

DEMO POOL MANAGEMENT

**TRY BEFORE YOU BUY:
WE CAN MANAGE YOUR DEMO POOL!**

OUR ALL-ROUND SERVICES FOR A SEAMLESS PRESENTATION OF YOUR MEDICAL DEMO DEVICES.

Medical devices are high-quality machines and cost a great deal to purchase. Manufacturers in the health sector therefore depend on being able to offer hospitals and medical facilities opportunities to loan and test the units first.

However, managing your own demo pool is a time-consuming process and consumes resources. Rhenus High Tech can handle the entire management work for your demo pool through its specialist, Medical Transport Service or MTS in a transparent and cost-effective manner.

We store your devices, configure them and supply them securely packaged to the place where they will be used on the day of the presentation. Our employees set up the demonstration devices and configure them there.

We pick them up again after the end of the presentation, check that they still work and delete any personal patient data. We then transport the devices back to the demo pool and put them into storage.

OUR SERVICES FOR YOUR DEMO DEVICE POOL

- Professional stock checks
- Warehouse management at our own high-tech centres
- Cleaning the devices
- Preparing and configuring the products
- Delivering them to their place of use on time
- Returning them to the demo pool
- Deleting sensitive patient data in line with the GDPR
- Maintenance and repair work

HOW YOU BENEFIT FROM USING RHENUS HIGH TECH

COMPLETE TRANSPARENCY

As the leading high-tech logistics specialist in Europe, we have an extensive network of business sites with integrated security systems so that we can transparently manage your demo pool stocks and store them safely. We keep our eye on your stocks on your behalf at all times.

REDUCING COSTS

Do you want to reduce the costs for your demo pool? If Rhenus High Tech is your partner, you benefit from our multi-user centres where we can store your equipment safely until it is needed on the next occasion. Our employees have also received technical training and can therefore ease the pressure on your technicians.

SCALABILITY

Are you aiming to grow sustainably? Because we are a co-shareholder in the European TENESO high-tech network and are part of the Rhenus Group with its global operations, we are able to scale operations for your products – whether regionally, nationally or internationally. We have the necessary infrastructure and the network to professionally support your growth. Regardless of whether you are increasing volumes, expanding geographically or seeking greater technical product depth.
