THEPACK®

EL PACKAGING DE CARTÓN NANO-MICRO

¿QUÉ ES THEPACK®?

THEPACK® es la nueva marca registrada de **GARCIA DE POU** para su nuevo packaging de cartón fabricado con tecnología nano-micro.

¿QUÉ ES LA TECNOLOGÍA NANO-MICRO?

Nano-micro es el tamaño más pequeño para el cartón ondulado. Implica mucha tecnología, inversión y conocimiento para producir la ondulación nano-micro con papeles de poco gramaje.

¿CUÁLES SON LAS VENTAJAS DE LA NANO TECNOLOGÍA PARA EL PACKAGING ALIMENTARIO Y EL TAKE-AWAY?

Con la nano tecnología, los envases se vuelven más fuertes, ligeros y permiten mantener la temperatura interior durante más tiempo.

La ondulación nano-micro proporciona una mayor rigidez a los envases y permite reducir la cantidad de papel utilizado en su fabricación.

¿SON LOS PRODUCTOS THEPACK® NANO-MICRO RESISTENTES A LAS GRASAS?

Todos los productos **THEPACK®** nano-micro son resistentes a grasas y humedad gracias a que o bien llevan incorporada una capa interna de papel antigrasa (libre de PFOS / PFOA) o bien llevan un recubrimiento de polipropileno (PP), que impide el deterioro del envase durante su utilización.

¿SON LOS PRODUCTOS THEPACK® MICROONDABLES?

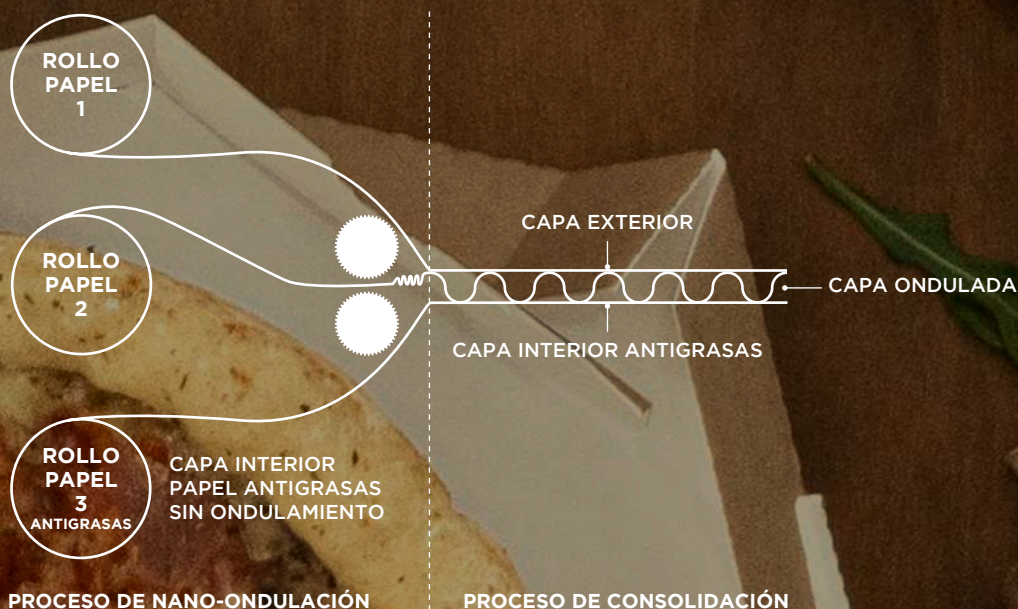

Sí, son microondables. Pueden calentarse en el microondas durante 9 minutos a 1000W o 7 minutos y medio a 1200W.

¿PARA QUÉ ESTÁ HECHO EXACTAMENTE THEPACK®?

Su finalidad es sustituir al packaging de FOAM (PSE Poliestireno Expandido).

THEPACK® es la solución ideal para este cambio ya que combina calidad y respeto al medio ambiente, es biodegradable, ligero, resistente y proporciona aislamiento térmico.

PROCESO DE ONDULACIÓN NANO-MICRO

THEPACK®

THE NANO-MICRO CARDBOARD PACKAGING

WHAT IS THEPACK®?

THEPACK® is the new registered trademark of **GARCIA DE POU** for its latest range of cardboard packaging produced with nano-micro technology.

WHAT IS NANO-MICRO TECHNOLOGY?

Nano-micro flute is the thinnest thickness of corrugated cardboard. Producing nano-micro flute from lightweight paper requires a high degree of technology, investment and know-how.

WHAT ARE THE BENEFITS OF NANO TECHNOLOGY FOR FOOD AND TAKEAWAY PACKAGING?

Nano technology makes packaging stronger, lighter and more heat insulated (the internal temperature is maintained for longer).

Nano-micro flute cardboard is more rigid and reduces the amount of paper used in the manufacturing process.

ARE THEPACK® NANO-MICRO PRODUCTS GREASEPROOF?

All **THEPACK®** nano-micro products are greaseproof and WS wet strenght resistant, since they either boast an inner liner of greaseproof paper (PFOS/ PFOA free) or a polypropylene (PP) coating, which prevent damage to the packaging during use.

ARE THEPACK® PRODUCTS MICROWAVEABLE?

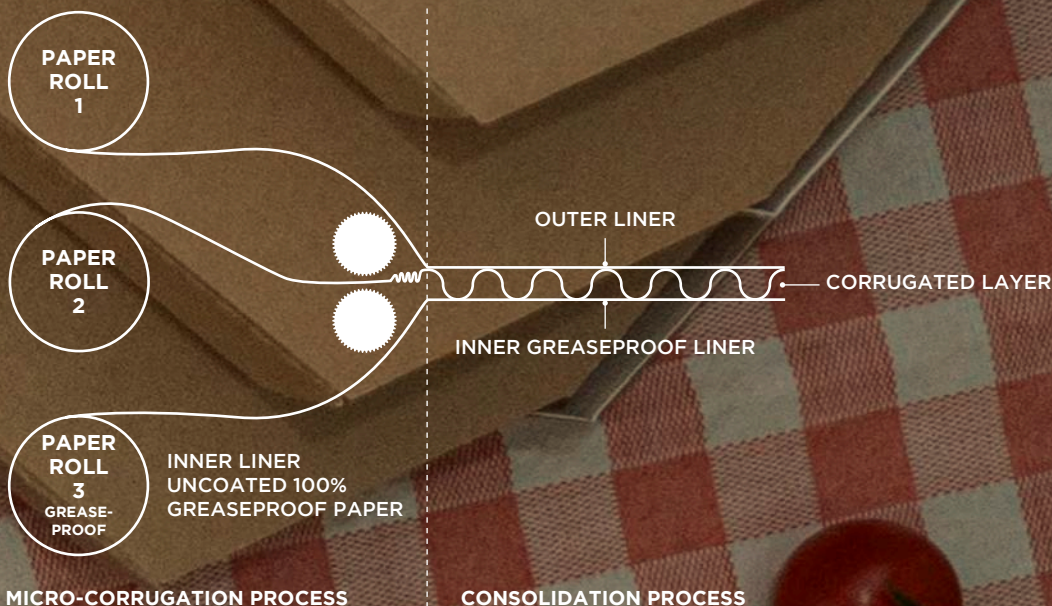

Yes, they are microwaveable. They can be heated in the microwave for nine minutes at 1000W or seven and a half minutes at 1200W.

WHAT EXACT PURPOSE DOES THEPACK® HAVE?

THEPACK® is an alternative to packaging made from Expanded Polystyrene (EPS).

We believe that **THEPACK®** is a solution combining quality and respect for the environment, since it is biodegradable, lightweight and strong and delivers heat insulation.

NANO-MICRO CORRUGATION PROCESS

THEPACK®

EL PACKAGING DE CARTÓN NANO-MICRO

¿SON LOS PRODUCTOS THEPACK® RESPETUOSOS CON EL MEDIO AMBIENTE?

La mayoría de los productos **THEPACK®** son biodegradables, lo que evita la generación de residuos tóxicos y contaminantes.

Cuentan con certificación **FSC™**, lo que garantiza que la materia prima procede de bosques gestionados de forma responsable.

Se fabrican con papel de alta calidad 100% virgen siendo todos los productos sostenibles y respetuosos con el medioambiente.

Están elaborados con materiales reciclables lo que permite que el envase, una vez utilizado, se convierta nuevamente en materia prima aprovechable: 0% residuos.

Además, su característica principal es que, gracias a la ondulación nano-micro, el envase se vuelve más ligero con una mayor rigidez. Esto es muy importante en esta transición ecológica porque se reduce el consumo de material utilizado, promoviendo un consumo responsable y una mayor conciencia medioambiental.

Por todo ello, los productos **THEPACK®** son la incorporación estrella a nuestra gama **FEEL GREEN**.

THE NANO-MICRO CARDBOARD PACKAGING

ARE THEPACK® PRODUCTS ENVIRONMENTALLY FRIENDLY?

Most of **THEPACK®** products are biodegradable, which means they do not produce toxic or polluting waste.

The range is FSC™ certified, which guarantees that the raw material comes from responsibly managed forests.

Made from high-quality pure virgin paper, all products in the range are sustainable and environmentally friendly.

THEPACK® products are made from recyclable materials, which means that, once used, the packaging can be converted once again into usable raw material for zero waste.

What's more, thanks to nano-micro corrugation, the packaging is lighter and more rigid. This is very important in terms of ecological transition, since less materials are used, promoting responsible consumption and greater environmental awareness.

THEPACK® products are therefore the star addition to our **FEEL GREEN** range.
