|---------------|
| J1884       | 14780       | Radius marker mini     | Up to 8" (20.3 cm) in radius   | 1             |
| J1885       | 14781       | Radius marker small    | Up to 20" (50.8 cm) in radius  | 1             |
| J1886       | 14782       | Radius marker standard | Up to 24" (61 cm) in radius    | 1             |
| J1887       | 14783       | Radius marker jumbo    | Up to 40" (101.6 cm) in radius | 1             |

### CENTERING HEADS

Centering Heads aid in the settings of centerlines, establishing angles and marks for butt-ins, locating points inside pipes and tanks, laying out keyways and measuring declivity.

| EU Prod. No | US Prod. No | Description                | Pipe Diameter                          | Case Qty/ MOQ |

## PROTRACTOR

This 90-degree protractor has a matching locking lever to set and hold the tool at the desired angle. It is equipped with a 5/8 in. by 10 in. tapered arm to complete finding of angles or desired bends, or to determine any portions of elbows. The tool is mounted in a 3/4-in wide frame with a 3/8-in. by 6-in cast-in rod. It comes with a 25-pound pull magnetic base for holding the protractor frame in position. The unit can be used manually or with a magnetic base.

| EU Product No | US Product No | Description | Case Qty/MOQ |
|---------------|---------------|-------------|--------------|
| J1882         | 14778         | Protractor  | 1            |

J1882

## CIRCLE ECLIPSE PROJECTOR

Ideal for creating perfect circles, ellipses or oblong circles on any irregular flat or round surface. Can be used to lay out lateral intersections of different diameter pipes, or to project circles from 1-1/2" to 18" diameter on flat surfaces intersecting at angles from 0-70 degree from vertical. Features a protractor with sliding rod and an adjustable lever to lock in the specified layout. Strong, 20-pound pull magnetic base holds the Projector in position during layout. Durable web strap (included) holds the unit secure on non-magnetic surfaces and can be used on either side of the vertical column. The Projector is equipped with a soapstone crayon and also works with chalk, pencil or steel scribe.

| EU Product No | US Product No | Description              | Case Qty/MOQ |

J1888

## MULTI TRAMMEL HEADS

Using standard half inch pipe as a trammel bar, heads feature radius set points cast in alignment with marking pointers for easy setting. Equipped with 1/4" (0,6 cm) screws and squared on the back side of perpendicular alignment. The stationary head holds a 1/4" (0,6 cm) case hardened center point. Moveable head has a 1/8" (0,3 cm) steel scribe hardened. Marks from 1-1/2" circle to any diameter needed, depending on length of pipe used as a trammel bar. Allen wrench, soapstone, scribe and pointer also included.

| EU Prod. No | US Prod. No | Description             | Pipe Diameter | Case Qty/MOQ |
|-------------|-------------|-------------------------|---------------|--------------|
| J1890       | 14785       | #19 Multi trammel heads | All           | 1            |

J1890

## LEVELS AND FLANGE ALIGNING TOOLS

### PRO-MAG LEVEL

A lightweight, easy to use tool for determining angles. Unit is ideal for the pipe fitter, welder, jig builder or anyone who has to determine angles or do setup work. Includes two cast-in 25-pound (11.3 kg) pull magnets that hold securely to any steel surface. Unit has a 360° adjustable DSL with two 90° quadrants graduated in 2-1/2° increments. Cast in tables are used to convert degree-of-angle to rise-in-inches-per-foot or millimeters-per-meter. A groove on the bottom edge permits use on a small pipe.

| EU Prod. No | US Prod. No | Description      | Case Qty/MOQ |
|-------------|-------------|------------------|--------------|
| J1881       | 14777       | #8 Pro-mag level | 1            |

J1881

## DIAL ANGLE FLANGE LEVEL

A versatile tool that can be used as a dial degree utility level or, with attachments, for two holding flange alignment.

| EU Prod. No | US Prod. No | Description  | Case Qty/MOQ |
|-------------|-------------|--|--------------|
| J1891       | 14786       | #20 Dual-Angle Flange Level—Nonmagnetic; can be used on PVC Pipe | 1            |

J1891

## UNIVERSAL LEVEL

Universal level is a multi-purpose tool that features a 360° adjustable protractor dial that ensures accurate leveling and permits setting a predetermined pitch of a string of pipe, setting the angle of laterals to a precise degree, trueing vertical runs & two-holding flanges. For structural steel workers, the powerful holding magnets provide an extra hand. Electricians will find the level useful in laying out and lining up heavy conduit.

| EU Prod. No | US Prod. No | Description         | Case Qty/MOQ |
|-------------|-------------|---------------------|--------------|
| J1904       | 14796       | #33 Universal Level | 1            |

J1904

## PIPE FLANGE ALIGNER

Fast, accurate pipe construction is possible with this self-determining flange aligning tool. The Aligner inserts easily into pipe, centers snugly against the inside pipe diameter and automatically aligns with the pipe axis.

| EU Prod. No | US Prod. No | Description             | Case Qty/MOQ |
|-------------|-------------|-------------------------|--------------|
| J1883       | 14779       | #10 Pipe Flange Aligner | 1            |

J1883

## UNIVERSAL LEVEL

The DSL is an adjustable bubble protractor used with a number of Curv-O-Mark Tools. The protractor covers 180 degrees through two 90 degree quadrants, reading in 2.5 degree increments. The bubble is cast in the aluminium dial.

| EU Prod. No | US Prod. No | Description                  | Pipe Diameter                | Case Qty/MOQ |
|-------------|-------------|------------------------------|------------------------------|--------------|
| J1905       | 14797       | Contour Dial-Set-Level (DSL) | Adjustable Bubble Protractor | 1            |

J1905

## FLANGE ALIGNER BASE

Removes the difficulty of flange aligning and squaring. Tool holds a square in the needed position without tying up one's hands. Base is notched at either end for ease in aligning on the center line of the pipe. Two 25-pound (11.3 kg) pull, cast-in magnets for holding either a flat horizontal or vertical position. Base accepts either leg of a standard or combination aluminum square and works on pipe diameters from 1"+, requiring only the extension of the legs of the square being used to accommodate larger diameters.

| EU Prod. No | US Prod. No | Description             | Case Qty/MOQ |
|-------------|-------------|-------------------------|--------------|
| J1903       | 14795       | #32 Flange Aligner Base | 1            |

J1903

CENTERING PIN

A hardened steel pin for use with the standard centering head. Suitable for marking, but should not be used as a center punch.

| EU Prod. No | US Prod. No | Description   | Case Qty/MOQ |
|-------------|-------------|---------------|--------------|
| J1906       | 14798       | Centering pin | 1            |

J1906

WRAP-A-ROUND

Inexpensive tools for marking straight lines around pipe; made from flexible gasket material, providing resistance to both heat and cold. All Wrap-A-Rounds are available in two colours. These designate material type and service temperature. GG (grey) material is used for high temperature applications (up to 550°F) and B (black) material is used for temperatures up to 350°F. Both material types are asbestos free.

# ARC FLASH PPE

## Why Oberon?

The original innovator of Arc Flash products, Oberon is dedicated to engineering, testing standards, and being American made. We can't stop and won't stop providing for our customer's safety.

## Testing

We help write ASTM and ANSI Standards. We also lead in our research, product development, laboratory testing and manufacturing processes.

## Innovation

With Oberon's "nearly clear" shield technology, you can now see all the colors of the wires you are working on.

## Made in USA

We aren't just made in the U.S., we are 100% manufactured in house. As engineers, we develop innovative electrical safety solutions.

## THE POWER OF CLARITY True Color Grey (TCG)

### What is TCG?

Struggling to safely see the wire colors while still protecting yourself from an arc?

Our **True Color Grey (TCG)** product line combats that problem. It's finally solved the biggest problem electricians face when wearing appropriate arc flash protection, **the issue of color distortion through protective shields.**

#### NEARLY CLEAR SHIELD

#### PATENTED TECHNOLOGY

#### ARC FLASH PROTECTION

#### CLEARLY DEFINE COLORS

#### ZERO COLOR DISTORTION

Oberon is not just a manufacturing company, we are an engineering company that develops innovative electrical safety solutions. At Oberon it is our mission to protect the welfare of the individual while adding value to a company's overall safety program.

Oberon™ Arc Flash Protection

# ARC FLASH FACE SHIELD

High Performance Arc Flash Protective Face Shield Kit

- Complies with **GS-ET-29:2019-06** (Electric Arc, Box Test, Class 2 and Visible light transmittance (VLT), Class 2), **EN 166:2001** (Optical class 1, Increased robustness (S), Protection against high-speed particles (medium energy impact) (B), Resistance to surface damage by fine particles (K), Protection against short circuit electric arc (8)) and **EN 170:2002** (Protection class 2C-2)
- Oberon's innovative **True Colour Grey (TCG™)** arc flash face shield features a patented nearly clear technology that allows a **maximum color acuity** while performing common electrical work tasks.
- Kit includes TCG™ G2 shield with side shield extenders, lower chin guard **anti-scratch** and **anti-fog coating** and attachment clips (available for different caps).
- Material: Polycarbonate
- Color: Clear Grey (TCG™)
- Thickness: 2,6 mm
- Weight: 425 g
- Arc Rating (AR<sub>LIM</sub>):
  - 17 cal/cm<sup>2</sup>
  - 25 cal/cm<sup>2</sup>
- Made in the USA

## Arc Flash Hood, Coat, and Bib Suit Kit

- Complies with **GS-ET-29:2019-06** (Electric Arc, Box Test, Class 2 and Visible light transmittance (VLT), Class 2), **EN 166:2001** (Optical class 2, Increased robustness (S)) and **EN 170:2002** Protection class 2C-2
- Complies with **IEC 61482-2:2018** against the risk of burn provoked by electrical arc of 7kA (APC=2) according to the standard EN 61482-1-2:2014
- Lightweight suit is made from a proprietary blend of arc rated, **inherently flame resistant, aramid fibers**.
- Nearly clear TCG Series hood window provides **100% true color acuity** and includes **anti-fog** and **anti-scratch** resistant coatings. Hood comes equipped with an optional ventilation system and LED light for maximum comfort and vision while working.
- Arc flash face shield is made from a durable polycarbonate for long lasting protection from harsh environments.
- Knit cuff, dual-stage zipper front closure for easy on/off.
- Adjustable waist and suspenders for a customized fit.
- Reflective day/night striping on arms and legs for increased visibility.
- Color Black
- Made in the USA

# FACE & EYE PROTECTION PPE

Used in conjunction with protective eyewear, Jackson Safety brand face shields provide a high degree of on-the-job protection for **high heat applications, grinding, flying debris, and splash protection**. We offer a wide variety of material types and lens tints for extensive coverage.

Please note: Always wear safety glasses when using face shields.

## EYEWEAR IS MANDATORY

In many workplace environments, safety eyewear is mandatory due to the range of day-to-day tasks that can cause serious injuries to the eyes. Also safety eyewear is an important part of many employees' everyday workwear.

**Safety glasses** provide protection from **dust, dirt, flying debris, and other projectiles** created when work operations involve cutting, hammering, crushing, and other related operations.

**Safety goggles** besides providing protection from **dust, dirt, flying debris, and other projectiles**, also provide protection from **splashes and burns**.

## FACE SHIELD - ANOTHER LAYER OF PROTECTION

Used in conjunction with protective eyewear, Jackson Safety® Face Shields provide a high degree of on-the-job protection for **heat applications** as well as **grinding, flying debris, splash protection, and more**.

## MATERIAL TYPES

### PET

- A low-cost, recyclable option

### Polycarbonate

- Impact performance
- Good performance against heat
- Excellent cold flexibility

## LENS TINTS

### Clear

Allows for maximum visible-light transmission.

### IRUV

Worn for applications and in environments where others are performing welding tasks such as torch brazing, torch soldering, gas welding, and oxygen cutting. Available in Shades 3.0 and 5.0.

## SPECIAL TINTS

Enhances vision and reduces glare by blocking light transmission. Available in light, medium, and dark green tints.

Selecting the right PPE to sufficiently reduce exposure to hazards is essential to work safety.

The MAXVIEW™ is a premium face shield that features an oversized window to deliver exceptional optical clarity and an industry-leading panoramic view. A built-in side and chin guard protects against splash and flying debris while the extended crown keeps you protected from overhead hazards.

**SureWerx®**

- The Maxview is designed to offer maximum face protection coverage, incorporating an extra-large clear polycarbonate window that is available in two options: without anti-fog treatment or with our premium anti-fog coating
- Extended top-of-head coverage protects against hazards from above
- Built-in side and chin guard protects against splash and flying debris
- Lightweight and balanced construction for all-day comfort
- Up and down detents lock securely in place until manually adjusted
- The high-impact PC window is then framed on the side and chin areas and features an extra-large crown
- This combination translates into maximum coverage, head to lower neck, and side to side. In fact, Maxview offers a full 1" of extra window protection on each side (2" total) versus the leading face shield model, ensuring best-in-class protection and exceptional panoramic views. Check and compare!
- Given its amazing coverage and viewing area, the Maxview is incredibly light
- Maxview incorporates engineered detents that lock in both the up and down positions
- Designed to be used with most goggles, respirators, and all safety glasses
- Premium **370 Speed Dial™** ratcheting headgear suspension - The 370 Speed Dial™ is highlighted by Jackson's famous "Easy Grab-Easy Turn" oversized adjusting dial and patented swivel adjuster band, achieving maximum comfort and fit quickly, easily, and conveniently—saves time, increases productivity, and improves worker safety!

AIRMAX+

Optimum Safety  
High Impact  
Polycarbonate Window

The QUAD 500™ is a premium multi-purpose face shield that offers an unparalleled range of face and eye protection solutions. Designed for maximum above-the-neck protection, this product is excellent for heavy-duty grinding, while optional Shade 5 and 8 visors make it ideal for plasma cutting and oxy/acetylene cutting, brazing, and much more.

- All Quad 500 products have been designed to offer maximum above-the-neck face protection, including an extra-large molded polycarbonate window featuring our premium anti-fog coating
- For added protection, the molded window is completely framed on the sides and chin and features an extra-large crown
- The Quad 500 offers exceptional panoramic views with virtually no distortion
- Ideal for grinding, cutting, oxy/acetylene cutting, plasma cutting, brazing and more
- Engineered detents lock in the up or down position until manually adjusted
- Premium **370 Speed Dial™** ratcheting headgear suspension - The 370 Speed Dial™ is highlighted by Jackson's famous "Easy Grab-Easy Turn" oversized adjusting dial and patented swivel adjuster band, achieving maximum comfort and fit quickly, easily, and conveniently—saves time, increases productivity, and improves worker safety!

14220

Available with optional flip-up/flip-down extra-large IR window

- The Quad 500 face shield is also available with an exclusive, **extra-large flip-up/flip-down IR window** for added eye protection when used in applications producing infrared hazards
- It's easy and safe—by keeping the Quad 500 clear window in the down position at all times, the operator can flip the IR shaded window up or down, providing uninterrupted face protection during cutting and grinding operations
- Flip windows available in:
  - **Shade 5 IR** for oxy/acetylene cutting, brazing, and plasma cutting
  - **Shade 8 IR** for oxy/acetylene welding and plasma cutting
- Both the clear and flip windows feature detents that lock in both the up and down positions
- Designed to be used with most goggles, respirators, and all safety glasses

14230

Please note: Always wear safety glasses when using face shields.

- Specially designed to offer maximum eye coverage and protection, incorporating a variety of lens shades and coatings
- Made with premium virgin polycarbonate high impact, optically correct wrap style lenses, providing 99.9% UV protection
- Soft temples are curved inwards from front to back to ensure a super comfortable, slip-resistant fit
- As an added advantage, the temple tips are extremely flexible, further ensuring a snug fit while relieving any undue pressure to the user—these glasses are extremely comfortable and stay on during use!
- Frames have been developed using a specially formulated ultra-flexible, ultra-strong base material that provides incredible durability, significantly reducing breakage—check and compare!

# SAFETY WEAR PPE

## DISPOSABLE APPAREL

Protects workers from dust, dirt and grime, oil and grease.  
Disposable apparel items are suitable for many industries:

**LAB AND PHARMACEUTICAL APPLICATIONS**

**MANUFACTURING**

**FOOD PROCESSING AND RESTAURANTS**

## HI-VIS SAFETY WEAR

High visibility / hi-vis safety wear will improve your visibility on a jobsite and ultimately, will improve your workplace safety:

**CONSTRUCTION SITES**

**TRANSPORTATION INDUSTRY**

**ELECTRICAL UTILITY INDUSTRY**

**MANUFACTURING**

**WAREHOUSES**

It seems safety workwear is essential almost everywhere. The importance of safety clothing cannot be stressed enough. Focus on choosing the right PPE and ensure your workforce stays protected and free from injury.

### Disposables

Workers should have personal disposable apparel to protect their entire bodies from head to toe.

### Hi-Vis

Features of high-visibility clothing have improved the effectiveness and contributed to improved safety for workers.

# GENERAL PPE

## BE AWARE OF YOUR SURROUNDINGS

Making the workplace safe is everyone's responsibility, so make sure that you check your work area and remove all potential hazards before starting.

This small step can ensure you have a productive day at work and arrive home in the same condition that you went to work.

## PPE IS THERE TO SAVE YOUR LIFE – USE IT.

It is essential that you wear the correct PPE for the job application. The fit, comfort, colour and certification of the product needs to be right to enable you to deliver your best work. Check them all before you start.

Our livelihoods depend on us doing our best work. The best work is only achieved when your health and safety is guaranteed.

*Your first line of defense:*

**HEADLAMPS**

**HEARING PROTECTION**

**KNEE & ELBOW PROTECTION**

**SLIP PROTECTION**

Work is something we all do. The quality of work with safety and health is a basic part of a safety culture. Building a culture that lasts 365 days a year is our goal.

### Headlamps

Rechargeable SMD/COB 250 Lumens Headlamp or COB 150 Lumens Headlamp provide lighting in the darkest work environments.

### Earplugs

Choose from a wide variety of hearing conservation solutions in both disposable and reusable ear plugs.

### Knee & Elbow Pads

Excellent for welders, ship builders, roofers, construction workers, flooring installers and anywhere hard working Knee & Elbow Pads are required.

### Traction Aids

The solution that gives you the utmost confidence on ice and snow. Ice Diamond™ Tungsten Carbide Spikes provide powerful traction with maximum grip.

# HEARING PROTECTION

**JACKSON®**  
SAFETY

**PROVIDE  
SAFE WORKING  
CONDITIONS**

## Why is Hearing Protection important?

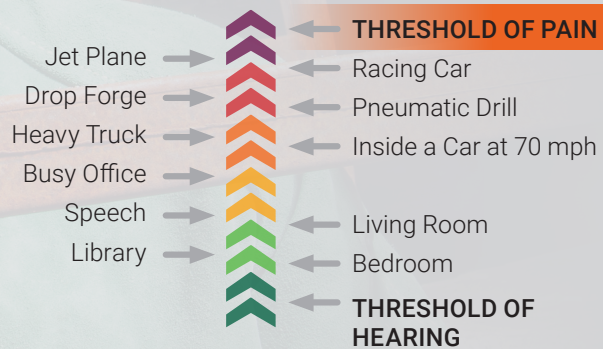

Continued exposure to noise above certain levels causes permanent hearing damage. Hearing cells cannot be repaired nor do they regenerate.

## When does it become a problem?

Workers are exposed to noise levels at different frequencies that may vary depending on the type of industry and activities performed. Noise levels above 80dB will start causing progressive hearing damage as the noise intensity and exposure increase.

## Getting to Know Hearing

Hearing protection should be taken very seriously and protectors, should be comfortable to wear and offer sufficient attenuation to prevent hearing loss based on individual protection needed.

## What Level of Protection Do You Need?

The SNR number gives consumers a methodology to judge performance among different models of hearing protectors. A higher number indicates more effective protection against sound.

## Employer's responsibilities

Under EU noise legislation, employers must provide the option of suitable hearing protection where noise exceeds 80dB(A). At 85dB, employers must provide and strictly enforce the use of Hearing Protection. European standards require that hearing protection equipment is tested to determine the Single Number Ratings (SNR) of each product. This is calculated when environmental noise level and the desired final noise levels, at the end organ of hearing, are subtracted.

Jackson Safety® Hearing Protection provides quality, comfort and ease-of-use in reusable and disposable styles for excellent attenuation in a wide variety of noise-level environments. For hearing protection solutions, choose from a wide variety of earplugs designed to make your workday safer and more productive.

## Jackson Safety Ultra-Flex Knee Pads

- The articulating hinged design ensures proper placement all day long – set them once and forget you are even wearing them
- Soft elastic, extra-wide woven straps with reinforced sewn ends are placed well above and below the knee – no Velcro, which contaminates over time
- Straps stay aligned with your legs in any position – will not bind behind the knee
- Built with strong, flexible hard plastic outer shells that extend well above, below and to the inside/outside of the knee for added knee and leg protection
- Metal rivet hinge ensures long lasting protection while kneeling or walking
- On the outside, pads feature a perfectly placed curved non-marking Grip Strip
- Grip-Strip designed for use in all applications without gumming up
- On the inside, pads offer a long lasting 16 mm (5/8") closed cell foam pad for maximum comfort and protection
- Sweat does not penetrate closed cell foam – lasts longer and won't "stink"
- Our Jackson Safety Ultra-Flex Gel version offers even greater user comfort and protection through the use of a three layer, 19 mm (¾") thick closed cell foam pad with built-in GEL packs – the ultimate in knee protection!
- Virtually indestructible – built for years of hard work and heavy use
- Specially designed Quick-Snap clips ensure quick and easy removal
- Comes in convenient, reusable mesh bag with one extra Quick-Snap clip
- Pads weigh only 260 g (9 oz.) each

## Jackson Safety Ultra-Flex *Gel* Knee Pads

- The Jackson Safety Ultra-Flex Gel Knee Pads offers all of the same legendary features as the Jackson Safety Ultra-Flex pad but has the added advantage of a built in GEL pack for supreme comfort and fit
- This is the ultimate knee pad for extreme applications where users are on their knees for extraordinarily long periods of time
- Unlike many GEL pads on the market, our GEL packs are securely placed inside a three layer, 19 mm (¾") closed cell foam knee protector compartment and are guaranteed to stay leak-free
- Available with black shells and Hi-Viz orange Grip Strip

**Special 19 mm foam incorporates a permanent gel pack for ultimate performance and comfort**

Due North® Traction Aids

## GRIP PRO™ SPIKELESS

- The Due North GripPro™ Spikeless Traction Aids are designed for workers requiring traction and are frequently transitioning from outdoor to indoor surfaces or working indoors.
- The non-spiked design is non-marring and will provide extra grip in numerous working environments.
- 11 (22/pair) patented hi-viz chevrons are strategically placed to increase grip and reduce the risk of slips and falls.
- Specially designed treads channel water away to deliver enhanced traction.
- Natural rubber material with proprietary polymer blend maintains flexibility even in sub-zero temperatures.
- Slip-On design fits snugly over boots and shoes.
- Easy on-off pull tab provides quick adjustment
- Can be worn while driving, climbing ladders, and walking on grates.

# WARRANTY TABLE

At Surewerx, servicing our customers is our #1 Priority. This is why we have put together one of the most comprehensive and user-friendly Warranty Programs in the industry. Simply, we stand by our products and craftsmanship behind them.

In the event our end users are experiencing difficulties with our products, we recommend completing all of the trouble shooting options first, before we diagnose and complete the warranty process.

## Common Issues with Welding Helmets Not Working

**Scenario 1:** Problems after end user changes environments

**Solution:** Adjust Delay/Sensitivity Setting on the Helmet.

Note: BH3 models work differently than our other ADFs, in that you turn sensitivity all the way up before adjusting, whereas other helmets start at 0.

**Scenario 2:** Helmet Sensors are not functioning properly

**Solution:** Check sensors, clear from any slag or debris. Also make sure you are welding in an unhindered environment

**Scenario 3:** Auto-darkening slow or not working properly

**Solution:** Check and replace batteries

**Scenario 4:** Filter not darkening properly, and there are issues with visibility, or spatter

**Solution:** Change external and internal safety plate

**Scenario 5:** Filter remains dark after completing a weld

**Solution:** Ambient light is too bright and user needs to adjust delay

**Scenario 6:** Helmet is giving off light flashes

**Solution:** Typically caused from low batteries. Try to replace batteries, and for the solar components, this occasionally happens when stored in a dark environment. Place helmet outdoors facing sunlight to re-charge, and try to store in a brighter environment.

If the end user has been unsuccessful trouble shooting, they should contact the distributor/company they purchased from for warranty claim assistance before contacting Surewerx directly.

Surewerx honors warranty claims on welding helmets listed in the event of a defect within the warranty coverage time frame.

Warranty coverage begins from the date of purchase for the end user.

If unable to resolve with your distributor/company product was purchased from, customer may email our customer service team [sales@jacksonsafety.eu](mailto:sales@jacksonsafety.eu), with the following:

*Completed Surewerx Warranty Claim Form*

*Attached Proof of Purchase*

We want to make sure all attempts at troubleshooting have been used before conducting the claim process.

Once claim has been submitted, and product is determined to be defective under warranty, a replacement part or unit will be sent.

We ask that you send the defective product here for further evaluation:

**Balder, Ltd.**

**Teslova ulica 30**

**SI-1000 Ljubljana**

# STANDARD TERMS & CONDITIONS OF SALE

## JACKSON SAFETY EUROPE & UK

### 1. General

"Jackson Safety", "JS", "we", "us": **either** SureWerx UK Ltd., a limited liability company registered in UK with a registered office located at Suite 1, 7th Floor, 50 Broadway, London, UK, SW1H 0BL for trading relationships with customers located on the UK mainland **or** Balder Ltd a limited liability company registered in Slovenia with a registered office located at Teslova ulica 30, 1000 Ljubljana, Slovenia, for all other trading relationships.

"Buyer": The legal entity to whom we supply goods (collectively "Products") of any kind. Except insofar as otherwise explicitly agreed in writing between Jackson Safety and the Buyer, these Standard Terms & Conditions (the "Conditions") will apply to all transactions between JS and the Buyer, whether this is done in writing, via the internet, electronically or verbally (each a "Contract").

### 2. Shipment agreements

**2.1** An agreement with JS to supply Products is only established when JS has confirmed in writing a Buyer purchase order within 8 days following its receipt. Any amendments must be confirmed in writing by JS.

**2.2** Any purchase order not confirmed in writing by JS shall be null and void.

### 3. Terms of delivery and transportation

**3.1** The method of transport shall be determined by JS if not specified by the Buyer. For certain destinations JS may require the buyer to arrange their own transportation on an ex-works basis, JS will make the Buyer aware of this in advance of any order being agreed. Any specific requirements of the Buyer on the transport and shipment will only be performed if the Buyer has declared that it will bear the additional costs.

### 4. Time of delivery

**4.1** The periods stated for delivery are not binding and are only target dates. Failure to meet the requested time of delivery does not in any event, provide grounds for the cancellation of an order or agreement, nor does it entitle the Buyer to any kind of compensation. We explicitly reserve the right to deliver by instalments, each of which will qualify as partial sale. The delivery of an order by instalments cannot in any event justify the refusal to pay for the Products supplied. Any liability on the part of JS for failure or delay in delivery is hereby excluded.

### 5. Liability

**5.1** In the event that the Products supplied are damaged or incomplete, or in the event of any error, missing piece or any other type of irregularity, the Buyer is obliged to refuse the Products on delivery or to only accept them subject to a written reservation. Every complaint relating to the Products as delivered must be sent to us in writing within 5 working days as from the receipt, with a reference to the bill of lading. After that period, the Products will be deemed to have been finally accepted by the Buyer. No goods may be returned without prior written permission from JS. Such permission will not in any way imply that the Products have been acknowledged by JS as being damaged. Goods being returned, in whatever way they are being sent, remain at the Buyer's risk and will be sent to our warehouse, carriage free.

**5.2** JS shall not be liable for or responsible for any defect or other claim which arises from (i) normal wear and tear, misuse, negligence, accident, abuse, use not in accordance with standards of proper practice or normal usage conditions set out in the catalogues, manuals or handbooks supplied by JS, modification or alteration not authorized in writing by JS, or use in conjunction with a third party product, or (ii) Buyer's negligence, or (iii) the breach of Buyer's obligations under this Agreement.

### 6. Delivery and risks

**6.1** Where goods travel on an ex works basis delivery is regarded as being complete on the moment of departure from our warehouse

loading dock. It is the Buyer's responsibility to ensure adequate insurance is in place to cover the transit risk. The risk of loss, damage or destruction of the goods to be supplied by JS is borne by the Buyer from the moment that these goods are collected in accordance with this article.

**6.2** Where JS arranges the transportation it is the Buyers responsibility to ensure that the goods are inspected upon receipt and that JS are notified of any shortages or damages within 24 hours, together with supporting photographic evidence. JS will not accept liability to make good any missing or damaged product if this is not the case.

### 7. Force majeure and hardship

**7.1** All delivery and other obligations of JS will be suspended in the event of force majeure. In such cases, JS is only obliged to deliver or perform its obligations to the extent possible. 'Force majeure' includes the following, although this is not an exhaustive list: war, mobilization of troops, embargo, partial or complete strike, lock-out, riot, epidemics, natural disasters, import and export restrictions, machinery failure, staff sickness, fire, explosion, accidents of any kind and any cause hampering the normal supply by our suppliers of raw materials, fuels and inventory for our normal production, transportation or dispatch, as well as all similar circumstances affecting JS, its subcontractors or suppliers.

### 8. Re-sale

**8.1** The Buyer may only re-sell the Products in their original packaging, without modification.

### 9. Payments

**9.1** All amounts due to JS are payable within 30 days as from the invoice date, without discount, deduction or offset.

**9.2** JS retains legal title to all Products until settlement has been received in full for the associated Sales Invoice. In the event of non-payment or insolvency JS, or its agents, reserve the right to enter the Buyers premises, without notice, to recover the Products.

### 10. Compliance with Laws

**10.1** Buyer shall comply with all laws and regulations applicable to the storage, use, handling, installation, registration and labelling of all Products as from their delivery and the disposal of all wastes and residues (including packaging) resulting from your use of the Products.

### 11. Privacy

**11.1** Buyer agrees that JS and entities related with it may collect, store and use Buyer data, including personal data, for the purpose of facilitating its marketing and sale of the Products, and Buyer hereby consents to such collection, storage and use of Buyer data by JS and entities related with it for these purposes.

### 12. Miscellaneous

**12.1** Any provision in these Conditions which is void or inapplicable shall have no effect on the validity of the other provisions. Any invalid clause will be replaced by another one that is appropriate.

**12.2** JS may carry out its obligations under the Contract through any agents or sub-contractors appointed by it in its absolute discretion.

### 13. Applicable law

**13.1** All Contracts relating to UK mainland trading relationships are deemed executed with SureWerx UK Ltd at the registered office of JS in the UK and are governed by the laws of England and Wales, all other trading relationships are deemed executed with Balder Ltd at the registered office of JS in Slovenia and are governed by Slovenian law. Any dispute concerning the interpretation, implementation and cancellation of the present agreement which cannot be settled amicably will be resolved exclusively by the Courts of England or Slovenia as appropriate. JS may also introduce any proceedings before the courts of the residence of a debtor. The Vienna Sales Convention does not apply.
